

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

It is believed that the Graded Literature Readers will commend themselves to thoughtful teachers by their careful grading, their sound methods, and the variety and literary character of their subject-matter.

They have been made not only in recognition of the growing discontent with the selections in the older readers, but also with an appreciation of the value of the educational features which many of those readers contained. Their chief points of divergence from other new books, therefore, are their choice of subject-matter and their conservatism in method.

A great consideration governing the choice of all the selections has been that they shall interest children. The difficulty of learning to read is minimized when the interest is aroused.

School readers, which supply almost the only reading of many children, should stimulate a taste for good literature and awaken interest in a wide range of subjects.

In the Graded Literature Readers good literature has been presented as early as possible, and the classic tales and fables, to which constant allusion is made in literature and daily life, are largely used.

Nature study has received due attention. The lessons on scientific subjects, though necessarily simple at first, preserve always a strict accuracy.

The careful drawings of plants and animals, and the illustrations in color—many of them photographs from nature—will be attractive to the pupil and helpful in connection with nature study.

No expense has been spared to maintain a high standard in the illustrations, and excellent engravings of masterpieces are given throughout the series with a view to quickening appreciation of the best in art.

These books have been prepared with the hearty sympathy and very practical assistance of many distinguished educators in different parts of the country, including some of the most successful teachers of reading in primary, intermediate, and advanced grades.

INTRODUCTION

THE selections in this Sixth Reader are a moderate, but distinct, advance over those in the Fifth Reader, in thought, in language, and in literary construction.

The teacher may now place increased emphasis on the literary side of the reading, pointing out beauties of language and thought, and endeavoring to create an interest in the books from which the selections are taken. Pupils will be glad to know something about the lives of the authors whose works they are reading, and will welcome the biographical sketches throughout the book. These can be made the basis of further biographical study at the discretion of the teacher.

The word lists at the end of the selections contain all necessary explanations of the text. For convenience, the more difficult words, with definitions and complete diacritical markings, are grouped together in the vocabulary at the end of the book.

A basal series of readers can do little more than broadly outline a course in reading, relying on the teacher to carry it forward. If a public library is within reach, the children should be encouraged to use it; if not, the school should exert every effort to accumulate a school library of standard works to which the pupils may have ready access.

The primary purpose of a reading book is to give pupils the mastery of the printed page, but through oral reading it also becomes a source of valuable training of the vocal organs. Almost every one finds pleasure in listening to good reading. Many feel that the power to give this pleasure comes only as a natural gift, but an analysis of the art shows that with practice any normal child may acquire it. The qualities which

are essential to good oral reading may be considered in three groups:

First — An agreeable voice and clear articulation, which, although possessed by many children naturally, may also be cultivated.

Second — Correct inflection and emphasis, with that due regard for rhetorical pauses which will appear whenever a child fully understands what he is reading and is sufficiently interested in it to lose his self-consciousness.

Third — Proper pronunciation, which can be acquired only by association or by direct teaching.

Clear articulation implies accurate utterance of each syllable and a distinct termination of one syllable before another is begun.

Frequent drill on pronunciation and articulation before or after the reading lesson will be found profitable in teaching the proper pronunciation of new words and in overcoming faulty habits of speech.

Attention should be called to the omission of unaccented syllables in such words as *history* (not *histry*), *valuable* (not *valuble*), and to the substitution of *unt* for *ent*, *id* for *ed*, *iss* for *ess*, *unce* for *ence*, *in* for *ing*, in such words as *moment*, *delighted*, *goodness*, *sentence*, *walking*. Pupils should also learn to make such distinctions as appear between *u* long, as in *duty*, and *u* after *r*, as in *rude*; between *a* as in *hat*, *a* as in *far*, and *a* as in *ask*.

The above hints are suggestive only. The experienced teacher will devise for herself exercises fitting special cases which arise in her own work. It will be found that the best results are secured when the interest of the class is sustained and when the pupil who is reading aloud is made to feel that it is his personal duty and privilege to arouse and hold this interest by conveying to his fellow-pupils, in an acceptable manner, the thought presented on the printed page.

Among the Shoals

BY J. F. COOPER

James Fenimore Cooper (1789-1851): A famous American novelist. His best novels describe backwoods and seafaring life, with both of which Cooper's early experiences had made him familiar. The most popular of these stories are "Deerslayer," "The Last of the Mohicans," and "The Pilot."

This selection is from "The Pilot," the best of Cooper's sea novels. The scene is laid during the American Revolution, and John Paul Jones, the hero of so many Revolutionary sea-fights, is one of the characters in the story.

I

As the first mist of the gale passed over, it was succeeded by a faint light that was a good deal aided by the glittering foam of the waters, which now broke in white curls around the vessel in every direction. The land could be faintly discerned, rising like a heavy bank of black fog, above the margin of the waters, and was only distinguishable from the heavens by its deeper gloom and obscurity. The last rope was coiled and deposited in its proper place by the seamen, and for several minutes the stillness

of death pervaded the crowded decks. It was evident to every one that their ship was dashing at a prodigious rate through the waves, and was approaching with velocity the quarter of the bay where the shoals and dangers were known to be situated.

"Tack your ship, sir, tack your ship," said the pilot to Griffith; "I would see how she works before we reach the point where she must behave well or we perish."

Griffith gazed after him, while the pilot gave forth the cheering order that called each man to his station to perform the desired evolution. The helm was no sooner put alee, than the huge ship bore up gallantly against the wind, and, dashing directly through the waves, threw the foam high into the air, as she looked boldly into the very eye of the wind; and then, yielding gracefully to its power, she fell off on the other tack, with her head pointed from those dangerous shoals that she had so recently approached with such terrifying velocity. The heavy yards swung round, as if they had been vanes to indicate the currents of the air; and in a few moments the frigate again moved with stately progress through the water, leaving the rocks and shoals behind her on one side of the bay, but advancing toward those that offered equal danger on the other.

During this time the sea was becoming more agitated, and the violence of the wind was gradually

increasing. The latter no longer whistled amid the cordage of the vessel, but it seemed to howl surlily as it passed the complicated machinery that the frigate obtruded in its path. An endless succession of white surges rose above the heavy billows, and the very air was glittering with the light that was disengaged from the ocean. The ship yielded each moment more and more before the storm, and in less than half an hour from the time that she had lifted her anchor she was driven along with tremendous fury by the full power of a gale of wind. Still the hardy and experienced mariners who directed her movements, held her to the course that was necessary to their preservation, and still Griffith gave forth, when directed by their unknown pilot, those orders that turned her in the narrow channel where alone safety was to be found.

So far the performance of his duty appeared easy to the stranger, and he gave the required directions in those still, calm tones that formed so remarkable a contrast to the responsibility of his situation. But when the land was becoming dim in distance as well as darkness, and the agitated sea alone was to be discovered as it swept by them in foam, he broke in upon the monotonous roaring of the tempest with the sound of his voice, seeming to rouse himself to the occasion.

“Now is the time to watch her closely, Mr. Grif-

fith," he cried ; " here we get the true tide and the real danger. Place the best quartermaster of your ship in those chains, and let an officer stand by him and see that he gives us the right water."

5 " I will take that office on myself," said the captain ; " pass a light into the weather main chains."

" Stand by your braces !" exclaimed the pilot, with startling quickness. " Heave away that lead !"

These preparations taught the crew to expect the
10 crisis, and every officer and man stood in fearful silence at his assigned station, awaiting the issue of the trial. Even the quartermaster gave out his orders to the men at the wheel in deeper and hoarser tones than usual, as if anxious not to disturb
15 the quiet and order of the vessel.

While this deep expectation pervaded the frigate the piercing cry of the leadsman, as he called " by the mark seven," rose above the tempest, crossed over the decks, and appeared to pass away to lee-
20 ward, borne on the blast like the warnings of some water-spirit.

" 'Tis well," returned the pilot calmly ; " try it again."

The short pause was succeeded by another cry,
25 " and a half-five !"

" She shoals ! she shoals !" exclaimed Griffith ; " keep her a good full."

" Aye ! you must hold the vessel in command

now," said the pilot, with those cool tones that are most appalling in critical moments, because they seem to denote most preparation and care.

The third call, "by the deep four!" was followed by a prompt direction from the stranger to tack. 5

Griffith seemed to emulate the coolness of the pilot, in issuing the necessary orders to execute this maneuver.

The vessel rose slowly from the inclined position into which she had been forced by the tempest, and 10 the sails were shaking violently, as if to release themselves from their confinement, while the ship stemmed the billows, when the well-known voice of the sailing master was heard shouting from the fore-castle: "Breakers! breakers, dead ahead!" 15

This appalling sound seemed yet to be lingering about the ship, when a second voice cried, "Breakers on our lee bow!"

"We are in a bight of the shoals, Mr. Gray!" cried the commander. "She loses her way; perhaps an 20 anchor might hold her."

"Clear away that best bower!" shouted Griffith through his trumpet.

"Hold on!" cried the pilot, in a voice that reached the very hearts of all who heard him; 25 "hold on everything."

The young man turned fiercely to the daring stranger who thus defied the discipline of his vessel,

and at once demanded: "Who is it that dares to countermand my orders? Is it not enough that you run the ship into danger, but you must interfere to keep her there? If another word —"

5 "Peace, Mr. Griffith," interrupted the captain, bending from the rigging, his gray locks blowing about in the wind and adding a look of wildness to the haggard care that he exhibited by the light of his lantern; "yield the trumpet to Mr. Gray; he alone
10 can save us!"

Griffith threw his speaking trumpet on the deck, and as he walked proudly away, muttered in bitterness of feeling: "Then all is lost indeed! and among the rest the foolish hopes with which I visited this
15 coast."

There was, however, no time for reply; the ship had been rapidly running into the wind, and as the efforts of the crew were paralyzed by the contradictory orders they had heard, she gradually lost her
20 way and in a few seconds all her sails were taken aback.

Before the crew understood their situation, the pilot had applied the trumpet to his mouth, and, in a voice that rose above the tempest, he thundered
25 forth his orders. Each command was given distinctly and with a precision that showed him to be master of his profession. The helm was kept fast, the head yards swung up heavily against the wind,

and the vessel was soon whirling round on her heel with a retrograde movement.

II

Griffith was too much of a seaman not to perceive that the pilot had seized with a perception almost intuitive the only method that promised to extricate the vessel from her situation. He was young, impetuous, and proud, but he was also generous. Forgetting his resentment and his mortification, he rushed forward among the men, and, by his presence and example, added certainty to the experiment. The ship fell off slowly before the gale, and bowed her yards nearly to the water as she felt the blast pouring its fury on her broadside, while the surly waves beat violently against her stern, as if in reproach at departing from her usual manner of moving. 15

The voice of the pilot, however, was still heard, steady and calm, and yet so clear and high as to reach every ear; and the obedient seamen whirled the yards at his bidding, in despite of the tempest, as if they handled the toys of their childhood. When the ship had fallen off dead before the wind, her head sails were shaken, her after yards trimmed, and her helm shifted before she had time to run upon the danger that had threatened, as well to leeward as to windward. The beautiful fabric, obedient to her government, threw her bows up gracefully toward 25

the wind again; and, as her sails were trimmed, moved out from among the dangerous shoals in which she had been embayed, as steadily and swiftly as she had approached them.

5 A moment of breathless astonishment succeeded the accomplishment of this nice maneuver, but there was no time for the usual expressions of surprise. The stranger still held the trumpet, and continued to lift his voice amid the howlings of the blast, when-
 10 ever prudence or skill required any change in the management of the ship. For an hour longer there was a fearful struggle for their preservation, the channel becoming at each step more complicated, and the shoals thickening around the mariners on
 15 every side. The lead was cast rapidly, and the quick eye of the pilot seemed to pierce the darkness with a keenness of vision that exceeded human power.

It was apparent to all that were in the vessel that they were under the guidance of one who understood
 20 the navigation thoroughly, and their exertions kept pace with their reviving confidence. Again and again the frigate appeared to be rushing blindly on shoals where the sea was covered with foam and where destruction would have been as sudden as it
 25 was certain, when the clear voice of the stranger was heard warning them of the danger and inciting them to do their duty. The vessel was implicitly yielded to his government; and during those anxious

moments when she was dashing the waters aside, throwing the spray over her enormous yards, each ear would listen eagerly for those sounds that had obtained a command over the crew that can only be acquired under such circumstances by great steadiness and consummate skill.

The ship was recovering from the inaction of changing her course in one of those critical tacks that she had made so often, when the pilot, for the first time, addressed the commander of the frigate, who still continued to superintend the all-important duty of the leadsmen.

"Now is the pinch," he said, "and if the ship behaves well, we are safe; but if otherwise, all we have yet done will be useless." 15

The veteran seaman whom he addressed left the chains at this portentous notice, and calling to his first lieutenant, required of the stranger an explanation of his warning.

"See you yon light on the southern headland?" 20 returned the pilot; "you may know it from the star near it by its sinking at times in the ocean. Now observe the hummock a little north of it, looking like a shadow in the horizon; 'tis a hill far inland. If we keep that light open from the hill, we shall do so well; but if not, we surely go to pieces."

"Let us tack again!" exclaimed the lieutenant.

The pilot shook his head as he replied: "There is

no more tacking or box-hauling to be done to-night. We have barely room to pass out of the shoals on this course ; and if we can weather the Devil's Grip, we clear their outermost point ; but if not, as I said
 5 before, there is but an alternative."

"If we had beaten out the way we entered," exclaimed Griffith, "we should have done well."

"Say, also, if the tide would have let us do so," returned the pilot, calmly. "Gentlemen, we must
 10 be prompt ; we have but a mile to go, and the ship appears to fly. That topsail is not enough to keep her up to the wind ; we want both jib and mainsail."

"'Tis a perilous thing to loosen canvas in such a tempest !" observed the doubtful captain.

15 "It must be done," returned the collected stranger ; "we perish without it. See ! the light already touches the edge of the hummock ; the sea casts us to leeward !"

"It shall be done !" cried Griffith, seizing the
 20 trumpet from the hand of the pilot.

The orders of the lieutenant were executed almost as soon as issued ; and everything being ready the enormous folds of the mainsail were turned loose to the blast. There was an instant when the result
 25 was doubtful ; the tremendous threshing of the heavy sail seemed to bid defiance to all restraint, shaking the ship to her center ; but art and strength prevailed and gradually the canvas was distended,

and bellying as it filled, was drawn down to its usual place by the power of a hundred men. The vessel yielded to this immense addition of force and bowed before it like a reed bending to a breeze. But the success of the measure was announced by a joyful cry from the stranger, that seemed to burst from his inmost soul.

"She feels it! she springs her luff! observe," he said, "the light opens from the hummock already: if she will only bear her canvas we shall go clear!" 10

A report like that of a cannon interrupted his exclamation, and something resembling a white cloud was seen drifting before the wind from the head of the ship, till it was driven into the gloom far to leeward. 15

"'Tis the jib, blown from the boltropes," said the commander of the frigate. "This is no time to spread light duck; but the mainsail may stand it yet."

"The sail would laugh at a tornado," returned the lieutenant; "but the mast springs like a piece of steel."

"Silence all!" cried the pilot. "Now, gentlemen, we shall soon know our fate. Let her luff—luff you can!" 25

This warning effectually closed all discourse, and the hardy mariners, knowing that they had already done all in the power of man to insure their safety,

stood in breathless anxiety, awaiting the result. At a short distance ahead of them the whole ocean was white with foam, and the waves, instead of rolling on in regular succession, appeared to be tossing about in
5 mad gambols. A single streak of dark billows, not half a cable's length in width, could be discerned running into this chaos of water; but it was soon lost to the eye amid the confusion of the disturbed element. Along this narrow path the vessel moved
10 more heavily than before, being brought so near the wind as to keep her sails touching. The pilot silently proceeded to the wheel, and with his own hands he undertook the steerage of the ship. No noise proceeded from the frigate to interrupt the
15 horrid tumult of the ocean; and she entered the channel among the breakers with the silence of a desperate calmness.

Twenty times, as the foam rolled away to leeward, the crew were on the eve of uttering their joy,
20 as they supposed the vessel past the danger; but breaker after breaker would still heave up before them, following each other into the general mass, to check their exultation. Occasionally the fluttering of the sails would be heard; and when the looks of
25 the startled seamen were turned to the wheel, they beheld the stranger grasping its spokes, with his quick eye glancing from the water to the canvas. At length the ship reached a point where she ap-

peared to be rushing directly into the jaws of destruction, when suddenly her course was changed, and her head receded rapidly from the wind. At the same instant the voice of the pilot was heard shouting, "Square away the yards! in mainsail!" 5

A general burst from the crew echoed, "Square away the yards!" and quick as thought the frigate was seen gliding along the channel before the wind. The eye had hardly time to dwell on the foam, which seemed like clouds driving in the heavens, 10 and directly the gallant vessel issued from her perils, and rose and fell on the heavy waves of the sea.

The seamen were yet drawing long breaths, and gazing about them like men recovered from a trance, when Griffith approached the man who had so suc- 15 cessfully conducted them through their perils. The lieutenant grasped the hand of the other, as he said, "You have this night proved yourself a faithful pilot, and such a seaman as the world cannot equal."

I. **Vê lǝq'í tǝ**: speed; quickness of motion. **Shōals**: shallow water; advances into shallow water. **Tǎck**: change the direction of a vessel by shifting the position of the helm and sails; the direction of a vessel with regard to the position of its sails. **Ėv ô lū'tion(shǔn)**: prescribed movement, as of a ship or a body of troops. **Á lēe'**: on the side away from the wind. **Quar'tēr mās'tēr**: an officer of low rank who attends to the helm, signals, etc., under the direction of the master of the ship. **Brāq'ǝ**: ropes by which the yards are moved horizon-

tally. **Heave away that lead**: take soundings with the lead and line. **Märk**: one of the bits of leather or colored bunting placed upon a sounding line at distances of from two to five fathoms; the unmarked fathoms are called *deeps*. **Mä-neu'vēr**: change of position; skillful movement. **Best bow'ēr**: large anchor. **Rē'trô grāde**: backward.

II. **Cōn sūm'māte**: of the highest quality; perfect. **Hūm'-mōck**: rounded knoll or hillock. **Bōx-haul'ing**: going from one tack or direction to another. **Bōlt'rōpes**: ropes stitched to the edges of sails to strengthen the sails. **Lūf**: turn the ship's head toward the wind. **Dīs cōurse'**: conversation; talk.

Rain in Summer

BY H. W. LONGFELLOW

Henry Wadsworth Longfellow (1807-1882): The best known and best loved of American poets. His simplicity of thought and expression makes him a favorite with children. The best of his longer poems are "Hiawatha," "Evangeline," and "The Courtship of Miles Standish." Many of his shorter poems—such as "The Psalm of Life," "The Bridge," and "The Village Blacksmith"—are household favorites. Longfellow wrote two prose works, "Outre Mer" and "Hyperion," descriptive of his European travels.

How beautiful is the rain !
 After the dust and the heat,
 In the broad and fiery street,
 In the narrow lane,
 How beautiful is the rain !

How it clatters along the roofs,
 Like the tramp of hoofs !

How it gushes and struggles out
 From the throat of the overflowing spout !
 Across the window-pane
 It pours and pours ;
 And swift and wide, 5
 With a muddy tide,
 Like a river down the gutter roars
 The rain, the welcome rain !

The sick man from his chamber looks
 At the twisted brooks. 10
 He can feel the cool
 Breath of each little pool ;
 His fevered brain
 Grows calm again,
 And he breathes a blessing on the rain. 15

From the neighboring school
 Come the boys,
 With more than their wonted noise
 And commotion ;
 And down the wet streets 20
 Sail their mimic fleets,
 Till the treacherous pool
 Engulfs them in its whirling
 And turbulent ocean.

In the country on every side, 25
 Where far and wide,

Like a leopard's tawny and spotted hide,
 Stretches the plain,
 To the dry grass and the drier grain
 How welcome is the rain !

5 In the furrowed land
 The toilsome and patient oxen stand ;
 Lifting the yoke-encumbered head,
 With their dilated nostrils spread,
 They silently inhale
 10 The clover-scented gale,
 And the vapors that arise
 From the well-watered and smoking soil.
 For this rest in the furrow after toil
 Their large and lustrous eyes
 15 Seem to thank the Lord,
 More than man's spoken word.

 Near at hand
 From under the sheltering trees,
 The farmer sees
 20 His pastures and his fields of grain,
 As they bend their tops
 To the numberless beating drops
 Of the incessant rain.
 He counts it as no sin
 25 That he sees therein
 Only his own thrift and gain.

 In çës'sant: unceasing; uninterrupted.

A Drop of Water on its Travels

BY ARABELLA BUCKLEY

Arabella Burton Buckley (1840—): An English author and naturalist. She has written several books on scientific subjects for young people, — among them are “Winners in Life’s Race,” “Life and her Children,” and “The Fairy-Land of Science,” from which this selection is taken.

Although we never see any water traveling from our earth up into the skies, we know that it goes there, for it comes down again in rain, and so it must go up invisibly. But where does the heat come from which makes this water invisible? Not ⁵ from below, but from above, pouring down from the sun. Wherever the sun-waves touch the rivers, ponds, lakes, seas, or fields of ice and snow upon our earth, they carry off invisible water vapor. They dart down through the top layers of the water, and ¹⁰ shake the water particles forcibly apart, and the drops spread themselves out in the gaps between the air atoms of the atmosphere.

It has been calculated that in the Indian Ocean three-quarters of an inch of water is carried off from ¹⁵ the surface of the sea in one day and night; so that as much as twenty-two feet, or a depth of water about twice the height of an ordinary room, is silently and invisibly lifted up from the whole surface of the ocean in one year. It is true that this is ²⁰

one of the hottest parts of the earth, where the sun-waves are most active ; but even in our own country many feet of water are drawn up in the summer time.

5 What, then, becomes of all this water? Let us follow it as it struggles upward to the sky. We see it in our imagination, first carrying layer after layer of air up with it from the sea, till it rises far above our heads, and above the highest mountains. Now
10 the air atoms are always trying to fly apart, and are only kept pressed together by the weight of the air above them, and so, as this water-laden air rises, its particles, no longer so much pressed together, begin to separate ; as all work requires an expenditure of
15 heat, the air becomes colder, and then you know at once what must happen to the invisible vapor—it will form into tiny waterdrops, like the steam from the kettle.

And so, as the air rises and becomes colder, the
20 vapor gathers into visible masses, and we can see it hanging in the sky and call it clouds. When these clouds are highest, they are about ten miles from the earth ; but when they are made of heavy drops, and hang low down, they sometimes come within a mile
25 of the ground.

Look up at the clouds as you go home, and think that the water of which they are made has all been drawn up invisibly through the air. Not, however,

necessarily here where we live, for air travels as wind all over the world, and so these clouds may be made of vapor collected in the Atlantic Ocean, or in the Gulf of Mexico, or even, if the wind is from the north, of chilly particles gathered from the surface of Greenland ice and snow and brought here by the moving currents of air. Only, of one thing we may be sure, that they come from the water of our earth.

Sometimes, if the air is warm, these water particles may travel a long way without ever forming into clouds; and on a hot, cloudless day the air is often very full of invisible vapor. Then, if a cold wind comes sweeping along, high up in the sky, and chills this vapor, it forms into great bodies of water-dust clouds, and the sky is overcast. 15

At other times, clouds hang lazily in a bright sky, and these show us that just where they are the air is cold, and turns the invisible vapor rising from the ground into visible water-dust, so that exactly in those spaces we see it as clouds. Such clouds form often on a warm, still, summer's day, and they are shaped like masses of wool, ending in a straight line below. They are not merely hanging in the sky, they are really resting upon a tall column of invisible vapor which stretches right up from the earth; and that straight line under the clouds marks the place where the air becomes cold enough to turn this invisible vapor into visible drops of water. 25

And now, suppose that, while these or any other kinds of clouds are overhead, there comes along either a very cold wind or a wind full of vapor. As it passes through the clouds it makes them very full
 5 of water, for, if it chills them, it makes the water-dust draw more closely together; or, if it bring a new load of water-dust, the air is fuller than it can hold. In either case, water particles are set free, and our fairy force "cohesion" seizes upon them at once
 10 and forms them into large waterdrops. Then they are much heavier than the air, and so they can float no longer, but down they come to the earth in a shower of rain.

There are other ways in which the air may be
 15 chilled, and rain made to fall, as, for example, when a wind laden with moisture strikes against the cold tops of mountains. Thus the Khasia Hills in India, which face the Bay of Bengal, chill the air which crosses them on its way from the Indian Ocean.
 20 The wet winds are driven up the sides of the hills, the air expands, and the vapor is chilled, and, forming into drops, falls in torrents of rain. The country on the other side of these hills gets hardly any rain, for all the water has been taken out of the air before
 25 it comes there.

In this way, from different causes, the water of which the sun has robbed our rivers and seas comes back to us, after it has traveled to various parts of

the world, floating on the bosom of the air. But it does not always fall straight back into the rivers and seas again; a large part of it falls on the land, and has to trickle down slopes and into the earth, in order to get back to its natural home, and it is often ⁵ caught on its way before it can reach the great waters.

Go to any piece of ground which is left wild and untouched, you will find it covered with grass, weeds, and other plants: if you dig up a small plot, you will ¹⁰ find innumerable tiny roots creeping through the ground in every direction. Each of these roots has a spongelike mouth, by which the plant takes up water. Now, imagine raindrops falling on this plot of ground and sinking into the earth. On every side ¹⁵ they will find rootlets thirsting to drink them in, and they will be sucked up as if by tiny sponges, and drawn into the plants and up the stems to the leaves. Here they are worked up into food for the plants, and only if the leaf has more water than it needs, ²⁰ some drops may escape at the tiny openings under the leaf, and be drawn up again by the sun-waves as invisible vapor into the air.

Again, much of the rain falls on hard rock and stone, where it cannot sink in, and then it lies in ²⁵ pools till it is shaken apart again into vapor and carried off in the air. Nor is it idle here even before it is carried up to make clouds. We have to thank

this invisible vapor in the air for protecting us from the burning heat of the sun by day, and intolerable frost by night.

Let us for a moment imagine that we can see all
5 that we know exists between us and the sun. First, we have the fine ether across which the sunbeams travel, beating down upon our earth with immense force, so that in the sandy desert they are like a burning fire. Then we have the coarser atmosphere
10 of oxygen and nitrogen atoms hanging in this ether and bending the minute sun-waves out of their direct path. But they do very little to hinder them on their way, and this is why in very dry countries the sun's heat is so intense. The rays beat down merci-
15 lessly, and nothing opposes them. Lastly, in damp countries, we have the larger but still invisible particles of vapor hanging about among the air atoms. Now, these watery particles, although they are very few — only about one twenty-fifth part of the whole
20 atmosphere — do hinder the sun-waves. For they are very greedy of heat, and, though the light-waves pass easily through them, they catch the heat-waves and use them to help themselves to expand. And so, when there is invisible vapor in the air, the sun-
25 beams come to us deprived of some of their heat-waves, and we can remain in the sunshine without suffering from the heat.

This is how the water vapor shields us by day, but

by night it is still more useful. During the day our earth and the air near it have been storing up the heat which has been poured down on them, and at night when the sun goes down all this heat begins to escape again. Now, if there were no vapor in the 5 air, this heat would rush back into space so rapidly that the ground would become cold and frozen, even on a summer's night, and all but the most hardy plants would die. But the vapor, which formed a veil against the sun in the day, now forms a still 10 more powerful veil against the escape of the heat by night. It shuts in the heat-waves, and only allows them to make their way slowly upwards from the earth — thus producing for us the soft, balmy nights of summer and preventing all life being destroyed in 15 the winter.

Ēx pënd'ī tūre: laying out; spending. **Cō hē'sion(zhūn)**: the law of nature by which the particles of a body are held together. **K'hā'siā Hills**. **Ē'thēr**: a medium in all space, through which light and heat pass readily.

Flower in the crannied wall,
 I pluck you out of the crannies,
 I hold you here, root and all, in my hand,
 Little flower — but if I could understand 20
 What you are, root and all, and all in all,
 I should know what God and man is.

— ALFRED, LORD TENNYSON

A Rill from the Town Pump

BY NATHANIEL HAWTHORNE

Nathaniel Hawthorne (1804-1864): The greatest of American novelists. His principal works are "The Scarlet Letter," "The Marble Faun," and "The House of the Seven Gables." Hawthorne also wrote many sketches and tales, and several volumes of stories for children. The best of these are "Grandfather's Chair," tales from New England history, and "Tanglewood Tales" and "The Wonder Book," two volumes of stories from Greek mythology.

"A Rill from the Town Pump" is one of the sketches in the volume entitled "Twice-Told Tales."

(SCENE: *The corner of two principal streets, the Town Pump talking through its nose.*)

Noon by the north clock! Noon by the east!
 High noon, too, by these hot sunbeams, which fall,
 5 scarcely aslope, upon my head and almost make the
 water bubble and smoke in the trough under my
 nose. Truly, we public characters have a tough
 time of it! And among all the town officers chosen
 at March meeting, where is he that sustains for a
 10 single year the burden of such manifold duties as are
 imposed upon the town pump?

The title of "town treasurer" is rightfully mine,
 as guardian of the best treasure that the town has.
 The overseers of the poor ought to make me their
 15 chairman, since I provide bountifully for the pauper

without expense to him that pays taxes. I am at the head of the fire department and one of the physicians to the board of health. As a keeper of the peace, all water drinkers will confess me equal to the constable. I perform some of the duties of the town clerk by promulgating public notices when they are posted on my front.

To speak within bounds, I am the chief person of the municipality, and exhibit, moreover, an admirable pattern to my brother officers by the cool, steady, upright, downright, and impartial discharge of my business and the constancy with which I stand to my post. Summer or winter, nobody seeks me in vain, for all day long I am seen at the busiest corner, just above the market, stretching out my arms to rich and poor alike, and at night I hold a lantern over my head, both to show where I am and keep people out of the gutters. At this sultry noontide I am cup-bearer to the parched populace, for whose benefit an iron goblet is chained to my waist. Like a dram-seller on the mall at muster-day, I cry aloud to all and sundry in my plainest accents and at the very tip-top of my voice.

Here it is, gentlemen! Here is the good liquor! Walk up, walk up, gentlemen! Walk up, walk up! Here is the superior stuff! Here is the unadulterated ale of Father Adam — better than strong beer, or wine of any price; here it is by the hogshead or

the single glass, and not a cent to pay! Walk up, gentlemen, walk up, and help yourselves!

It were a pity if all this outcry should draw no customers. Here they come. — A hot day, gentlemen! Quaff and away again, so as to keep yourselves in a nice cool sweat. — You, my friend, will need another cupful to wash the dust out of your throat, if it be as thick there as it is on your cowhide shoes. I see that you have trudged half a score of miles to-day, and like a wise man have passed by the taverns and stopped at the running brooks and well-curbs. Otherwise, betwixt heat without and fire within, you would have been burned to a cinder or melted down to nothing at all, in the fashion of
15 a jellyfish.

Who next? — Oh, my little friend, you are let loose from school and come hither to scrub your blooming face and drown the memory of certain taps of the ferule, and other schoolboy troubles, in a draught from the town pump? Take it, pure as the
20 current of your young life. Take it, and may your heart and tongue never be scorched with a fiercer thirst than now! There, my dear child! put down the cup and yield your place to this elderly gentleman who treads so tenderly over the paving stones that I suspect he is afraid of breaking them. What! he limps by without so much as thanking me, as if my hospitable offers were meant only for people who

have no wine-cellars. — Well, well, sir, no harm done, I hope? Go draw the cork, tip the decanter; but when your great toe shall set you a-roaring, it will be no affair of mine. If gentlemen love the pleasant titillation of the gout, it is all one to the town pump. This thirsty dog with his red tongue lolling out does not scorn my hospitality, but stands on his hind legs and laps eagerly out of the trough. See how lightly he capers away again! Jowler, did your worship ever have the gout? 10

Are you all satisfied? Then wipe your mouths, my good friends, and while my spout has a moment's leisure I will delight the town with a few historical reminiscences. In far antiquity, beneath a darksome shadow of venerable boughs, a spring bubbled out of the leaf-strewn earth in the very spot where you now behold me on the sunny pavement. The water was as bright and clear and deemed as precious as liquid diamonds. The Indian sagamores drank of it from time immemorial, till the fatal deluge of the fire water burst upon the red men and swept their whole race away from the cold fountains. 20

Endicott and his followers came next, and often knelt down to drink, dipping their long beards in the spring. The richest goblet then was of birch-bark. Governor Winthrop, after a journey afoot from Boston, drank here out of the hollow of his hand. The elder Higginson here wet his palm and laid it on

the brow of the first town-born child. For many years it was the watering-place, and, as it were, the washbowl, of the vicinity, whither all decent folks resorted to purify their visages and gaze at them
 5 afterward — at least, the pretty maidens did — in the mirror which it made. On Sabbath days, whenever a babe was to be baptized, the sexton filled his basin here and placed it on the communion table of the humble meeting-house, which partly covered the
 10 site of yonder brick one.

Thus one generation after another was consecrated to Heaven by its waters, and cast their waxing and waning shadows into its glassy bosom, and vanished from the earth, as if mortal life were but a flitting
 15 image in a fountain. Finally, the fountain vanished also. Cellars were dug on all sides and cart loads of gravel flung upon its source, whence oozed a turbid stream, forming a mud-puddle at the corner of two streets. In the hot months, when its refreshment
 20 was most needed, the dust flew in clouds over the forgotten birthplace of the waters, now their grave. But in the course of time a town pump was sunk into the source of the ancient spring; and when the first decayed, another took its place, and then
 25 another, and still another, till here stand I, gentlemen and ladies, to serve you with my iron goblet. Drink and be refreshed. The water is as pure and cold as that which slaked the thirst of the red saga-

The Town Pump

more beneath the aged boughs, though now the gem of the wilderness is treasured under these hot stones, where no shadow falls but from the brick buildings. And be it the moral of my story that, as this wasted
 5 and long-lost fountain is now known and prized again, so shall the virtues of cold water — too little valued since your fathers' days — be recognized by all.

Your pardon, good people! I must interrupt my stream of eloquence and spout forth a stream of
 10 water to replenish the trough for this teamster and his two yoke of oxen, who have come from Topsfield, or somewhere along that way. No part of my business is pleasanter than the watering of cattle. Look! how rapidly they lower the water-mark on
 15 the sides of the trough, till their capacious stomachs are moistened with a gallon or two apiece, and they can afford time to breathe it in with sighs of calm enjoyment. Now they roll their quiet eyes around the brim of their monstrous drinking vessel. An ox
 20 is your true toper.

One o'clock! Nay, then, if the dinner-bell begins to speak, I may as well hold my peace. Here comes a pretty young girl of my acquaintance with a large stone pitcher for me to fill. May she draw a hus-
 25 band while drawing her water, as Rachel did of old! — Hold out your vessel, my dear! There it is, full to the brim; so now run home, peeping at your sweet image in the pitcher as you go, and forget not

in a glass of my own liquor to drink "success to the town pump."

Two principal streets: Essex and Washington streets in Hawthorne's home, Salem, Massachusetts. **Prô mûl'gât'ing:** publishing; making known. **Mû nîq' I pâl'î tỹ:** a town having local government. **Mâl:** public walk. **Sûn'dry:** several; *all and sundry*, all together and each separately. **Tít il-lā'tion (shûn):** tickling. **Săg'a mōrē:** Indian chiefs. **Fire water:** the Indian name for whisky. **Ēn'dī cōtt, Wîn'thrōp, Hig'gîn-sōn:** men of prominence in Massachusetts in early colonial days. **Târ'bid:** muddy.

Daffodils

BY WILLIAM WORDSWORTH

William Wordsworth (1770–1850): An English poet. He claimed that the art of poetry should be brought back to nature by making the ordinary topics of daily life its subjects and by employing the language "really used by men." His early poems were ridiculed and censured, but he was finally recognized as the greatest poet of his time. He wrote "The Excursion," "The Prelude," "Laodamia," "Ode on Intimations of Immortality," and many shorter poems.

I wandered lonely as a cloud
 That floats on high o'er vales and hills,
 When all at once I saw a crowd,
 A host of golden daffodils;
 Beside the lake, beneath the trees,
 Fluttering and dancing in the breeze.

Continuous as the stars that shine
 And twinkle on the Milky Way,
 They stretched in never-ending line
 Along the margin of a bay :

5 Ten thousand saw I at a glance,
 Tossing their heads in sprightly dance.

The waves beside them danced, but they
 Outdid the sparkling waves in glee :

A poet could not but be gay,
 10 In such a jocund company ;
 I gazed and gazed, — but little thought
 What wealth the show to me had brought.

For oft when on my couch I lie
 In vacant or in pensive mood,
 15 They flash upon that inward eye
 Which is the bliss of solitude,
 And then my heart with pleasure fills,
 And dances with the daffodils.

Milky Way : the bright belt which is seen at night stretching across the sky. It is composed of stars so far and so blended as to be distinguishable only with the telescope. **Joc'** and : merry ; gay.

The primal duties shine aloft, like stars ;
 20 The charities that soothe and heal and bless
 Are scattered at the feet of man like flowers.

— WILLIAM WORDSWORTH

The Capture of Ticonderoga

BY ETHAN ALLEN

Ethan Allen (1742–1789): An officer of the Revolutionary War, the leader of the famous Vermont soldiers called the “Green Mountain Boys.” He was made prisoner by the English in 1775; after remaining in captivity two years and a half, he was exchanged for an English officer. He wrote a narrative of his captivity and some political papers.

The first systematical and bloody attempt at Lexington to enslave America thoroughly electrified my mind and fully determined me to take part with my country. And while I was wishing for an opportunity to signalize myself in its behalf, directions were privately sent to me from the then colony — now state — of Connecticut, to raise the Green Mountain Boys, and, if possible, with them to surprise and take the fortress of Ticonderoga.

This enterprise I cheerfully undertook; and, after first guarding all the several passes that led thither, to cut off all intelligence between the garrison and the country, made a forced march from Bennington, and arrived at the lake opposite to Ticonderoga on the evening of the 9th day of May, 1775, with two hundred and thirty valiant Green Mountain Boys; and it was with the utmost difficulty that I procured boats to cross the lake.

However, I landed eighty-three men near the garrison and sent the boats back for the rear-guard,

commanded by Colonel Seth Warner; but the day began to dawn, and I found myself under the necessity to attack the fort before the rear could cross the lake; and, as it was viewed hazardous, I harangued
5 the officers and soldiers in the manner following:—

“Friends and fellow-soldiers: You have, for a number of years past, been a scourge and terror to arbitrary power. Your valor has been famed abroad and acknowledged, as appears by the advice and
10 orders to me from the general assembly of Connecticut, to surprise and take the garrison now before us. I now propose to advance before you and in person conduct you through the wicket-gate; for we must this morning either quit our pretensions to
15 valor or possess ourselves of this fortress in a few minutes; and, inasmuch as it is a desperate attempt, which none but the bravest of men dare undertake, I do not urge it on any contrary to his will. You that will undertake voluntarily, poise your firelocks.”

20 The men being at this time drawn up in three ranks, each poised his firelock. I ordered them to face to the right, and, at the head of the center file, marched them immediately to the wicket-gate aforesaid, where I found a sentry posted who instantly
25 snapped his fusee at me. I ran immediately toward him, and he retreated through the covered way into the parade within the garrison, gave a halloo, and ran under a bomb-proof. My party, who followed me

into the fort, I formed on the parade in such manner as to face the two barracks, which faced each other.

The garrison, being asleep, except the sentries, we gave three huzzas, which greatly surprised them. One of the sentries made a pass at one of my officers with a charged bayonet and slightly wounded him. My first thought was to kill him with my sword; but, in an instant, I altered the design and fury of the blow to a slight cut on the side of the head, upon which he dropped his gun and asked quarter, which I readily granted him, and demanded of him the place where the commanding officer slept.

He showed me a pair of stairs in the front of the barrack, on the west part of the garrison, which led up to a second story in said barrack, to which I immediately repaired, and ordered the commander, Captain de la Place, to come forth instantly or I would sacrifice the whole garrison; at which the captain came immediately to the door, when I ordered him to deliver me the fort instantly. He asked me by what authority I demanded it; I answered him, "In the name of the Great Jehovah and the Continental Congress."

The authority of the Congress being very little known at that time, he began to speak again; but I interrupted him, and with my drawn sword over his head, again demanded an immediate surrender of the garrison; with which he then complied and ordered

his men to be forthwith paraded without arms, as he had given up the garrison. In the meantime, some of my officers had given orders, and in consequence thereof, sundry of the barrack doors were beat down
5 and about one-third of the garrison imprisoned.

This surprise was carried into execution in the gray of the morning of the 10th day of May, 1775. The sun seemed to rise that morning with a superior luster; and Ticonderoga and its dependencies smiled on
10 its conquerors.

Hāz'ard ōŭs: dangerous; daring. **Hā rānguēd'**: addressed; made a speech to. **Ār'bī trā rŷ**: bound by no law; possessing and abusing unlimited power. **Fire'lōck, fū sēe'**: old-fashioned guns. **Pā rāde'**: ground where troops are drilled.

To a Waterfowl

BY W. C. BRYANT

William Cullen Bryant (1794-1878): The first American poet of note, and the one whose works show most loving appreciation of nature. His finest poem is "Thanatopsis," written when he was only eighteen. "The Death of the Flowers," "The Forest Hymn," "To a Waterfowl," and "To the Fringed Gentian" are the best of his poems descriptive of nature.

Whither, midst falling dew,

While glow the heavens with the last steps of day,
Far, through their rosy depths, dost thou pursue
Thy solitary way?

Vainly the fowler's eye

Might mark thy distant flight to do thee wrong,
As, darkly painted on the crimson sky,
Thy figure floats along.

Seek'st thou the plashy brink

5

Of weedy lake, or marge of river wide,
Or where the rocking billows rise and sink
On the chafed ocean side ?

There is a Power whose care

Teaches thy way along that pathless coast — 10
The desert and illimitable air —
Lone wandering, but not lost.

All day thy wings have fanned,

At that far height, the cold, thin atmosphere,
Yet stoop not, weary, to the welcome land, 15
Though the dark night is near.

And soon that toil shall end ;

Soon shalt thou find a summer home and rest,
And scream among thy fellows ; reeds shall bend,
Soon, o'er thy sheltered nest. 20

Thou'rt gone, the abyss of heaven

Hath swallowed up thy form ; yet, on my heart
Deeply hath sunk the lesson thou hast given,
And shall not soon depart.

He who, from zone to zone,
 Guides through the boundless sky thy certain flight,
 In the long way that I must tread alone,
 Will lead my steps aright.

Plāsh'y: watery. **Mārge**: a poetical form of the word margin. **Ũ Hm'it a ble**: boundless.

Gulliver in Lilliput

BY JONATHAN SWIFT

Dean Swift

Jonathan Swift (1667-1745): An English prose writer, one of the most celebrated and most unlovable men of his age. He wrote satires on personal, political, and religious subjects. His best-known works are "Gulliver's Travels," "The Tale of a Tub," "The Battle of Books," and "Drapier's Letters."

"Gulliver's Travels," aside from its satire, is for children a charming story of pygmies and

giants. It narrates the adventures of a ship's surgeon on four voyages: first, to the country of Lilliput where everything is diminutive; second, to Brobdingnag where everything is

gigantic; third, to the flying island of Laputa and to the Academy of Lagado; fourth, to the country of the Yahoos.

This selection describes some of Gulliver's experiences among the Lilliputians.

I

I lay down on the grass, which was very short and soft, where I slept sounder than ever I remembered to have done in my life, and, as I reckoned, above nine hours; for when I awaked it was just daylight. I attempted to rise, but was not able to stir; for, as I happened to lie on my back, I found my arms and legs were strongly fastened on each side to the ground; and my hair, which was long and thick, tied down in the same manner.

I likewise felt several slender ligatures across my 10 body, from my armpits to my thighs. I could only look upward; the sun began to grow hot, and the light offended mine eyes. I heard a confused noise about me, but in the posture I lay could see nothing except the sky. 15

In a little time I felt something alive moving on my left leg, which, advancing gently forward over my breast, came almost up to my chin. Bending mine eyes downward as much as I could, I perceived it to be a human creature not six inches high, with a 20 bow and arrow in his hands and a quiver at his back. In the meantime I felt at least forty more of the same kind — as I conjectured — following the first.

I was in the utmost astonishment, and roared so loud that they all ran back in a fright; and some of them, as I was afterward told, were hurt by the falls they got by leaping from my sides upon the
 5 ground. However, they soon returned, and one of them who ventured so far as to get a full sight of my face, lifting up his hands and eyes by way of admiration cried out in a shrill but distinct voice, "Hek-
 inah Degul." The others repeated the same words
 10 several times, but I then knew not what they meant.

I lay all this while, as the reader may believe, in great uneasiness. At length, struggling to get loose, I had the fortune to break the strings and wrench
 15 out the pegs that fastened my left arm to the ground. By lifting it up to my face I discovered the methods they had taken to bind me. At the same time, with a violent pull, which gave me excessive pain, I a little loosened the strings that tied
 20 down my hair on the left side, till I was just able to turn my head about two inches.

But the creatures ran off a second time before I could seize them; whereupon there was a great shout in a very shrill accent, and after it had ceased
 25 I heard one of them cry aloud, "Tolgo Phonac." In an instant I felt about a hundred arrows discharged on my left hand, which pricked me like so many needles; and besides, they shot another flight into

the air, as we do bombs in Europe, whereof many, I suppose, fell on my body—though I felt them not—and some on my face, which I immediately covered with my left hand.

When this shower of arrows was over, I fell ⁵ a-groaning with grief and pain, and then, striving again to get loose, they discharged another volley, larger than the first, and some of them attempted with spears to stick me in the sides; but by good luck I had on me a buff jerkin, which they could not ¹⁰ pierce. I thought it the most prudent method to lie still, and my design was to continue so till night, when, my left hand being already loose, I could easily free myself; and as for the inhabitants, I had reason to believe I might be a match for the greatest ¹⁵ army they could bring against me, if they were all of the same size with him that I saw. But fortune disposed otherwise of me.

When the people observed I was quiet, they discharged no more arrows; but by the noise I heard ²⁰ I knew their numbers increased. About four yards from me, over against my right ear, I heard a knocking for about an hour, like that of people at work. Turning my head that way, as well as the pegs and strings would permit me, I saw a stage erected about ²⁵ a foot and a half from the ground, capable of holding four of the inhabitants, with two or three ladders to mount it; from whence one of them, who seemed

to be a person of quality, made me a long speech whereof I understood not one syllable.

But I should have mentioned that before the principal person began his oration he cried out three
 5 times, "Langro Dehul san;" these words and the former were afterward repeated and explained to me. Whereupon immediately about fifty of the inhabitants came and cut the strings that fastened the right side of my head. This gave me the liberty
 10 of turning it to the right and of observing the person and gesture of him that was to speak.

He appeared to me to be of a middle age and taller than any of the other three who attended him, whereof one was a page that held up his train, and
 15 seemed to be somewhat longer than my middle finger. The other two stood one on each side to support him. He acted every part of an orator, and I could observe many periods of threatenings and others of promises, pity, and kindness.

20 I answered in a few words, but in the most submissive manner, lifting up my left hand and both mine eyes to the sun, as calling him for a witness; and being almost famished with hunger, not having eaten a morsel for some hours before I left the ship, I
 25 found the demand of nature so strong upon me that I could not forbear showing my impatience — perhaps against the strict rules of decency — by putting my finger frequently on my mouth, to signify that I wanted food.

The hurgo — for so they call a great lord, as I afterward learned — understood me very well. He descended from the stage and commanded that several ladders should be applied to my sides, on which above a hundred of the inhabitants mounted, and ⁵ walked toward my mouth, laden with baskets full of meat, which had been provided and sent thither by the king's orders upon the first news he received of me.

I observed there was the flesh of several animals, but could not distinguish them by the taste. There ¹⁰ were shoulders, legs, and loins, shaped like those of mutton, and very well dressed, but smaller than the wings of a lark. I ate them by two or three at a mouthful, and took three loaves at a time, about the bigness of musket bullets. They supplied me ^{as} ¹⁵ they could, showing a thousand marks of wonder and astonishment at my bulk and appetite.

I then made another sign that I wanted drink. They found by my eating that a small quantity would not suffice me; and, being a most ingenious ²⁰ people, they slung up, with great dexterity, one of their largest hogsheads, and then rolled it toward my hand and beat out the top. I drank it off at a draught, which I might well do, for it did not hold half a pint, and tasted like a small wine of Burgundy, ²⁵ but much more delicious. They brought me a second hogshead, which I drank in the same manner, and made signs for more; but they had none to give me.

When I had performed these wonders, they shouted for joy and danced upon my breast, repeating several times as they did at first, "Hekinah Degul." They made me signs that I should throw
 5 down the two hogsheads, but first warning the people below to stand out of the way, crying aloud, "Borach Mivolah." When they saw the vessels in the air there was an universal shout of "Hekinah Degul."

I confess I was often tempted, while they were
 10 passing backward and forward on my body, to seize forty or fifty of the first that came in my reach and dash them against the ground. But remembrance of what I had felt, which probably might not be the worst they could do, and the promise of honor I
 15 had made them—so I interpreted my submissive behavior—soon drove out these imaginations. Besides, I now considered myself as bound by the laws of hospitality to a people who had treated me with so much expense and magnificence.

20 However, in my thoughts, I could not sufficiently wonder at the courage of these diminutive mortals who durst venture to mount and walk upon my body while one of my hands was at liberty, without trembling at the very sight of so prodigious a creature as
 25 I must appear to them. After some time, when they observed that I made no more demands for meat, there appeared before me a person of high rank from his imperial majesty. His excellency, having

mounted on the small of my right leg, advanced forward up to my face with about a dozen of his retinue, and producing his credentials under the signet royal, which he applied close to mine eyes, he spoke about ten minutes without any sign of anger, 5 but with a kind of determinate resolution. He often pointed forward, which as I afterward found was toward the capital city about half a mile away, whither it was agreed by his majesty in council that I must be conveyed. 10

I answered in few words, but to no purpose, and made a sign with my hand that was loose, putting it to the other — but over his excellency's head for fear of hurting him or his train — and then to my own head and body, to signify that I desired my liberty. 15

It appeared that he understood me well enough, for he shook his head by way of disapprobation, and held his hand in a posture to show that I must be carried as a prisoner. However, he made other signs to let me understand that I should have meat and 20 drink enough and very good treatment.

Whereupon I once more thought of breaking my bonds; but again when I felt the smart of their arrows upon my face and hands, which were all in blisters, and many of the darts still sticking in them, 25 and observing likewise that the number of my enemies increased, I gave tokens to let them know that they might do with me what they pleased.

Upon this, the hurgo and his train withdrew with much civility and cheerful countenances.

Soon after I heard a general shout, with frequent cries of "Peplom Selan ;" and I felt great numbers
5 of the people on my left side relaxing the cords to such a degree that I was able to turn upon my right and so ease myself.

But before this they had daubed my face and both my hands with a sort of ointment, very pleasant to
10 the smell, which in a few minutes removed all the smart of their arrows. These things, added to the refreshment I had received by their victuals and drink, which were very nourishing, disposed me to sleep. I slept about eight hours, as I was afterward
15 assured. It was no wonder, for the doctors, by the emperor's orders, had mingled a sleeping draught in the hogsheads of wine.

II

Gulliver was carried prisoner to the capital of Lilliput. At first he was kept prisoner, but he gained favor by his mild disposition, and finally had liberty granted him upon certain conditions. War breaking out between Lilliput and an adjoining empire, Gulliver had opportunity of being useful to his friends.

The empire of Blefuscu is an island situated to the north-northeast side of Lilliput, from which it is
20 parted only by a channel of eight hundred yards wide.

I had not yet seen it, and, upon notice of an intended invasion, I avoided appearing on that side of the coast, for fear of being discovered by some of the enemy's ships, who had received no intelligence of me, all intercourse between the two empires having 5 been strictly forbidden during the war upon pain of death and an embargo laid by our emperor upon all vessels whatsoever.

I communicated to his majesty a project I had formed of seizing the enemy's whole fleet; which, 10 as our scouts assured us, lay at anchor in the harbor, ready to sail with the first fair wind. I consulted the most experienced seamen upon the depth of the channel, which they had often plumbed, who told me that in the middle at high water it was seventy glum- 15 gluffs deep, which is about six feet of European measure; and the rest of it fifty glumgluffs at most.

I walked toward the northeast coast over against Blefuscu, and, lying down behind a hillock, I took out my small pocket perspective-glass and viewed the 20 enemy's fleet at anchor, consisting of about fifty men-of-war and a great number of transports. I then came back to my house and gave order—for which I had a warrant—for a great quantity of the strongest cable and bars of iron. The cable was about 25 as thick as pack-thread, and the bars of the length and size of a knitting needle.

I trebled the cable to make it stronger, and for the

same reason I twisted three of the iron bars together, bending the extremities into a hook. Having thus fixed fifty hooks to as many cables, I went back to the northeast coast, and putting off my coat, shoes, 5 and stockings, walked into the sea in my leathern jerkin, about half an hour before high water. I waded with what haste I could, and swam in the middle about thirty yards, till I felt ground.

I arrived to the fleet in less than half an hour. 10 The enemy were so frightened when they saw me that they leaped out of their ships and swam to shore, where there could not be fewer than thirty thousand souls. I then took my tackling, and fastening a hook to the hole at the prow of each, I tied all 15 the cords together at the end.

While I was thus employed the enemy discharged several thousand arrows, many of which stuck in my hands and face ; and, besides the excessive smart, gave me much disturbance in my work. My greatest 20 apprehension was for mine eyes, which I should have infallibly lost if I had not suddenly thought of an expedient.

I kept, among other little necessities, a pair of spectacles in a private pocket, which had escaped 25 the emperor's searchers. These I took out and fastened as strongly as I could upon my nose, and, thus armed, went on boldly with my work, in spite of the enemy's arrows, many of which struck against

the glasses of my spectacles, but without any other effect farther than a little to discompose them.

I had now fastened all the hooks, and taking the knot in my hand, began to pull; but not a ship would stir, for they were all too fast held by their 5 anchors, so that the boldest part of my enterprise remained. I therefore let go the cord, and leaving the hooks fixed to the ships, I resolutely cut with my knife the cables that fastened the anchors, receiving above two hundred arrows in my face and hands. 10 Then I took up the knotted end of the cables to which my hooks were tied, and with great ease drew fifty of the enemy's largest men-of-war after me.

The Blefuscudians, who had not the least imagination of what I intended, were at first confounded 15 with astonishment. They had seen me cut the cables and thought my design was only to let the ships run adrift, or fall foul on each other. But when they perceived the whole fleet moving in order, and saw me pulling at the end, they set up such a 20 scream of grief and despair as it is almost impossible to describe or conceive.

When I had got out of danger, I stopped awhile to pick out the arrows that stuck in my hands and face, and rubbed on some of the ointment that was given 25 me at my first arrival, as I have formerly mentioned. I then took off my spectacles, and waiting about an hour, till the tide was a little fallen, I

"I came in a short time within hearing."

waded through the middle with my cargo, and arrived safe at the royal port of Lilliput.

The emperor and his whole court stood on the shore, expecting the issue of this great adventure. They saw the ships move forward in a large half moon, but could not discern me who was up to my breast in water. When I advanced to the middle of the channel, they were yet more in pain, because I was under water to my neck. The emperor concluded me to be drowned and that the enemy's fleet¹⁰ was approaching in a hostile manner.

But he was soon eased of his fears; for the channel growing shallower every step I made, I came in a short time within hearing, and holding up the end of the cable by which the fleet was fastened, I cried¹⁵ in a loud voice, "Long live the most puissant Emperor of Lilliput!" This great prince received me at my landing with all possible encomiums and created me a nardac upon the spot, which is the highest title of honor among them. 20

I. **Llg'a tûreş**: bands. **Pē'ri ôdş**: sentences. **Dēx tēr'ī tŷ**: skill; cleverness. **Īm āg ī nā'tions (shūns)**: purposes; ideas; fancies. **Prô dīg'ioūs**: huge; monstrous. **Rēt'ī nūe**: train of attendants. **Crē dēn'tials (shalş)**: letters of credit; testimonials showing that a person has a right to exercise official power. **Şig'nēt**: seal; sign. **Dē tēr'mī nâte**: fixed; positive.

II. **Īm bār'gō**: an order of government forbidding the departure of ships of commerce from certain ports. **Plūmbēd**: found

out the depth; sounded. **Ēx pē'dī ent**: means of overcoming a difficulty. **Hōs'tile**: warlike; unfriendly. **Pū'is sant**: powerful. **Ēn oō'mī ūmz**: high praise; strong commendation.

The Two Breaths

BY CHARLES KINGSLEY

Charles Kingsley (1819–1875): An English clergyman and author. Young people know him best from “Greek Heroes” and “Water Babies, a Fairy Tale for a Land Baby.” “Hypatia,” “Westward Ho,” “Alton Locke,” and “Yeast” are the most popular of his novels.

This selection is from “Health and Education,” a book of simple talks on hygienic and scientific subjects.

I wish to call this talk “The Two Breaths,” not merely “The Breath;” and for this reason: every time you breathe, you breathe two different breaths; you take in one, you give out another. The composition of those two breaths is different. Their effects are different. The breath which has been breathed out must not be breathed in again.

If you want to see how different the breath breathed out is from the breath taken in, you have only to try a somewhat cruel experiment, but one which people too often try upon themselves, their children, and their work-people. If you take any small animal with lungs like your own—a mouse, for instance—and force it to breathe no air but

what you have breathed already; if you put it in a close box, and while you take in breath from the outer air, send out your breath through a tube into that box, the animal will soon faint; if you go on long with this process, it will die. 5

Take a second instance: if you allow a child to get into the habit of sleeping with its head under the bedclothes, and thereby breathing its own breath over and over again, that child will assuredly grow pale, weak, and ill. 10

Take another instance, which is only too common: if you are in a crowded room, with plenty of fire and lights and company, doors and windows all shut tight, how often you feel faint—so faint, that you may require smelling-salts or some other stimulant. 15 The cause of your faintness is just the same as that of the mouse's fainting in the box: you and your friends, and as I shall show you presently, the fire and the candles likewise, having been all breathing each other's breaths, over and over again, till the air 20 has become unfit to support life. You are doing your best to enact over again the Highland tragedy, when at a Christmas meeting thirty-six persons danced all night in a small room with a low ceiling, keeping the doors and windows shut. The atmos- 25 phere of the room was noxious beyond description; and the effect was, that seven of the party were soon after seized with typhus fever, of which two died.

You are inflicting on yourselves the torments of the famous Black Hole of Calcutta; and, if there was no chimney in the room, by which some fresh air could enter, the candles would soon burn blue —
5 as the stories tell us they do when ghosts appear; your brains become disturbed; and you yourselves run the risk of becoming ghosts, and the candles of actually going out.

Of this last fact there is no doubt; for if, instead
10 of putting a mouse into the box, you will put a lighted candle, and breathe into the tube, as before, however gently, you will in a short time put the candle out.

Now, how is this? First, what is the difference
15 between the breath you take in and the breath you give out? And next, why has it a similar effect on animal life and a lighted candle?

The difference is this. The breath which you take in is, or ought to be, pure air, composed, on the
20 whole, of oxygen and nitrogen, with a minute portion of carbonic acid gas.

The breath which you give out is an impure air, to which has been added, among other matters which will not support life, an excess of carbonic acid gas.

25 That this is the fact you can prove for yourselves by a simple experiment. Get a little lime water at the chemist's, and breathe into it through a glass tube; your breath will at once make the lime water

milky. The carbonic acid gas of your breath has laid hold of the lime, and made it visible as white carbonate of lime, — in plain English, as common chalk.

Now, I do not wish to load your memories with scientific terms : but I beseech you to remember at least these two — oxygen gas and carbonic acid gas ; and to remember that, as surely as oxygen feeds the fire of life, so surely does carbonic acid put it out.

I say, “the fire of life.” In that expression lies the answer to our second question : Why does our breath produce a similar effect upon the mouse and the lighted candle ? Every one of us is, as it were, a living fire. Were we not, how could we be always warmer than the air outside us ? There is a process going on perpetually in each of us, similar to that by which coals are burned in a fire, oil in a lamp, wax in a candle, and the earth itself in a volcano. To keep each of those fires alight, oxygen is needed ; and the products of combustion, as they are called, are more or less the same in each case — carbonic acid gas and steam.

These facts justify the expression I just made use of, that the fire and the candles in the crowded room were breathing the same breath as you were. It is but too true. An average fire in the grate requires to keep it burning as much oxygen as several human beings do ; each candle or lamp must have its share of oxygen likewise, and that a very considerable one ;

and an average gas-burner — pray attend to this, you who live in rooms lighted with gas — consumes as much oxygen as several candles. All alike are making carbonic acid gas. The carbonic acid gas of the
 5 fire happily escapes up the chimney in the smoke; but the carbonic acid gas from the human beings and the candles remains to poison the room, unless it be ventilated.

Now, I think, we may see what ventilation means,
 10 and why it is needed.

Ventilation means simply letting out the foul air and letting in the fresh air; letting out the air which has been breathed by men or by candles, and letting in the air which has not. To understand how to do
 15 that, we must remember a most simple chemical law, that a gas as it is warmed expands and therefore becomes lighter; as it cools it contracts and becomes heavier.

Now the carbonic acid gas in the breath which
 20 comes out of our mouth is warm, lighter than the air, and rises to the ceiling; and therefore in any unventilated room full of people, there is a layer of foul air along the ceiling. You might soon test that for yourselves, if you could mount a ladder and put
 25 your heads there aloft. You do test it for yourselves when you sit in the galleries of churches and theaters, where the air is palpably more foul, and therefore more injurious, than down below.

The first question in ventilation, therefore, is to get this carbonic acid gas safe out of the room, while it is warm and light and close to the ceiling; for if you do not, this happens: — The carbonic acid gas cools and becomes heavier; for carbonic acid gas at the same temperature as common air is so much heavier than common air that you may actually — if you are handy enough — turn it from one vessel to another and pour out for your enemy a glass of invisible poison. So down to the floor this heavy carbonic acid gas comes, and lies along it, just as it lies often in the bottom of old wells, as a stratum of poison, killing occasionally the men who descend into it.

And now, what becomes of this breath which passes from your lips? Is it merely harmful, merely waste? God forbid! God has forbidden that anything should be merely harmful or merely waste in this so wise and well-made world. The carbonic acid gas which passes from your lips at every breath is a precious boon to thousands of things of which you have daily need. Indeed, there is a sort of hint at physical truth in the old fairy tale of the girl from whose lips, as she spoke, fell pearls and diamonds; for the carbonic acid gas of your breath may help hereafter to make the pure carbonate of lime of a pearl or the still purer carbon of a diamond.

Nay, it may go—in such a world of transformations do we live—to make atoms of coal strata which shall lie buried for ages beneath deep seas, shall be upheaved in continents which are yet unborn,
 5 and there be burned for the use of a future race of men, and resolved into their original elements. Coal, wise men tell us, is, on the whole, breath and sunlight; the breath of living creatures who have lived in the vast swamps and forests of some primeval
 10 world, and the sunlight which transmuted that breath into the leaves and stems of trees, magically locked up for ages in that black stone, to become, when it is burned at last, light and carbonic acid gas, as it was at first.

15 For though you must not breathe your breath again, you may at least eat your breath, if you will allow the sun to transmute it for you into vegetables; or you may enjoy its fragrance and its color in the shape of a lily or a rose. When you walk in
 20 a sunlit garden, every word you speak, every breath you breathe, is feeding the plants and flowers around. The delicate surface of the green leaves absorbs the carbonic acid gas and parts it into its elements, retaining the carbon to make woody fiber, and cour-
 25 teously returning you the oxygen to mingle with the fresh air and be inhaled by your lungs once more. Thus do you feed the plants, just as the plants feed you; while the great life-giving sun

feeds both; and the geranium standing in the sick child's window does not merely rejoice his eye and mind by its beauty and freshness but repays honestly the trouble spent on it: absorbing the breath which the child needs not, and giving to him the breath ⁵ which he needs.

Nox'tious (nők'shūs): hurtful; harmful; unwholesome. **Black Hole of Calcutta**: a cell in a fort at Calcutta into which one hundred and forty-six English prisoners were put; one hundred and twenty-three of whom died before morning from lack of air. **Ex ġess'** (ġk): undue amount; too much. **Cōm būs'tion** (chūn): state of burning. **Pāl'pā blý**: plainly; evidently. **Strā'tūm** (pl. *strata*): layer. **Trāns fōr mǎ'tions** (shūng): changes. **Trāns-mūt'ēd**: changed from one form or nature into another.

Psalm XCIII

The Lord reigneth; He is clothed with majesty;
The Lord is clothed with strength, wherewith He
hath girded Himself: the world also is stablished,
that it cannot be moved. 10

Thy throne is established of old: Thou art from everlasting.

The floods have lifted up, O Lord, the floods have lifted up their voice; the floods lift up their waves.

The Lord on high is mightier than the noise of ¹⁵ many waters, yea, than the mighty waves of the sea.

Thy testimonies are very sure: holiness becometh Thine house, O Lord, forever.

The Lady of Shalott

BY ALFRED, LORD TENNYSON

Lord Tennyson

Alfred, Lord Tennyson (1809–1892): An English poet, who was for more than thirty years poet-laureate. He wrote "The Princess," "Maud," "In Memoriam," "Idylls of the King," several dramatic poems, and many shorter poems.

"The Lady of Shalott" was suggested by a legend in Sir Thomas Malory's "Morte d'Arthur," a collection of old British legends about King Arthur

and his knights of the Round Table, which furnished Tennyson material for the poems composing the "Idylls of the King."

PART I

On either side the river lie
 Long fields of barley and of rye,
 That clothe the wold and meet the sky;
 And through the field the road runs by
 To many-towered Camelot;
 And up and down the people go,
 Gazing where the lilies blow

Round an island there below,
The island of Shalott.

Willows whiten, aspens quiver,
Little breezes dusk and shiver
Through the wave that runs forever 5
By the island in the river

Flowing down to Camelot.

Four gray walls and four gray towers
Overlook a space of flowers,
And the silent isle embowers 10
The Lady of Shalott.

By the margin, willow-veiled,
Slide the heavy barges trailed
By slow horses ; and unhailed
The shallop flitteth silken-sailed 15

Skimming down to Camelot ;
But who hath seen her wave her hand?
Or at the casement seen her stand?
Or is she known in all the land,

The Lady of Shalott? 20

Only reapers, reaping early
In among the bearded barley,
Hear a song that echoes cheerly
From the river winding clearly,

Down to towered Camelot : 25

And by the moon the reaper weary,
Piling sheaves in uplands airy,

Listening, whispers, "'Tis the fairy
Lady of Shalott."

PART II

There she weaves by night and day
A magic web with colors gay.
5 She has heard a whisper say,
A curse is on her if she stay
To look down to Camelot.
She knows not what the curse may be,
And so she weaveth steadily,
10 And little other care hath she,
The Lady of Shalott.

And moving through a mirror clear
That hangs before her all the year,
Shadows of the world appear.
15 There she sees the highway near
Winding down to Camelot:
There the river eddy whirls
And there the surly village churls,
And the red cloaks of market girls,
20 Pass onward from Shalott.

Sometimes a troop of damsels glad,
An abbot on an ambling pad,
Sometimes a curly shepherd lad,
Or long-haired page in crimson clad,
25 Goes by to towered Camelot:

And sometimes through the mirror blue
 The knights come riding two and two ;
 She hath no loyal knight and true,
 The Lady of Shalott.

But in her web she still delights 5
 To weave the mirror's magic sights,
 For often through the silent nights
 A funeral, with plumes and lights,
 And music, went to Camelot :
 Or when the moon was overhead, 10
 Came two young lovers lately wed :
 "I am half sick of shadows," said
 The Lady of Shalott.

PART III

A bowshot from her bower eaves,
 He rode between the barley sheaves, 15
 The sun came dazzling through the leaves
 And flamed upon the brazen greaves
 Of bold Sir Lancelot.
 A red-cross knight forever kneeled
 To a lady in his shield, 20
 That sparkled on the yellow field,
 Beside remote Shalott.

The gemmy bridle glittered free,
 Like to some branch of stars we see

Hung in the golden Galaxy.

The bridle bells rang merrily

As he rode down to Camelot:

And from his blazoned baldric slung

5 A mighty silver bugle hung,

And as he rode his armor rung,

Beside remote Shalott.

All in the blue unclouded weather

Thick-jeweled shone the saddle leather,

10 The helmet and the helmet feather

Burned like one burning flame together,

As he rode down to Camelot.

As often through the purple night,

Below the starry clusters bright,

15 Some bearded meteor, trailing light,

Moves over still Shalott.

His broad clear brow in sunlight glowed;

On burnished hooves his war-horse trode;

From underneath his helmet flowed

20 His coal-black curls as on he rode,

As he rode down to Camelot.

From the bank and from the river

He flashed into the crystal mirror,

"Tirra lirra," by the river

25 Sang Sir Lancelot.

She left the web, she left the loom,

She made three paces through the room,

"The curse is come upon me."

She saw the water lily bloom,
 She saw the helmet and the plume,
 She looked down to Camelot.
 Out flew the web and floated wide ;
 The mirror cracked from side to side :
 "The curse is come upon me," cried
 The Lady of Shalott.

PART IV

In the stormy east wind straining,
The pale yellow woods were waning,
The broad stream in his banks complaining,
Heavily the low sky raining

5 Over towered Camelot;
Down she came and found a boat
Beneath a willow left afloat,
And round about the prow she wrote,
 “The Lady of Shalott.”

10 And down the river’s dim expanse
Like some bold seer in a trance,
Seeing all his own mischance —
With a glassy countenance
 Did she look to Camelot.

15 And at the closing of the day
She loosed the chain, and down she lay;
The broad stream bore her far away,
 The Lady of Shalott.

20 Lying, robed in snowy white
That loosely flew to left and right —
The leaves upon her falling light —
Through the noises of the night
 She floated down to Camelot:
And as the boat-head wound along

The willowy hills and fields among,
 They heard her singing her last song,
 The Lady of Shalott.

Heard a carol, mournful, holy,
 Chanted loudly, chanted lowly, 5
 Till her blood was frozen slowly,
 And her eyes were darkened wholly,
 Turned to towered Camelot.

For ere she reached upon the tide
 The first house by the water side, 10
 Singing, in her song she died,
 The Lady of Shalott.

Under tower and balcony,
 By garden wall and gallery,
 A gleaming shape she floated by, 15
 Dead-pale between the houses high,
 Silent into Camelot.

Out upon the wharves they came,
 Knight and burgher, lord and dame,
 And round the prow they read her name, 20
 “The Lady of Shalott.”

Who is this? and what is here?
 And in the lighted palace near
 Died the sound of royal cheer;
 And they crossed themselves for fear, 25
 All the knights at Camelot:

But Lancelot mused a little space;
 He said, "She has a lovely face;
 God in His mercy lend her grace,
 The Lady of Shalott."

Wôld: plain; low hill. **Shâl'lôp**: boat. **Chê'er'lŷ**: cheerily. **Chârls**: rough, ill-bred men; laborers. **Păd**: an easy-paced horse. **Grêaves**: armor for the leg below the knee. **Sir Lân'ce lôt**: the most famous of the knights of King Arthur's Round Table. **Red-cross Knight**: St. George, the patron saint of England. **Gēm'mŷ**: ornamented with gems. **Cām'ê lôt**: a legendary town in Winchester, England, the seat of King Arthur's palace. **Gāl'ăx ŷ**: the Milky Way. See definition on page 40. **Blă'zoned**: emblazoned; adorned with a coat of arms. **Sê'er**: prophet.

The Fall of the Leaf

BY M. R. MITFORD .

Mary Russell Mitford (1786-1855): An English author. Her most important work is "Our Village," a collection of sketches of English village life, the plan of which was suggested to her by Irving's "Sketch-Book." Miss Mitford also wrote several plays, tales in verse, a novel and a volume of literary recollections.

This selection from "Our Village" describes a November walk.

5 The weather is as peaceful to-day, as calm, and as mild, as in early April; and perhaps an autumn afternoon and a spring morning do resemble each

other more in feeling, and even in appearance, than any two periods of the year. There is in both the same freshness and dewiness of the herbage; the same balmy softness in the air; and the same pure and lovely blue sky, with white fleecy clouds floating across it. The chief difference lies in the absence of flowers, and the presence of leaves. But then the foliage of November is so rich and glowing and varied that it may well supply the place of the gay blossoms of the spring; while all the flowers of the field or garden could never make amends for the want of leaves—that beautiful and graceful attire in which nature has clothed the rugged forms of trees—the verdant drapery to which the landscape owes its loveliness and the forests their glory. 15

If choice must be between two seasons, each so full of charm, it is at least no bad philosophy to prefer the present good, even while looking gratefully back, and hopefully forward, to the past and the future. And of a surety, no fairer specimen of a November day could well be found than this, a day made to wander

“By yellow commons and birch-shaded hollows,
And hedgerows bordering unfrequented lanes;”

nor could a prettier country be found for our walk than this shady and yet sunny Berkshire, where the scenery, without rising into grandeur or breaking

into wildness, is so peaceful, so cheerful, so varied, and so thoroughly English.

We must bend our steps toward the water side, for I have a message to leave at Farmer Riley's; 5 and sooth to say it is no unpleasant necessity; for the road thither is smooth and dry, retired, as one likes a country walk to be, but not too lonely, which women never like; leading past the Loddon—the bright, brimming, transparent Loddon—a fitting 10 mirror for this bright blue sky, and terminating at one of the prettiest and most comfortable farm-houses in the neighborhood.

How beautiful the lane is to-day, decorated with a thousand colors! The brown road, and the rich 15 verdure that borders it, strewed with the pale yellow leaves of the elm, just beginning to fall, hedgerows glowing with long wreaths of the bramble in every variety of purplish red; and overhead the unchanged green of the fir, contrasting with the spotted sycamore, the tawny beech, and the dry, sere leaves of 20 the oak, which rustle as the light wind passes through them; a few common hardy yellow flowers—for yellow is the common color of flowers, whether wild or cultivated, as blue is the rare one—flowers 25 of many sorts, but almost of one tint, still blowing in spite of the season, and ruddy berries glowing through all. How very beautiful is the lane!

And how pleasant is this hill where the road

widens, with the group of cattle by the wayside, and George Hearn, the little post-boy, trundling his hoop at full speed, making all the better haste in his work, because he cheats himself into thinking it play! And how beautiful, again, is this patch of s common at the hilltop with the clear pool, where Martha Pither's children, elves of three and four and five years old, without any distinction of sex in their sunburnt faces and tattered drapery, are dipping up water in their little homely cups, shining 10 with cleanliness, and a small, brown pitcher with the lip broken, to fill that great kettle, which, when it is filled, their united strength will never be able to lift! They are quite a group for a painter, with their rosy cheeks and chubby hands and round, 15 merry faces; and the low cottage in the background, peeping out of its vine leaves and china roses, with Martha at the door, tidy and comely and smiling, preparing the potatoes for the pot, and watching the progress of dipping and filling that useful utensil, 20 completes the picture.

But we must get on. No time for more sketches in these short days. It is getting cold, too. We must proceed in our walk. Dash is showing us the way, and beating the thick double hedgerow that 25 runs along the side of the meadows at a rate that indicates game astir, and causes the leaves to fly as fast as an east wind after a hard frost. Ah, a

pheasant ! a superb cock pheasant ! Nothing is more certain than Dash's questing, whether in a hedgerow or covert, for a better spaniel never went into the field ; but I fancied that it was a hare afoot, and was
 5 almost as much startled to hear the whirring of those splendid wings, as the princely bird himself would have been at the report of a gun. Indeed, I believe that the way in which a pheasant goes off does sometimes make young sportsmen a little nervous — they
 10 don't own it very readily, but the observation may be relied on, nevertheless, — until they get, as it were, broken in to the sound ; and then that grand and sudden burst of wing becomes as pleasant to them as it seems to be to Dash, who is beating the hedgerow
 15 with might and main, and giving tongue louder and sending the leaves about faster than ever, very proud of finding the pheasant and perhaps a little angry with me for not shooting it ; at least, looking as if he would be angry if I were a man ; for Dash is a
 20 dog of great sagacity, and has doubtless not lived four years in the sporting world without making the discovery that although gentlemen do shoot, ladies do not.

The Loddon at last ! the beautiful Loddon ! and
 25 the bridge, where every one stops, as by instinct, to lean over the rails and gaze a moment on a landscape of surpassing loveliness, the fine grounds of the Great House, with their magnificent groups of limes and

firs, and poplars grander than ever poplars were before; the green meadows opposite, studded with oaks and elms; the clear, winding river; the mill with its picturesque old buildings bounding the scene; all glowing with the rich coloring of autumn, ⁵ and harmonized by the soft beauty of the clear blue sky and the delicious calmness of the hour. The very peasant, whose daily path it is, cannot cross that bridge without a pause.

But the day is wearing fast, and it grows colder ¹⁰ and colder. I really think it will be a frost. After all, spring is the pleasantest season, beautiful as this scenery is. We must get on. Down that broad yet shadowy lane, between the park, dark with evergreens and dappled with deer, and the meadows, ¹⁵ where sheep and cows and horses are grazing under the tall elms; that lane, where the wild bank, clothed with fern and tufted with furze and crowned by rich-berried thorn and thick shining holly on the one side, seems to vie in beauty with the picturesque old pal- ²⁰ ing, the bright laurels, and the plummy cedars, on the other; down that shady lane, until the sudden turn brings us to an opening where four roads meet, where a noble avenue turns down to the Great House; where the village church rears its modest spire from amidst ²⁵ its venerable yew trees; and where, embosomed in orchards and gardens, and backed by barns and ricks and all the wealth of the farmyard, stands the spa-

cious and comfortable abode of good Farmer Riley, the end and object of our walk.

And in happy time the message is said and the answer given, for this beautiful mild day is edging
5 off into a dense frosty evening; the leaves of the elm and the linden in the old avenue are quivering and vibrating and fluttering in the air, and at length falling crisply on the earth, as if Dash were beating for pheasants in the tree-tops; the sun gleams dimly
10 through the fog, giving little more of light or heat than his fair sister, the lady moon; I don't know a more disappointing person than a cold sun; and I am beginning to wrap my cloak closely round me and to calculate the distance to my own fireside, re-
15 canting all the way my praises of November and longing for the showery, flowery April as much as if I were a half-chilled butterfly, or a dahlia knocked down by the frost.

Ah, dear me! what a climate this is, that one can-
20 not keep in the same mind about it for half an hour together! I wonder, by the way, whether the fault is in the weather, which Dash does not seem to care for, or in me? If I should happen to be wet through in a shower next spring, and should catch myself
25 longing for autumn, that would settle the question.

Berk'shire: an English county, in the southern part of which is situated the little village of Three Mile Cross, the

scene of Miss Mitford's sketches. **Lōd'don**: a small river in southern England. **Cōme'y**: good looking; handsome. **Pheasant** (fēz): an English game bird. **Quēst'ing**: seeking; going in pursuit of. **Cōv'ert**: cover; woods, or land covered with underbrush which conceals game. **Sā gāq'ty**: wisdom.

The First News Message by Telegraph¹

BY STEPHEN VAIL

Late in the winter of 1837-38, there was introduced into the Congress of the United States a bill authorizing an appropriation of \$30,000 with which to construct an experimental line of electric telegraph between Washington and Baltimore, some forty miles in length. This object was, by the wise-
 acres in the Congress, considered so visionary and nonsensical that it was not until upon the night of the third of March, 1843, the last of the expiring session, and after five long and weary years of waiting on the part of the untiring inventors, Morse and Vail, that the bill was finally passed by the Senate and became a law, by but a bare majority.

Work upon the construction of the line was at once commenced. The mechanical and electrical part of the work was in charge of Alfred Vail, while Morse remained in Washington.

In October, 1843, ten miles of the underground

¹ Used by permission of "Truth"

line had been laid, when the insulation, which had been gradually failing, disappeared altogether. The minds of those engaged in the enterprise were filled with consternation. Cornell dexterously managed to
5 break the pipe-laying machine — one of his own device — that the apparent accident might furnish a plausible excuse to the newspapers and the public for the temporary suspension of the work.

In February, 1844, it was decided to place the
10 conductors on poles, and on the first of April the stringing of the wires was begun at Washington.

On April 30th the line reached Annapolis Junction, twenty-two miles from Washington, and was operated with satisfactory results.

15 May 1st, 1844, was the date upon which there was to assemble in Baltimore the Whig convention, to nominate the candidates of that party for president and vice-president, and it was arranged between Morse and Vail that the latter should obtain from
20 the passengers upon the afternoon train from Baltimore to Washington, when it stopped at Annapolis Junction, information of the proceedings of the convention and transmit it at once to Morse at the Capitol in Washington.

25 The train arrived at half-past three o'clock, and from the passengers, among whom were many of the delegates to the convention, Mr. Vail ascertained that the convention had assembled, nominated the

candidates, and adjourned, which information he at once dispatched to Morse, with whom was gathered a number of prominent men who had been invited to be present. Morse sat awaiting the prearranged signal from Vail, when suddenly there came from the instrument the understood clicking, and starting the mechanism, unwinding the ribbon of paper upon which came the embossed dots and dashes, there was established the complete success of the telegraph over twenty-two miles of wire. 10

Slowly came the message, and when it had ended, Morse rose and said: "Gentlemen, the convention has adjourned. The train bearing that information has just left Annapolis Junction for Washington, and Mr. Vail has telegraphed me the ticket nominated, and it is —" he hesitated, holding in his hand the final proof of victory over space, "it is — it is Clay and Frelinghuysen."

"You are quizzing us," was the quiet remark. "It's easy enough for you to guess that Clay is at the head of the ticket, but Frelinghuysen — who is Frelinghuysen?"

"I only know," was the dignified answer, "that it is the name Mr. Vail has sent to me from Annapolis Junction, where he had the news five minutes ago from the train bound this way bearing the delegates."

At that time the twenty-two miles from the Junction to Washington required an hour and a quarter

for the fastest trains, and long before the train reached Washington the newsboys — enterprising even in those days — had their “extras” upon the streets, their headings “By Telegraph” telling the story, and being the first time that such a legend had ever appeared upon a printed sheet.

A great and enthusiastic crowd greeted the delegates as they alighted from the train at the station. They were struck dumb with astonishment when they heard the people hurrahing for “Clay and Frelinghuysen,” and saw in cold type before their very eyes the information which they supposed was exclusively their own, but which had preceded them “by telegraph.” They had asked Mr. Vail at the Junction what he was doing when they saw him working the telegraph key, and when he told them, they joked about it most glibly, for no one had any belief in the success of the telegraph.

Upon May 23d the entire line from Washington to Baltimore was completed. On the next day, May 24th, Alfred Vail received the so-called “historic message,” “What hath God wrought?”

This message was dictated by Miss Ellsworth, daughter of the then Commissioner of Patents, who had taken a deep interest in the success of the bill appropriating \$30,000 for the construction of the line, and who was the first to convey to Morse the information that the bill had passed. Morse, jubi-

lant at the news, thereupon gave Miss Ellsworth his promise that the first message to pass over the line from Washington to Baltimore should be that which she might choose to dictate.

Wise'ā ores (kěrs) : persons who pretend to be very wise; dunces. **Īn sū lā'tion** (shūn) : the state of a body's being separated from others by nonconductors so as to prevent the passing of electricity. **Pla'u'si ble** : seemingly reasonable. **Trāns mīt'** : send. **Quiz'zing** : making sport of; mocking.

The Shell

FROM "MAUD," BY ALFRED, LORD TENNYSON

See what a lovely shell,	5
Small and pure as a pearl,	
Lying close to my foot,	
Frail, but a work divine,	
Made so fairily well	
With delicate spire and whorl,	10
How exquisitely minute,	
A miracle of design !	

What is it? A learned man	
Could give it a clumsy name.	
Let him name it who can,	15
The beauty would be the same.	

The tiny cell is forlorn,
 Void of the little living will
 That made it stir on the shore.
 Did he stand at the diamond door
 5 Of his house in a rainbow frill ?
 Did he push, when he was uncurled,
 A golden foot or a fairy horn
 Through his dim water-world ?

Slight, to be crushed with a tap
 10 Of my finger-nail on the sand,
 Small, but a work divine,
 Frail, but of force to withstand,
 Year upon year, the shock
 Of the cataract seas that snap
 15 The three-decker's oaken spine
 Athwart the ledges of rock,
 Here on the Breton strand !

Small service is true service while it lasts ;
 Of humblest friends, bright creature ! scorn not one ;
 20 The daisy, by the shadow that it casts,
 Protects the lingering dew-drop from the sun.

— WORDSWORTH

The Cratchits' Christmas Dinner

BY CHARLES DICKENS

Charles Dickens (1812–1870): One of the most popular of English novelists. He gives sympathetic pictures of the life of the lower classes, and some of his works were largely instrumental in the reform of social abuses. Among his best known novels are "Pickwick Papers," "David Copperfield," "Oliver Twist," and "Nicholas Nickleby."

This selection is from "A Christmas Carol," one of the tales included in the popular series of "Christmas Stories."

Up rose Mrs. Cratchit, Cratchit's wife, dressed out but poorly in a twice-turned gown, but brave in ribbons, which are cheap and make a goodly show for sixpence; and she laid the cloth, assisted by Belinda Cratchit, second of her daughters, also brave in ribbons; while Master Peter Cratchit plunged a fork into the saucepan of potatoes, and getting the corners of his monstrous shirt-collar—Bob's private property, conferred upon his son and heir in honor of the day—into his mouth, rejoiced to find himself¹⁰ so gallantly attired, and yearned to show his linen in the fashionable parks.

And now two smaller Cratchits, boy and girl, came tearing in, screaming that outside the baker's they had smelt the goose, and known it for their own;¹⁵ and basking in luxurious thoughts of sage and onion, these young Cratchits danced about the table, and exalted Master Peter Cratchit to the skies, while he

—not proud, although his collar nearly choked him
 —blew the fire, until the slow potatoes, bubbling up,
 knocked loudly at the saucepan lid to be let out and
 peeled.

5 “What has ever got your precious father, then?”
 said Mrs. Cratchit. “And your brother, Tiny Tim!
 And Martha warn’t as late last Christmas-day by
 half an hour!”

“Here’s Martha, mother!” said a girl, appearing
 10 as she spoke.

“Here’s Martha, mother!” cried the two young
 Cratchits. “Hurrah! There’s such a goose,
 Martha!”

“Why, bless your heart alive, my dear, how late
 15 you are!” said Mrs. Cratchit, kissing her a dozen
 times, and taking off her shawl and bonnet for her
 with officious zeal.

“We’d a deal of work to finish up last night,”
 replied the girl, “and had to clear away this morn-
 20 ing, mother!”

“Well! Never mind, so long as you are come,”
 said Mrs. Cratchit. “Sit ye down before the fire,
 my dear, and have a warm, Lord bless ye!”

“No, no! There’s father coming,” cried the two
 25 young Cratchits, who were everywhere at once.
 “Hide, Martha, hide!”

So Martha hid herself, and in came little Bob,
 the father, with at least three feet of comforter,

Tiny Tim upon his shoulder.

exclusive of the fringe, hanging down before him ; and his threadbare clothes darned up and brushed, to look seasonable ; and Tiny Tim upon his shoulder. Alas for Tiny Tim ! he bore a little crutch, and had
5 his limbs supported by an iron frame.

“ Why, where’s our Martha ? ” cried Bob Cratchit, looking round.

“ Not coming,” said Mrs. Cratchit.

“ Not coming ! ” said Bob, with a sudden declension in his high spirits ; for he had been Tim’s blood-horse all the way from church, and had come home rampant — “ not coming upon Christmas-day ! ”

Martha didn’t like to see him disappointed, if it were only in joke ; so she came out prematurely
15 from behind the closet door, and ran into his arms, while the two young Cratchits hustled Tiny Tim, and bore him off into the washhouse, that he might hear the pudding singing in the copper.

“ And how did little Tim behave ? ” asked Mrs.
20 Cratchit, when she had rallied Bob on his credulity, and Bob had hugged his daughter to his heart’s content.

“ As good as gold,” said Bob, “ and better. Somehow he gets thoughtful, sitting by himself so much,
25 and thinks the strangest things you ever heard. He told me, coming home, that he hoped the people saw him in the church, because he was a cripple, and it might be pleasant to them to remember, upon

Christmas-day, who made lame beggars walk and blind men see."

Bob's voice was tremulous when he told them this, and trembled more when he said that Tiny Tim was growing strong and hearty. 5

His active little crutch was heard upon the floor, and back came Tiny Tim before another word was spoken, escorted by his brother and sister to his stool beside the fire; and while Bob, turning up his cuffs—as if, poor fellow! they were capable 10 of being made more shabby—compounded some hot mixture in a jug with gin and lemons, and stirred it round and round, and put it on the hob to simmer, Master Peter and the two ubiquitous young Cratchits went to fetch the goose, with which they 15 soon returned in high procession.

Mrs. Cratchit made the gravy—ready beforehand in a little saucepan—hissing hot; Master Peter mashed the potatoes with incredible vigor; Miss Belinda sweetened up the apple-sauce; Martha 20 dusted the hot plates; Bob took Tiny Tim beside him in a tiny corner at the table; the two young Cratchits set chairs for everybody, not forgetting themselves, and, mounting guard upon their posts, crammed spoons into their mouths, lest they should 25 shriek for goose before their turn came to be helped.

At last the dishes were set on, and grace was said. It was succeeded by a breathless pause, as

Mrs. Cratchit, looking slowly all along the carving knife, prepared to plunge it in the breast; but when she did and when the long-expected gush of stuffing issued forth, one murmur of delight arose all
5 around the board, and even Tiny Tim, excited by the two young Cratchits, beat on the table with the handle of his knife and feebly cried, "Hurrah!"

There never was such a goose. Bob said he didn't
10 believe there ever was such a goose cooked. Its tenderness and flavor, size and cheapness, were the themes of universal admiration. Eked out by applesauce and mashed potatoes, it was a sufficient dinner for the whole family; indeed, as Mrs. Cratchit said with great delight—surveying one small atom of
15 a bone upon the dish—they hadn't eaten it all at last! Yet every one had had enough, and the youngest Cratchits in particular were steeped in sage and onion to the eyebrows! But now, the plates being changed by Miss Belinda, Mrs. Cratchit left
20 the room alone—too nervous to bear witnesses—to take the pudding up and bring it in.

Suppose it should not be done enough! Suppose it should break in turning out! Suppose somebody should have got over the wall of the back yard and
25 stolen it while they were merry with the goose—a supposition at which the two young Cratchits became livid! All sorts of horrors were supposed.

Hallo! A great deal of steam! The pudding

was out of the copper. A smell like a washing-day! That was the cloth. A smell like an eating-house and a pastry-cook's next door to each other, with a laundress's next door to that! That was the pudding! In half a minute Mrs. Cratchit entered—⁵ flushed, but smiling proudly — with the pudding, like a speckled cannon ball, so hard and firm, blazing in half of half a quartern of ignited brandy, and bedight with Christmas holly stuck into the top.

Oh, a wonderful pudding! Bob Cratchit said,¹⁰ and calmly too, that he regarded it as the greatest success achieved by Mrs. Cratchit since their marriage. Mrs. Cratchit said that now the weight was off her mind, she would confess she had had her doubts about the quantity of flour. Everybody had¹⁵ something to say about it, but nobody said or thought it was at all a small pudding for a large family. It would have been flat heresy to do so. Any Cratchit would have blushed to hint at such a thing. 20

At last the dinner was all done, the cloth was cleared, the hearth swept, and the fire made up. The compound in the jug being tasted, and considered perfect, apples and oranges were put upon the table and a shovelful of chestnuts on the fire. 25

Then all the Cratchit family drew round the hearth, in what Bob Cratchit called a circle, meaning half a one, and at Bob Cratchit's elbow stood

the family display of glass—two tumblers, and a custard-cup without a handle.

These held the hot stuff from the jug, however, as well as golden goblets would have done; and Bob served it out with beaming looks, while the chestnuts on the fire sputtered and crackled noisily.

Then Bob proposed: "A merry Christmas to us all, my dears. God bless us!"

Which all the family reëchoed.

10 "God bless us every one!" said Tiny Tim, the last of all.

Yēarned: wished greatly. **Dē olēn'sion (shūn)**: falling off. **Rāmp'ant**: leaping. **Prē mā tūre'lý**: too early; before the proper time. **Rāl'ied**: teased. **Crē dū'lī tý**: readiness of belief. **Ū biq'ui toūs (bik wī)**: being everywhere at the same time. **Ēked**: added to; increased. **Bē dīght'**: ornamented.

Patrick Henry's Speech in the Virginia Convention

Patrick Henry (1736–1799): An American orator, whose impassioned eloquence and zeal for liberty inspired the colonists with determination to resist English oppression. This famous speech was delivered in the Virginia House of Burgesses, March, 1775.

Mr. President: It is natural to man to indulge in the illusions of hope. We are apt to shut our eyes against a painful truth, and listen to the song
15 of that siren till she transforms us into beasts. Is

this the part of wise men, engaged in a great and arduous struggle for liberty? Are we disposed to be of the number of those who having eyes see not, and having ears hear not, the things which so nearly concern their temporal salvation? For my part, ⁵ whatever anguish of spirit it may cost, I am willing to know the whole truth, — to know the worst, and to provide for it.

I have but one lamp by which my feet are guided; and that is the lamp of experience. I know of no ¹⁰ way of judging of the future but by the past. And, judging by the past, I wish to know what there has been in the conduct of the British ministry, for the last ten years, to justify those hopes with which gentlemen have been pleased to solace themselves ¹⁵ and the house? Is it that insidious smile with which our petition has been lately received? Trust it not, sir; it will prove a snare to your feet. Suffer not yourselves to be betrayed with a kiss. Ask yourselves how this gracious reception of our petition ²⁰ comports with those warlike preparations which cover our waters and darken our land. Are fleets and armies necessary to a work of love and reconciliation? Have we shown ourselves so unwilling to be reconciled that force must be called in to win back our love? ²⁵

Let us not deceive ourselves, sir. These are the implements of war and subjugation, — the last arguments to which kings resort. I ask gentlemen, sir,

what means this martial array if its purpose be not to force us into submission? Can gentlemen assign any other possible motive for it? Has Great Britain any enemy in this quarter of the world, to call for
 5 all this accumulation of navies and armies? No, sir, she has none. They are meant for us; they can be meant for no other. They are sent over to bind and rivet upon us those chains which the British ministry have been so long forging. And what have we to
 10 oppose to them? — Shall we try argument? Sir, we have been trying that for the last ten years. Have we anything new to offer upon the subject? Nothing. We have held the subject up in every light of which it is capable; but it has been all in vain.

15 Shall we resort to entreaty and humble supplication? What terms shall we find which have not been already exhausted? Let us not, I beseech you, sir, deceive ourselves longer. Sir, we have done everything that could be done to avert the storm
 20 which is now coming on. We have petitioned, we have remonstrated, we have supplicated, we have prostrated ourselves before the throne, and have implored its interposition to arrest the tyrannical hands of the ministry and parliament. Our peti-
 25 tions have been slighted, our remonstrances have produced additional violence and insult, our supplications have been disregarded, and we have been spurned with contempt from the foot of the throne.

In vain, after these things, may we indulge the fond hope of peace and reconciliation. There is no longer any room for hope. If we wish to be free, — if we mean to preserve inviolate those inestimable privileges for which we have been so long contend- 5 ing, — if we mean not basely to abandon the noble struggle in which we have been so long engaged, and which we have pledged ourselves never to abandon until the glorious object of our contest shall be obtained, — we must fight! I repeat it, sir, we must 10 fight! An appeal to arms, and to the God of Hosts is all that is left us!

They tell us, sir, that we are weak, — unable to cope with so formidable an adversary. But when shall we be stronger? Will it be the next week, or 15 the next year? Will it be when we are totally disarmed, and when a British guard shall be stationed in every house? Shall we gather strength by irresolution and inaction? Shall we acquire the means of effectual resistance by lying supinely on our backs 20 and hugging the delusive phantom of hope, until our enemies shall have bound us hand and foot? Sir, we are not weak, if we make a proper use of those means which the God of nature hath placed in our power.

25

Three millions of people, armed in the holy cause of liberty, and in such a country as that which we possess, are invincible by any force which our enemy

can send against us. Besides, sir, we shall not fight our battles alone. There is a just God who presides over the destinies of nations, and who will raise up friends to fight our battles for us. The battle, sir, is not to the strong alone; it is to the vigilant, the active, the brave. Besides, sir, we have no election. If we were base enough to desire it, it is now too late to retire from the contest. There is no retreat but in submission and slavery! Our chains are forged! Their clanking may be heard on the plains of Boston. The war is inevitable; and let it come! I repeat it, sir, let it come!

It is in vain, sir, to extenuate the matter. Gentlemen may cry peace, peace, peace! — but there is no peace. The war is actually begun! The next gale that sweeps from the North will bring to our ears the clash of resounding arms! Our brethren are already in the field! Why stand we here idle? What is it that gentlemen wish? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take; but as for me, give me liberty or give me death!

Si'rén: one of three sea nymphs said to sing with such sweetness that they drew sailors to destruction. **Är'dû oûs**: difficult. **Tëm'pô ral**: worldly. **Söl'äge**: comfort. **Ïn sîd'î-oûs**: deceitful. **Côm pôrts'**: agrees with; suits, **Mär'tial (shal)**: war-

like. **Īn vī'ō lāte**: not violated; uninjured. **Sū pīne'ly**: carelessly; idly. **Īn vīn'qī ble**: not to be overcome. **Ēx tēn'ū āte**: cover with excuses; make less the crime of.

Each and All

BY R. W. EMERSON

Ralph Waldo Emerson (1803-1882): An American lecturer, poet, essayist, and philosopher. He has had greater influence on the life and thought of people than any other American author. He wrote "Representative Men," "The Conduct of Life," "Society and Solitude," and several other volumes of essays and poems.

Ralph Waldo Emerson

All are needed by each
one;
Nothing is fair or good
alone.

I thought the sparrow's note from heaven,
Singing at dawn on the alder bough;
I brought him home, in his nest, at even;
He sings the song, but it cheers not now;
For I did not bring home the river and sky;
He sang to my ear — they sang to my eye.

The delicate shells lay on the shore ;
 The bubbles of the latest wave
 Fresh pearls to their enamel gave,
 And the bellowing of the savage sea
 5 Greeted their safe escape to me.
 I wiped away the weeds and foam —
 I fetched my sea-born treasures home ;
 But the poor, unsightly, noisome things
 Had left their beauty on the shore,
 10 With the sun and the sand and the wild uproar.

Noi'sôme: disagreeable ; offensive.

The spacious firmament on high,
 With all the blue ethereal sky,
 And spangled heavens, a shining frame,
 Their great Original proclaim ;
 15 The unwearied sun, from day to day,
 Doth his Creator's power display,
 And publishes to every land
 The work of an Almighty hand.

— ADDISON

Moses Goes to the Fair

BY OLIVER GOLDSMITH

Oliver Goldsmith (1728-1774): An English author. He wrote essays, histories, poems, comedies, and a novel, "The Vicar of Wakefield," from which the following selection is taken. "The Vicar of Wakefield" is an exquisite picture of domestic life, which ranks among the masterpieces of English fiction. "The Deserted Village," and "The Traveler" are Goldsmith's best poems, the first being an ideal description of English rural life.

Oliver Goldsmith

As we were now to hold up our heads a little higher in the world, it would be proper to sell the colt, which was grown old, at a neighboring fair, and buy us a horse that would carry single or double upon an occasion, and make a pretty appearance at 5 church or upon a visit. This I at first opposed stoutly; but it was as stoutly defended. However, as I weakened, my antagonists gained strength, till at last it was resolved to part with him.

As the fair happened on the following day, I had 10 intentions of going myself; but my wife persuaded

me that I had a cold, and nothing could prevail upon her to permit me from home.

“No, my dear,” said she, “our son Moses is a discreet boy, and can buy and sell to very good advantage; you know all our great bargains are of his purchasing. He always stands out and higgles and actually tires them till he gets a bargain.”

As I had some opinion of my son’s prudence, I was willing enough to intrust him with this commission; and the next morning I perceived his sisters mighty busy in fitting out Moses for the fair; trimming his hair, brushing his buckles, and cocking his hat with pins. The business of the toilet being over, we had at last the satisfaction of seeing him mounted upon the colt, with a box before him to bring home groceries in.

He had on a coat made of that cloth they call thunder and lightning, which, though grown too short, was much too good to be thrown away. His waistcoat was of gosling green, and his sisters had tied his hair with a broad black ribbon. We all followed him several paces from the door, bawling after him, “Good luck! good luck!” till we could see him no longer.

* * * * *

As night came on, I began to wonder what could keep our son so long at the fair.

“Never mind our son,” cried my wife; “depend

Moses starts for the fair.

upon it, he knows what he is about. I'll warrant we'll never see him sell his hen of a rainy day. I have seen him buy such bargains as would amaze one. I'll tell you a good story about that, that will
 5 make you split your sides with laughing. — But as I live, yonder comes Moses, without a horse, and the box at his back."

As she spoke, Moses came slowly on foot, and sweating under the box, which he had strapped
 10 round his shoulders like a peddler. "Welcome, welcome, Moses; well, my boy, what have you brought us from the fair?"

"I have brought you myself," cried Moses, with a sly look, and resting the box on the dresser.

15 "Aye, Moses," cried my wife, "that we know, but where is the horse?"

"I have sold him," cried Moses, "for three pounds, five shillings, and twopence."

"Well done, my good boy," returned she. "I
 20 knew you would touch them off. Between ourselves, three pounds, five shillings, and twopence is no bad day's work. Come, let us have it, then."

"I have brought back no money," cried Moses again, "I have laid it all out in a bargain, and here
 25 it is," pulling out a bundle from his breast: "here they are: a gross of green spectacles, with silver rims and shagreen cases."

"A gross of green spectacles!" repeated my wife,

in a faint voice. "And you have parted with the colt and brought us back nothing but a gross of green paltry spectacles!"

"Dear mother," cried the boy, "why won't you listen to reason? I had them a dead bargain, or I should not have bought them. The silver rims alone will sell for double the money."

"A fig for the silver rims!" cried my wife, in a passion: "I dare swear they won't sell for above half the money at the rate of broken silver, five shillings an ounce."

"You need be under no uneasiness," cried I, "about selling the rims, for they are not worth sixpence, for I perceive they are only copper varnished over." 15

"What," cried my wife, "not silver, the rims not silver!"

"No," cried I, "no more silver than your saucepan."

"And so," returned she, "we have parted with the colt, and have only got a gross of green spectacles with copper rims and shagreen cases! A murder take such trumpery! The blockhead has been imposed upon, and should have known his company better." 25

"There, my dear," cried I, "you are wrong, he should not have known them at all."

"Marry, hang the idiot," returned she, "to bring

me such stuff! If I had them I would throw them in the fire."

"There again you are wrong, my dear," cried I; "for though they be copper, we will keep them by
 5 us, as copper spectacles, you know, are better than nothing."

By this time the unfortunate Moses was undeceived. He now saw that he had been indeed imposed upon by a prowling sharper, who, observing
 10 his figure, had marked him for an easy prey. I, therefore, asked the circumstances of his deception. He sold the horse, it seems, and walked the fair in search of another. A reverend-looking man brought him to a tent, under pretense of having one to sell.
 15 "Here," continued Moses, "we met another man, very well dressed, who desired to borrow twenty pounds upon these, saying that he wanted money and would dispose of them for a third of the value. The first gentleman, who pretended to be my friend,
 20 whispered me to buy them, and cautioned me not to let so good an offer pass. I sent for Mr. Flamborough, and they talked him up as finely as they did me, and so at last we were persuaded to buy the two gross between us."

Dīa orēet': prudent; careful. **Hīg'gleṣ**: disputes; bargains. **Būc'kleṣ**: curls of hair; usually, metal frames with catches, used for fastening things together. **Shā grēen'**: a kind of

grained, untanned leather used for covering small cases and boxes. **Pal'try**: worthless; trifling. **A murrain take, etc.**: a petty evil wish. Murrain is a disease among cattle. **Trūmp'-ē y**: things of no value; rubbish.

Winning the Victoria Cross

BY RUDYARD KIPLING

Rudyard Kipling (1865—):

An English author. He was born in India and spent his childhood and early manhood there. He has written, "Plain Tales from the Hills," "Soldiers Three," "Barrack-Room Ballads," "The Seven Seas," "The Day's Work," and other volumes of stories and poems, many of them descriptive of native and army life in India.

His one novel, "The Light that Failed," is less popular than his short stories. He is the author of several books for young people, "Captains Courageous," "Stalky & Co.," and the two delightful "Jungle Books."

Rudyard Kipling

The history of the Victoria Cross has been told so often that it is only necessary to say that the order was created by royal warrant on January 29, 1856.

Any officer or man of the army or navy, from a duke to a negro, can wear on his left breast the little 5 bronze Maltese cross with the crowned lion atop and

the inscription "For Valor" below, if he has only "performed some signal act of valor" or devotion to his country "in the presence of the enemy." Nothing else makes any difference; for it is explicitly laid
 5 down in the warrant that "neither rank nor long service nor wounds nor any other circumstance whatsoever, save the merit of conspicuous bravery, shall be held to establish a sufficient claim to the order."

There are many kinds of bravery, and if you look
 10 through the records of the four hundred and eleven men, living and dead, that have held the cross, out of the seven hundred thousand or so who can compete for it, you will find instances of every kind of heroism.

There is bravery in the early morning when it
 15 takes great courage merely to leave the warm blankets; on foot and on horse; empty or fed; sick or well; coolness of brain that thinks out a plan at dawn and holds to it all through the long, murderous day; bravery of mind that forces the crazy body
 20 to sit still and do nothing except show a good example; enduring spirit that wears through a long siege, never losing heart or temper; quick, flashing bravery that heaves the lighted shell overboard or rushes the stockade while others are gaping, and the
 25 calculating craftsmanship that camps alone before the sputtering rifle pit, and wipes out every living soul in it.

Within the last forty years England has dealt with

many different peoples, and — excepting some foolish hill folk in a place called Sikkim, who were misled into declaring war — they all, Zulu, Malay, Maori, Burman, Boer, the little hillsman of the northeast Indian frontier, the Arab of east Africa, and the Sudanese of the north country, and the rest, played a thoroughly good game.

It is in these rough-and-tumble affairs that many of the later crosses have been won ; though two hundred and ninety-three of the total were given for acts of bravery in the Crimea and the Indian Mutiny. That last was the worst.

In the mutiny of 1857 the Indian empire seemed to be crumbling like a sand bank in flood, and wherever there were three or four Englishmen, they had to kill or be killed till help came.

There was a lance corporal who afterward rose to be lieutenant colonel. He was an enduring kind of man, for he won the cross for taking a hand in every fight that came along through nearly seventy consecutive days.

Then there were two brothers who earned the cross about six times between them for leading forlorn hopes and such.

Then there was a little man of the Sutherland Highlanders — a private, who rose to be major general. In one attack near Lucknow he killed eleven men with his claymore ; and they all fought.

Another V. C. of my acquaintance once saved a trooper whose horse had been killed. His argument was rather original. The man was on foot, and the enemy — Zulus this time, and they are beautiful
5 fighters — was coming down at a run, and he said very decently that he did not see his way to periling his officer's life by double-weighting the only horse there was.

To this his officer answered: "If you don't get up
10 behind me I'll get off and I'll give you such a licking as you've never had in your life."

The man was more afraid of fists than assagais, and the good horse pulled them both out of the scrape. Now, by the regulations, an officer who
15 threatens with violence a subordinate of his service is liable to lose his commission, and to be declared "incapable of serving the queen in any capacity": but the trooper never reported his superior.

I have never yet come across a V. C. who had not
20 the strictest notions about washing and shaving and keeping himself quiet and decent on his way through the civilized world. Indeed, it is very curious, after one has known hundreds of young men and officers, to sit still at a distance and watch them come for-
25 ward to success in their profession. The clean and considerate man always seems to take hold of circumstances at the right end.

One of the latest and youngest of the V. C.'s, I

used to know distantly as a beautiful being whom they called aid-de-camp to some big official in India. So far as an outsider could judge, his duties consisted in wearing a uniform faced with blue satin and in seeing that every one enjoyed himself at the dances and dinners.

A few years later his chance came and he made the most of it. We were then smoking out a nest of caravan-raiders, slave-dealers, and general thieves, who lived somewhere under the Karakoram Mountains, among glaciers about sixteen thousand feet above the sea level. The mere road to the place was too much for many mules, for it ran by precipices and around rock curves and over roaring, snow-fed rivers.

The enemy—they were called Kanjuts this time—had fortified themselves in a place as nearly impregnable as nature and man could make it. One position was on the top of a cliff about twelve hundred feet high, whence they could roll stones directly on the head of any attacking force. Our men objected to the stones much more than to the rifle fire. They were down in a river bed at the bottom of an icy pass with some three tiers of cliff-like defenses above them, and the Kanjuts were very well armed. To make all pleasant, it was December.

25

The ex-aid-de-camp was a good mountaineer, and he was told off with a hundred natives, Goorkhas and Dogra Sikhs, to get into the top tier of fortifi-

cations, and the only way of arriving was to follow a sort of shoot in the cliff face, which the enemy had worn out by throwing rocks down. By daylight, in peace, and with guides, it would have been
 5 good mountaineering.

He went in the dark, by eye, and with some two thousand Kanjuts very much at war with him. When he had climbed eight hundred feet, almost perpendicular, he found he must come back, because
 10 even he and his cragsmen could find no way.

He returned to the river and began again in a new place, working his men up between avalanches that slid along and knocked people over. When he got to the top he had to take his men into the forts
 15 with the bayonets and the kukri, the little Goorkha knife. The thing was so bold that it broke the hearts of the enemy and practically ended the campaign; and if you could see the place you would understand why. •

20 It was hard toe-nail and finger-nail mountaineering under fire, and the men behind him were not regulars, but men raised by the semi-independent kings and used to defend the frontier. The little aid-de-camp got a deserved Victoria Cross. The
 25 courage of Ulysses again; for he had to think as he climbed, and until he was directly under the fortifications one chance-hopping boulder might just have planed his men off all along the line.

And when all is said and done, courage of mind is the finest thing any one can hope to attain to. A weak or undisciplined soul is apt to become reckless under strain — and this is being afraid the wrong way about — or to act for its own immediate advantage. 5 For this reason the Victoria Cross is jealously guarded. Men are taught to volunteer for anything and everything; going out quietly after, not before, the authorities have filled their place. They are also instructed that it is cowardly, it is childish, and it is cheating 10 to neglect the plain work immediately in front of them, the duties they are trusted and paid to do for the sake of stepping aside to snatch at what to an outsider may resemble fame or distinction.

The order itself is a personal decoration, and the 15 honor and glory of it belong to the wearer; but he can only win it by forgetting himself, his own honor and glory, and by working for something beyond and outside and apart. And that is the only way you ever get anything in this world worth the keeping. 20

Sig'nal: remarkable; notable. **Ėx plĭc'it lĭ**: clearly; plainly. **Crafts'man ship**: skill in one's work; knowledge of a trade. **Sĭk'kĭm**: a state in Bengal, India. **Mā'ō rĭ**: the inhabitants of New Zealand. **Boer (bōor)**: a farmer people of Dutch descent in South Africa, recently at war with the British. **Cri-mē'a**: in the Crimean War in 1854 France and England united against Russia, to repel Russian advances in Turkey. **Indian Mutiny**: in 1857 the native troops in India rose against the

British soldiers, whom they outnumbered eight to one, and for a time threatened the overthrow of British power in India. **Clāy'mōre**: a large, two-handed sword. **Ās'sā gāiṣ**: spears used by native tribes in South Africa. **Āid-de-camp'(kāng)**: an officer chosen by a general to carry orders and to assist and represent him in other ways. **Kān'juts**: a tribe in India. **Īm prēg'nā ble**: unconquerable; that cannot be taken. **Gōōr'-khās, Dō'grā Sīkhs**: Indian tribes, loyal to the English. **Ū lŷs'-sēs** or **Ō dŷs'seūs**: the wisest of the Greek heroes who fought against Troy.

The Charge of the Light Brigade

BY ALFRED, LORD TENNYSON

Half a league, half a league,
Half a league onward,
All in the valley of death
Rode the six hundred.

3 "Forward, the Light Brigade!
Charge for the guns!" he said;
Into the valley of death
Rode the six hundred.

10 "Forward, the Light Brigade!"
Was there a man dismayed?
Not though the soldier knew
Some one had blundered;
Theirs not to make reply,
Theirs not to reason why,
15 Theirs but to do and die:

Into the valley of death
 Rode the six hundred.

Cannon to right of them,
 Cannon to left of them,
 Cannon in front of them 5
 Volleyed and thundered;
 Stormed at with shot and shell,
 Boldly they rode and well,
 Into the jaws of death,
 Into the mouth of hell 10
 Rode the six hundred.

Flashed all their sabers bare,
 Flashed as they turned in air
 Sabring the gunners there,
 Charging an army, while 15
 All the world wondered.
 Plunged in the battery smoke,
 Right through the line they broke;
 Cossack and Russian
 Reeled from the saber-stroke — 20
 Shattered and sundered.
 Then they rode back, but not —
 Not the six hundred.

Cannon to right of them,
 Cannon to left of them, 25

Cannon behind them
 Volleyed and thundered ;
 Stormed at with shot and shell,
 While horse and hero fell,
 5 They that had fought so well
 Came through the jaws of death,
 Back from the mouth of hell,
 All that was left of them,
 Left of six hundred.

10 When can their glory fade ?
 Oh, the wild charge they made !
 All the world wondered.
 Honor the charge they made,
 Honor the Light Brigade,
 15 Noble six hundred !

Charge of the Light Brigade: in the battle of Balaklava (Băl-ă klă'vă), in the Crimean War, an English brigade was, by some mistake, ordered to charge a Russian battery. The dreadful order was obeyed, and of the six hundred and thirty men who made the attack, only one hundred and fifty returned. "**Charge for the guns!**" he said: Captain Nolan gave the command to advance. By whose authority it was done could never be ascertained, as he was the first man to fall.

A good book is the precious life-blood of a master spirit, embalmed and treasured up on purpose to a life beyond life.

— MILTON

Poor Richard's Sayings

BY BENJAMIN FRANKLIN

Benjamin Franklin (1706-1790): An American statesman and philosopher. While ambassador to France, he secured the ratification of a treaty with that country which was of inestimable value to the struggling colonists. He wrote "Poor Richard's Almanac," "Autobiography," and papers on political, scientific, and moral subjects.

These proverbs are taken from "Poor Richard's Almanac," a yearly publication full of shrewd sayings about industry and economy.

If pride leads the van, beggary brings up the rear.

He that can travel well afoot, keeps a good horse.

Some men grow mad by studying much to know ;
but who grows mad by studying good to grow ?

Take this remark from Richard poor and lame, — 5
Whate'er's begun in anger ends in shame.

The worst wheel of the cart makes the most noise.

He that falls in love with himself will have no
rivals.

Against diseases, know the strongest fence is the 10
defensive virtue, abstinence.

If you would have a faithful servant and one that
you like, serve yourself.

A mob's a monster ; with heads enough, but no
brains.

15

The discontented man finds no easy chair.

God helps them that help themselves.

Three can keep a secret if two of them are dead.

Diligence is the mother of good luck.

When Prosperity was well mounted, she let go the
bridle, and soon came tumbling out of the saddle.

5 A little neglect may breed great mischief: for
want of a nail the shoe was lost, and for want of a
shoe the horse was lost, and for want of a horse the
rider was lost.

A false friend and a shadow attend only while the
10 sun shines.

Plow deep while sluggards sleep, and you shall
have corn to sell and to keep.

Old boys have playthings as well as young ones :
the difference is only in the price.

15 If you would keep your secret from an enemy, tell
it not to a friend.

One to-day is worth two to-morrows.

What maintains one vice would bring up two
children.

20 It is foolish to lay out money in a purchase of
repentance.

If you would know the value of money, go and
try to borrow some: for he that goes a-borrowing
goes a-sorrowing.

25 Pride breakfasted with Plenty, dined with Poverty,
and supped with Contempt.

Fly pleasures and they will follow you.

Creditors have better memories than debtors:

creditors are a superstitious sect, — great observers of set days and times.

Sloth makes all things difficult: industry, all easy. But after all, do not depend too much upon your own industry and frugality and prudence, though excellent things: for they may all be blasted without the blessing of Heaven.

The Uses of Mountains

BY JOHN RUSKIN

John Ruskin (1819–1900): An English author. His most important works are “Modern Painters,” a treatise on the principles of art, and “The Seven Lamps of Architecture,” a treatise on the principles of architecture. Besides art criticisms, Ruskin wrote many books on ethical, educational, and political subjects.

This selection is from “Modern Painters.”

John Ruskin

Copyright, 1884, by CLARK & MAYNARD

It may not be altogether profitless or unnecessary to review briefly the nature of the three 10 great offices which mountain ranges are appointed to

fulfill, in order to preserve the health and increase the happiness of mankind.

Their first use is of course to give motion to water. Every fountain and river, from the inch-
 5 deep streamlet that crosses the village lane in trembling clearness, to the massy and silent march of the everlasting multitude of waters in Amazon or Ganges, owe their play and purity and power to the ordained elevations of the earth. Gentle or steep,
 10 tended or abrupt, some determined slope of the earth's surface is of course necessary before any wave can so much as overtake one sedge in its pilgrimage.

How seldom do we enough consider, as we walk beside the margins of our pleasant brooks, how beau-
 15 tiful and wonderful is that ordinance, of which every blade of grass that waves in their clear water is a perpetual sign, that the dew and the rain fallen on the face of the earth shall find no resting place; shall find, on the contrary, fixed channels, traced
 20 for them from the ravines of the central crests down which they roar in sudden ranks of foam, to the dark hollows beneath the banks of lowland pasture around which they must circle slowly among the stems and beneath the leaves of the lilies.

25 Paths are prepared for them, by which, at some appointed rate of journey, they must evermore descend, sometimes slow and sometimes swift, but never pausing. The daily portion of the earth they

have to glide over is marked for them at each successive sunrise, the place which has known them knowing them no more ; and the gateways of guarding mountains are opened for them in cleft and chasm, none letting them in their pilgrimage ; and, from far off, the great heart of the sea calls them to itself.

It is easy to conceive how, under any less beneficent dispositions of their masses of hill, the continents of the earth might either have been covered with enormous lakes or have become wildernesses of pestiferous marsh, or lifeless plains upon which the water would have dried as it fell, leaving them for great part of the year desert. Such districts do exist, and exist in vastness : the whole earth is not prepared for the habitation of man ; only certain small portions are prepared for him.

And that part which we are enabled to inhabit owes its fitness for human life chiefly to its mountain ranges, which, throwing the superfluous rain off as it falls, collect it in streams or lakes, and guide it into given places and in given directions ; so that men can build their cities in the midst of fields which they know will be always fertile and establish the lines of their commerce upon streams which will not fail.

Nor is this giving of motion to water to be considered as confined only to the surface of the earth.

In the Bernese Alps, Switzerland.

A no less important function of the hills is in directing the flow of the fountains and springs from subterranean reservoirs. There is no miraculous springing up of water out of the ground at our feet, but every fountain and well is supplied from a reservoir among the hills, so placed as to involve some slight fall or pressure, enough to secure the constant flowing of the stream.

And the incalculable blessing of the power given to us in most valleys, of reaching by excavation¹⁰ some point whence the water will rise to the surface of the ground in perennial flow, is entirely owing to the concave disposition of the beds of clay or rock raised from beneath the bosom of the valley into ranks of inclosing hills. 15

The second great use of mountains is to maintain a constant change in the currents and nature of the air. Such change would, of course, have been partly caused by differences in soils and vegetation, even if the earth had been level; but to a far less extent²⁰ than it is now by the chains of hills. Exposing on one side their masses of rock to the full heat of the sun—increased by the angle at which the rays strike on the slope—and on the other casting a soft shadow for leagues over the plains at their²⁵ feet, hills divide the earth not only into districts but into climates, and cause perpetual currents of air to traverse their passes, and ascend or descend

their ravines, altering both the temperature and nature of the air as it passes in a thousand different ways. They moisten the air with the spray of their waterfalls; suck it down and beat it hither
5 and thither in the pools of their torrents; close it within clefts and caves, where the sunbeams never reach till it is as cold as November mists; then send it forth again to breathe softly across the slopes of velvet fields, or be scorched among sunburnt shales
10 and grassless crags. Then they draw it back in moaning swirls through clefts of ice, and up into dewy wreaths above the snowfields; piercing it with strange electric darts and flashes of mountain fire; and tossing it high in fantastic storm-cloud, as the
15 dried grass is tossed by the mower, only suffering it to depart at last when chastened and pure, to refresh the faded air of the far-off plains.

The third great use of mountains is to cause perpetual change in the soils of the earth. Without
20 such provisions the ground under cultivation would in a series of years become exhausted and require to be upturned laboriously by the hand of man. But the elevations of the earth's surface provide for it a perpetual renovation.

25 The higher mountains suffer their summits to be broken into fragments and to be cast down in sheets of massy rock, full of every substance necessary for the nourishment of plants; these fallen fragments

are again broken by frost and ground by torrents into various conditions of sand and clay — materials which are distributed perpetually by the streams farther and farther from the mountain's base.

Every shower which swells the rivulets enables 5 their waters to carry certain portions of earth into new positions, and exposes new banks of ground to be mined in their turn. That turbid foaming of the angry water, that tearing down of bank and rock along the flanks of its fury, are no disturbances of 10 the kind course of nature ; they are beneficent operations of laws necessary to the existence of man and to the beauty of the earth.

The process is continued more gently, but not less effectively, over all the surface of the lower undu-15 lating country ; and each filtering thread of summer rain which trickles through the short turf of the uplands, is bearing its own appointed burden of earth to be thrown down on some new natural garden in the dingles below. 20

It is not, in reality, a degrading, but a true, large, and ennobling view of the mountain ranges of the world, to compare them to heaps of fertile and fresh earth, laid up by a prudent gardener beside his garden-beds, whence, at intervals, he casts on them 25 some scattering of new and virgin ground. That which we so often lament as convulsion or destruction, is nothing else than the momentary shaking of the dust from the spade.

The winter floods, which inflict a temporary devastation, bear with them the elements of succeeding fertility ; the fruitful field is covered with sand and shingle in momentary judgment, but in enduring
 5 mercy ; and the great river, which chokes its mouth with marsh and tosses terror along its shore, is but scattering the seeds of the harvest of futurity and preparing the seats of unborn generations.

The three great functions which I have just
 10 described, — those of giving motion and change to water, air, and earth, — are indispensable to human existence ; they are operations to be regarded with as full a depth of gratitude as the laws which bid the tree bear fruit or the seed multiply itself in the
 15 earth.

And thus those desolate and threatening ranges of dark mountain, which, in nearly all ages of the world, men have looked upon with aversion or with terror, and shrunk back from as if they were haunted
 20 by perpetual images of death, are, in reality, sources of life and happiness far fuller and more beneficent than all the bright fruitfulness of the plain. The valleys only feed ; the mountains feed and guard and strengthen us.

25 We take our idea of fearfulness and sublimity alternately from the mountains and the sea ; but we associate them unjustly. The sea, with all its beneficence, is yet devouring and terrible ; but the silent

wave of the blue mountain is lifted toward heaven in a stillness of perpetual mercy. And the one surge, unfathomable in its darkness, the other, unshaken in its faithfulness, forever bear the seal of their appointed symbol: —

8

“Thy righteousness is like the great mountains :
Thy judgments are a great deep.”

Más'sý: massive; forming or consisting of a large mass. **Ôr'dī nange**: law. **Lăt'ting**: delaying; hindering,— an old meaning of the word. **Sŭb tēr rā'ně an**: underground. **Pěr-ŏn'ni al**: never failing; unceasing. **Shāle**: kind of rock. **Ũ-dŭ lāt'ing**: rolling; rising and falling in wavelike forms. **Dīn'gle**: narrow dales; small valleys. **Děv as tā'tion (shŭn)**: ruin; destruction. **Shŭn'gle**: coarse gravel. **Ĭn dīs pěn'sá ble**: not to be spared; necessary.

The American Flag

BY J. R. DRAKE

Joseph Rodman Drake (1795–1820): An American poet. He is best known by this patriotic poem. He wrote a longer poem, “The Culprit Fay,” narrating the adventures of a fairy who was guilty of loving a mortal maiden. It is graceful in fancy and gives some attractive descriptions of the scenery along the Hudson River.

When Freedom from her mountain height
Unfurled her standard to the air,
She tore the azure robe of night,
And set the stars of glory there.

10

She mingled with its gorgeous dyes
 The milky baldrick of the skies,
 And striped its pure celestial white
 With streakings of the morning light;
 5 Then from his mansion in the sun
 She called her eagle bearer down,
 And gave into his mighty hand
 The symbol of her chosen land.

Majestic monarch of the cloud,
 10 Who rear'st aloft thy regal form,
 To hear the tempest trummings loud
 And see the lightning lances driven,
 When stride the warriors of the storm,
 And rolls the thunder-drum of Heaven, —
 15 Child of the sun! to thee 'tis given
 To guard the banner of the free,
 To hover in the sulphur smoke,
 To ward away the battle stroke,
 And bid its blittings shine afar,
 20 Like rainbows on the cloud of war,
 The harbingers of victory!

Flag of the brave! thy folds shall fly,
 The sign of hope and triumph high,
 When speaks the signal trumpet tone,
 25 And the long line comes gleaming on.
 Ere yet the life-blood, warm and wet,
 Has dimmed the glistening bayonet, —

Each soldier eye shall brightly turn
 To where thy sky-born glories burn ;
 And, as his springing steps advance,
 Catch war and vengeance from the glance.
 And, when the cannon-mouthings loud 5
 Heave in wild wreaths the battle shroud,
 And gory sabers rise and fall
 Like shoots of flame on midnight's pall,
 Then shall thy meteor glances glow;
 And cowering foes shall shrink beneath 10
 Each gallant arm that strikes below
 That lovely messenger of death.

Flag of the seas ! on ocean wave
 Thy star shall glitter o'er the brave ;
 When Death, careering on the gale, 15
 Sweeps darkly round the bellied sail,
 And frightened waves rush wildly back
 Before the broadside's reeling rack,
 Each dying wanderer of the sea
 Shall look at once to Heaven and thee, 20
 And smile to see thy splendors fly
 In triumph, o'er his closing eye.

Flag of the free heart's hope and home !
 By angel hands to Valor given !
 Thy stars have lit the welkin dome, 25
 And all thy hues were born in Heaven.

Forever float that standard sheet!

Where breathes the foe but falls before us,
With Freedom's soil beneath our feet,
And Freedom's banner streaming o'er us?

Rē'gal: kingly. Hār'bīn gērs: forerunners; messengers
Wāi'kīn: sky.

The Marvelous Tower

BY WASHINGTON IRVING

Washington Irving

Washington Irving (1783–1859): A famous American author. The most popular of his works are the American, English, and Spanish tales in "The Sketch-Book," "Bracebridge Hall," "Tales of a Traveler," and "The Alhambra." He wrote also "Life of Columbus," "Life of Washington," and a burlesque "History of New York," purporting to be by a Dutchman, Diedrich Knickerbocker.

This story, founded on an old Spanish legend, is from a volume of tales and sketches published after Irving's death, by his nephew, Pierre Irving.

I

5 The morning sun shone brightly upon the cliff-built towers of Toledo, when King Roderick issued out of

the gate of the city, at the head of a numerous train of courtiers and cavaliers, and crossed the bridge that bestrides the deep rocky bed of the Tagus. The shining cavalcade wound up the road that leads among the mountains and soon came in sight of the necromantic tower.

This singular tower was round, and of great height and grandeur, erected upon a lofty rock, and surrounded by crags and precipices. The foundation was supported by four brazen lions, each taller than a cavalier on horseback. The walls were built of small pieces of jasper and various colored marbles, not larger than a man's hand; so joined, however, that but for their different hues, they might be taken for one entire stone.

15

They were arranged with marvelous cunning, so as to represent battles and warlike deeds of times and heroes long since passed away. The whole surface was so admirably polished that the stones were as lustrous as glass, and reflected the rays of the sun with such resplendent brightness as to dazzle all beholders.

King Roderick and his courtiers arrived wondering and amazed at the foot of the rock. Here there was a narrow arched way cut through the living stone—the only entrance to the tower. It was closed by a massive iron gate covered with rusty locks of divers workmanship in the fashion of differ-

25

ent centuries, which had been affixed by the predecessors of Don Roderick. On either side of the portal stood the two ancient guardians of the tower, laden with the keys belonging to the locks.

5 The king alighted and approaching the portals ordered the guardians to unlock the gate. The hoary-headed men drew back with terror. "Alas!" cried they, "what is it your majesty requires of us? Would you have the mischiefs of this tower unbound
10 and let loose to shake the earth to its foundations?"

The venerable Archbishop Urbino likewise implored him not to disturb a mystery which had been held sacred from generation to generation within the memory of man, and which even Cæsar himself,
15 when sovereign of Spain, had not ventured to invade. The youthful cavaliers, however, were eager to pursue the adventure and encouraged him in his rash curiosity.

"Come what come may," exclaimed Don Roderick,
20 "I am resolved to penetrate the mystery of this tower." So saying, he again commanded the guardians to unlock the portal.

The ancient men obeyed with fear and trembling, but their hands shook with age, and when they applied the keys the locks were so rusted by time, or of
25 such strange workmanship, that they resisted their feeble efforts; whereupon the young cavaliers pressed forward and lent their aid. Still the locks were so

numerous and difficult that with all their eagerness and strength a great part of the day was exhausted before the whole of them could be mastered.

When the last bolt had yielded to the key, the guardians and the reverend archbishop again entered the king to pause and reflect. "Whatever is within this tower," they said, "is as yet harmless, and lies bound under a mighty spell; venture not, then, to open a door which may let forth a flood of evil upon the land." 10

But the anger of the king was roused, and he ordered that the portal should be instantly thrown open. In vain, however, did one after another exert his strength; and equally in vain did the cavaliers unite their forces, and apply their shoulders to the gate: though there was neither bar nor bolt remaining, it was perfectly immovable. 15

The patience of the king was now exhausted, and he advanced to apply his hand; scarcely, however, did he touch the iron gate when it swung slowly open, uttering, as it were, a dismal groan as it turned reluctantly upon its hinges. A cold, damp wind issued forth, accompanied by a tempestuous sound. 20

The hearts of the ancient guardians quaked within them, and their knees smote together; but several of the youthful cavaliers rushed in, eager to gratify their curiosity or to signalize themselves in this redoubtable enterprise. They had scarcely advanced, 25

a few paces, however, when they recoiled, overcome by the baleful air or by some fearful vision.

Upon this the king ordered that fires should be kindled to dispel the darkness and to correct the
 5 noxious and long-imprisoned air. He then led the way into the interior; but though stout of heart he advanced with awe and hesitation.

After proceeding a short distance he entered a hall or antechamber, on the opposite side of which
 10 was a door, and before it stood a gigantic figure of the color of bronze and of a terrible aspect. It held a huge mace, which it whirled incessantly, giving such cruel and resounding blows upon the earth as to prevent all further entrance.

15 The king paused at the sight of this frightful figure; for whether it was a living being or a statue of magic artifice he could not tell. On its breast was a scroll, whereon was inscribed in large letters, "I do my duty."

20 After a little while Roderick plucked up heart and addressed it with great solemnity: "Whatever thou be," said he, "know that I come not to violate this sanctuary, but to inquire into the mystery it contains; I conjure thee, therefore, to let me pass in safety."

25 Upon this the figure paused, with uplifted mace, and the king and his train passed unharmed through the door.

They now entered a vast chamber of a rare and

sumptuous architecture, difficult to be described. The walls were incrustcd with the most precious gems, so joined together as to form one smooth and perfect surface. The lofty dome appeared to be self-supported, and was studded with gems lustrous as the stars of the firmament. There was neither wood nor any other common or base material to be seen throughout the edifice. There were no windows or other openings to admit the day, yet a radiant light was spread throughout the place which seemed to shine from the walls and to render every object distinctly visible.

In the center of this hall stood a table of alabaster of the rarest workmanship, on which was inscribed in Greek characters that Hercules, the Theban Greek, had founded this tower in the year of the world three thousand and six. Upon the table stood a golden casket richly set round with precious stones and closed with a lock of mother-of-pearl, and on the lid were inscribed the following words: "In this coffer is contained the mystery of the tower. The hand of none but a king can open it; but let him beware! for marvelous events will be revealed to him which are to take place before his death."

II

King Roderick boldly seized upon the casket. The venerable archbishop laid his hand upon his

arm and made a last remonstrance. "Forbear, my son," said he, "stop while there is yet time. Look not into the mysterious decrees of Providence. God has hidden them in mercy from our sight, and it is
 5 impious to rend the veil by which they are concealed."

"What have I to dread from a knowledge of the future?" replied Roderick, with an air of haughty presumption. "If good be destined me, I shall
 10 enjoy it by anticipation; if evil, I shall arm myself to meet it." So saying he rashly broke the lock.

Within the casket he found nothing but a linen cloth folded between two tablets of copper. On unfolding it he beheld painted on it figures of men
 15 on horseback, of fierce demeanor, clad in turbans and robes of various colors, after the fashion of the Arabs, with scimeters hanging from their necks and cross-bows at their saddle-backs, and they carried banners and pennons with divers devices. Above
 20 them was inscribed in Greek characters: "Rash monarch, behold the men who are to hurl thee from thy throne and subdue thy kingdom!"

At the sight of these things the king was troubled in spirit, and dismay fell upon his attendants.
 25 While they were yet regarding the paintings it seemed as if the figures began to move, and a faint sound of warlike tumult arose from the cloth, with the clash of cymbal and bray of trumpet, the neigh

of steed and shout of army; but all was heard indistinctly, as if afar off or in a reverie or dream.

The more they gazed the plainer became the motion and the louder the noise, and the linen cloth rolled forth and spread out, as it were a mighty banner, and filled the hall and mingled with the air, until its texture was no longer visible, or appeared as a transparent cloud; and the shadowy figures became all in motion, and the din and uproar became fiercer and fiercer, and whether the whole were an animated picture or a vision or an array of embodied spirits conjured up by supernatural power, no one present could tell.

They beheld before them a great field of battle where Christians and Moslems were engaged in deadly conflict. They heard the rush and tramp of steeds, the blast of trumpet, the clash of cymbal, and the stormy din of a thousand drums. There was the clash of swords and maces and battle-axes, with the whistling of arrows and the hurling of darts and lances.

The Christians gave way before the foe; the infidels pressed upon them and put them to utter rout. The standard of the Cross was cast down, the banner of Spain was trodden under foot, the air resounded with shouts of triumph, with yells of fury, and with the groans of dying men. Amidst the flying squadrons King Roderick beheld a crowned warrior whose

"The linen cloth rolled forth and spread out."

back was toward him, but whose armor and device were his own, and who was mounted on a white steed that resembled his own war-horse, Orelia. In the confusion of the flight the warrior was dismounted and was no longer to be seen, and Orelia ⁵ galloped wildly through the field of battle without a rider. Roderick stayed to see no more, but rushed from the fatal hall followed by his terrified attendants. They fled through the outer chamber, where the gigantic figure with the whirling mace had dis- ¹⁰ appeared ; and on issuing into the open air they found the two ancient guardians of the tower lying dead at the portal, as though they had been crushed by some mighty blow. All nature, which had been clear and serene, was now in wild uproar. The ¹⁵ heavens were darkened by heavy clouds ; loud bursts of thunder rent the air, and the earth was deluged with rain and rattling hail.

The king ordered that the iron portal should be closed ; but the door was immovable, and the cava- ²⁰ liers were dismayed by the tremendous turmoil and the mingled shouts and groans that continued to prevail within. The king and his train hastened back to Toledo, pursued and pelted by the tempest. The mountains shook and echoed with the thunder, trees ²⁵ were uprooted and blown down, and the Tagus raged and roared and flowed above its banks. It seemed to the affrighted courtiers as if the phantom legions of the

tower had issued forth and mingled with the storm ; for amidst the claps of thunder and the howling of the wind, they fancied they heard the sound of the drums and trumpets, the shouts of armies, and the
 5 rush of steeds. Thus beaten by tempest and overwhelmed with horror, the king and his courtiers arrived at Toledo, clattering across the bridge of the Tagus and entering the gate in headlong confusion, as though they had been pursued by an enemy.

10 In the morning the heavens were again serene and all nature was restored to tranquillity. The king, therefore, issued forth with his cavaliers and took the road to the tower, followed by a great multitude, for he was anxious once more to close the iron door
 15 and shut up those evils that threatened to overwhelm the land.

But lo ! on coming in sight of the tower a new wonder met their eyes. An eagle appeared high in the air, seeming to descend from heaven. He bore
 20 in his beak a burning brand, and lighting on the summit of the tower fanned the fire with his wings. In a little while the edifice burst forth into a blaze, as though it had been built of rosin, and the flames mounted into the air with a brilliancy more dazzling
 25 than the sun ; nor did they cease until every stone was consumed and the whole was reduced to a heap of ashes.

Then there came a vast flight of birds, small of

size and sable of hue, darkening the sky like a cloud; and they descended and wheeled in circles round the ashes, causing so great a wind with their wings that the whole was borne up into the air and scattered throughout all Spain, and wherever a particle of those ashes fell it was as a stain of blood.

It is furthermore recorded by ancient men and writers of former days, that all those on whom this dust fell were afterward slain in battle when the country was conquered by the Arabs, and that the destruction of this necromantic tower was a sign and token of the coming perdition of Spain.

I. **Röd'ér ick**: the last of the Gothic kings of Spain, who was driven from his throne by the Moors. **Cäv'al cāde**: a procession of persons on horseback. **Nēc rô mǎn'tic**: enchanted; magic. **Di'vērs**: diverse; different in kind, — an old meaning of the word. **Dōn**: a Spanish title, formerly applied only to persons of high rank, now used in the sense of Mr. or sir. **Çaē'sar**, etc.: Caius Julius Caesar, the greatest of Roman generals, conquered Spain 49 B.C. **Rē doubt'ā ble**: dreadful; fearful. **Bāle'ful**: hurtful; deadly. **Ān'tē chām bēr**: a small room leading into a larger one; an outer room. **Īn çēs'sant lý**: unceasingly; continually. **Ār'ti fiçe**: workmanship. **Fīr'māment**: sky. **Āl'ā bās tēr**: a very hard stone. **Chǎr'ác tēr**: letters. **Hēr'cū lēs**: in Greek mythology a hero celebrated for great strength. **Cōf'fēr**: chest, especially one used for keeping valuables.

II. **Scīm'ē tēr**: curved swords used by Arabs and other Oriental people. **Çým'bal**: a musical instrument. **Māç'ēs**: heavy war clubs. **Rout**: defeat; confused flight. **Pēr di'tion (dīsh ūn)**: ruin; destruction.

Sonnet

COMPOSED UPON WESTMINSTER BRIDGE, SEPTEMBER 3, 1802

BY WILLIAM WORDSWORTH

Earth has not anything to show more fair :
 Dull would he be of soul who could pass by
 A sight so touching in its majesty :
 This city now doth like a garment wear
 5 The beauty of the morning ; silent, bare,
 Ships, towers, domes, theaters, and temples lie
 Open unto the fields and to the sky ;
 All bright and glittering in the smokeless air.
 Never did sun more beautifully steep
 10 In his first splendor valley, rock, or hill ;
 Ne'er saw I, never felt, a calm so deep !
 The river glideth at his own sweet will :
 Dear God ! the very houses seem asleep ;
 And all that mighty heart is lying still !

 An Account of Indian Customs

BY CAPTAIN JOHN SMITH

John Smith (1579–1632): An English adventurer, one of the founders of the Virginia colony. He also explored the northern coast and gave it the name of New England. He wrote several books about America, and his "True Account of Virginia," printed in 1608, was the first book written by an Englishman about America.

I

15 Within sixty miles of Jamestown there are about five thousand people, but of able men fit for war

there are scarce fifteen hundred. There is a far greater number of women and children than of men. To support so many together, they have yet no means, because they derive so small a benefit from their land, be it ever so fertile. Six or seven hundred have been the most that have been seen together.

The people differ very much in stature, and especially in language. Some are very great, others very little; but generally tall and straight, of a comely proportion, and of a brown color when they are of age, but white when they are born. Their hair is generally black, and but few have any beard. The men shave one half of their hair and wear the other half long. For barbers they have the women, who with two shells will grate away the hair in any fashion they please. The hair of the women is cut in many fashions suitable to their years, but some part always remains long.

They are very strong, of an able body, and full of agility; able to endure lying in the woods under a tree by the fire in the worst of winter, or in the weeds and grasses in ambuscade in summer. They are treacherous in everything except where fear constrains them; crafty, timorous, and quick of apprehension. Some are of fearful disposition, some are bold, most are cautious, all are savage, and generally covetous of copper, beads, and suchlike trinkets.

They are soon moved to anger, and so malicious that they seldom forget an injury.

Each household knows its own lands and gardens, and most live by their own labor. For their apparel
5 they are sometimes covered with the skins of wild beasts, which in winter are dressed with the hair, but in summer without. The better sort use large mantles of deerskins. Some of these mantles are embroidered with white beads, some with copper,
10 others painted after their manner. We have seen some wear mantles made of turkey feathers, so prettily wrought and woven with threads that nothing but the feathers could be discerned. They were exceedingly warm and very handsome.

15 They decorate themselves mostly with copper beads and paint. Some of the women have their bodies and faces tattooed with pictures of beasts and serpents, wrought into their flesh with black spots. In each ear they have three great holes, from which
20 they hang chains, bracelets, or pieces of copper. Some of the men wear in those holes a small green and yellow colored live snake, nearly half a yard in length.

Some wear on their heads the wing of a bird or
25 some large feather, and a rattle, which they take from the tail of a snake. Many have the whole skin of a hawk or some strange fowl stuffed, with the wings spread. Their heads and shoulders are painted

red with the root pocone bruised to powder and mixed with oil : this they claim will preserve them from the heat in summer and from the cold in winter.

Men, women, and children have their several names according to the humor of their parents. The 5 women, they say, love their children very dearly. To make them hardy, they wash them in the rivers in the coldest mornings, and by painting and ointments so tan their skins that after a year or two no weather will hurt them. 10

The men pass their time in fishing, hunting, wars, and such manlike exercises, scorning to be seen doing any womanlike work. The women and children do all the work. They make mats, baskets, pots, mortars ; pound their corn, make their bread, 15 prepare their victuals, plant and gather their corn, and bear all kinds of burdens.

For fishing, hunting, and wars they use their bows and arrows. They bring their bows to the form of ours by scraping with a shell. Their arrows are 20 made, some of straight young sprigs, which they head with bone two or three inches long. These they use to shoot at squirrels on trees. Another sort of arrow is made of reeds. These are pierced with wood headed with splinters of crystal or some other 25 sharp stone, the spurs of a turkey, or the bill of some bird.

For a knife they use the splinter of a reed to cut

their feathers in form. With this knife they will joint a deer or any beast, shape their shoes, buskins, and mantles. To make the notch of their arrows they have the tooth of a boar set in a stick. The
 5 arrow-head they quickly make with a little bone, or with any splinter of a stone, or glass in the form of a heart. With the sinews of deer and the tops of deers' horns boiled to a jelly they make a glue that will not dissolve in cold water, and with this
 10 they glue the head to the end of their arrows.

II

For their wars they use targets that are round and made of the bark of trees, and wear a sword of wood at their backs, but oftentimes they use the horns of a deer, put through a piece of wood in the
 15 form of a pick-ax, for swords. Some have a long stone sharpened at both ends and used in the same manner. This they were wont to use for hatchets also, but now by trading they have plenty of iron.

In their hunting and fishing they take the great-
 20 est pains; and as it is their ordinary exercise from infancy, they esteem it a pleasure, and are very proud to be expert in it. By their continual ranging and travel they know all the advantages and places most frequented with deer, beasts, fish, fowl,
 25 roots, and berries. In their hunts they leave their habitations, and forming themselves into companies,

go with their families to the most desert places, where they spend their time in hunting and fowling up the mountains, or by the heads of the rivers, where there is plenty of game. For betwixt the rivers the ground is so narrow that little game comes 5 there which they do not devour. It is a marvel that they can so accurately pass three or four days' journey through these deserts without habitation.

In their hunts in the desert they commonly go two or three hundred together. Having found the 10 deer, they surround them with many fires, and betwixt the fires they place themselves. Some take their stand in the midst. They chase the deer, thus frightened by the fires and the voices, so long within the circle that they often kill six, eight, ten, or fifteen at 15 a hunting. They also drive them on to some narrow point of land and force them into the river, where with their boats they have ambuscades to kill them. When they have shot a deer by land, they track it like bloodhounds by the blood, and so overtake it. 20 Hares, partridges, turkeys, fat or lean, young or old, they devour all they can catch.

One savage hunting alone uses the skin of a deer slit on one side, and so put on his arm that his hand comes to the head, which is stuffed; and the horns, 23 head, eyes, ears, and every part are artificially counterfeited as perfectly as he can devise. Thus shrouding his body in the skin, by stalking he

approaches the deer, creeping on the ground from one tree to another. If the deer chances to suspect danger, or stands to gaze, he turns the head with his hand to appear like a deer, also gazing and licking himself. So, watching his best advantage to approach, he shoots it, and chases it by the marks of its blood till he gets it.

When they intend any wars the chiefs usually have the advice of their priests and conjurers, and their allies and ancient friends; but the priests chiefly determine their resolution. They appoint some muscular fellow captain over each nation. They seldom make war for land or goods, but for women and children and especially for revenge. They have many enemies in all the western countries beyond the mountains and the heads of the rivers.

The Powhatans are constrained sometimes to fight against all their enemies. Their chief attempts are to capture by stratagem, treachery, or surprises. They do not put women and children captives to death, but keep them.

They have a method in war, and for our pleasure they showed it to us. Having painted and disguised themselves in the fiercest manner they could devise, they divided themselves into two companies, with nearly a hundred in a company — the one company called Monacans, the other Powhatans.

Each army had its captain. These as enemies

took their stand a musket shot from one another, ranged themselves fifteen abreast, and in ranks four or five yards apart; not in file, but with openings between their files, so that the rear could shoot as conveniently as the front. Having thus pitched s the fields, a messenger from each part went with these conditions: that the fugitives of the vanquished, upon their submission in two days after, should live, but their wives and children should be prize for the conquerors. 10

The messengers no sooner returned than the companies approached in order, on each rank a sergeant, and in the rear an officer for lieutenant, all duly keeping their orders, yet leaping and singing after their accustomed manner in wars. Upon the first 15 flight of arrows they gave most horrible shouts and screeches.

When they had spent their arrows, they came together, charging and retiring, every rank following the other. As they got a chance, they caught 20 their enemy by the hair of the head and down he came. The victor with his wooden sword seemed to beat out his enemy's brains, and yet the moment it was possible he crept to the rear to maintain the skirmish. 25

The Monacans decreasing, the Powhatans charged upon them in the form of a half-moon; they, unwilling to be enclosed, fled all in a troop to their

ambuscades, on which they very cunningly led the Powhatans. The Monacans dispersed themselves among the fresh men hidden in ambush, whereupon the Powhatans retired with all speed. The Monacans seeing this, took advantage to retire again, and so each company returned to its own quarters. All their actions, voices, and gestures, both in charging and retreating, were so strained to the height of their quality and nature, that the strangeness of the scene made it seem very delightful.

I. **Ām būs cāde'**: lying in wait, especially for the purpose of attacking an enemy by surprise; a place where one lies in wait. **Mā li'ciūs** (līsh ūs): mischievous; spiteful. **Dīz cerned'** (zērd): seen; distinguished. **Tāt tōōed'**: marked according to a savage custom, by pricking in coloring matter under the skin. **Būs'kīns**: strong coverings for the feet coming some distance up the legs.

II. **Tār'gēts**: small shields used as defensive weapons in war. **Wōnt**: accustomed; used. **Stā/k'ing**: moving forward stealthily under cover of a screen for the purpose of attack.

Work

BY THOMAS CARLYLE

Thomas Carlyle (1795-1881): A Scotch author who exerted greater influence on life and literature than any other man of his time. His principal works are "Sartor Resartus," "The French Revolution," "Heroes and Hero Worship," and "Life of Frederick the Great."

Here is a passage from "Past and Present," in which Carlyle preaches the "gospel of work."

Admirable was that saying of the old monks, "*Laborare est orare*," work is worship.

All true work is sacred; in all true work, were it but true hand labor, there is something of divineness.

Labor, wide as the earth, has its summit in Heaven. Sweat of the brow; and up from that to sweat of the brain, sweat of the heart; which includes all Kepler calculations, Newton meditations, all sciences, all spoken epics, all acted heroisms,¹⁰ martyrdoms, — up to that "agony of bloody sweat" which all men have called divine!

O brother! if this is not worship, then I say, the more pity for worship; for this is the noblest thing yet discovered under God's sky. 15

Who art thou that complainest of thy life of toil? Complain not! Look up, my wearied brother; see thy fellow workmen there, in God's eternity; surviving there, they alone surviving; sacred band of the Immortals, celestial bodyguard of the empire²⁰ of mankind! Even in the weak human memory they survive so long, as saints, as heroes, as gods; they alone surviving; peopling, they alone, the unmeasured solitudes of Time!

To thee Heaven, though severe, is not unkind;²⁵ Heaven is kind, — as a noble mother; as that Spar-

tan mother, saying, while she gave her son his shield, "With it, my son, or upon it!" Thou, too, shalt return home in honor; to thy far-distant home in honor; doubt it not,—if in the battle thou keep
 5 thy shield!

Jo'hann (Yō) Kēp'lēr (1571–1631): a German astronomer.
Sir Isaac New'ton (1642–1727): an English philosopher and mathematician. "**Agony of bloody sweat**": see Luke xxii. 44.

Mr. Winkle on Skates

BY CHARLES DICKENS

This selection is from "Pickwick Papers," which is considered by many people the best of Dickens's works. It is an amusing narrative of the experiences of a club of Londoners in the country.

"Now," said Wardle, after a substantial lunch had been done ample justice to, "what say you to an hour on the ice? We shall have plenty of time."

"Capital!" said Mr. Benjamin Allen.

10 "Prime!" ejaculated Mr. Bob Sawyer.

"You skate, of course, Winkle?" said Wardle.

"Ye—yes; oh, yes!" replied Mr. Winkle. "I—I am rather out of practice."

"Oh, do skate, Mr. Winkle!" said Arabella. "I
 15 like to see it so much!"

"Oh, it is so graceful!" said another young lady.

A third young lady said it was elegant, and a fourth expressed her opinion that it was "swanlike."

"I should be very happy, I'm sure," said Mr. Winkle, reddening; "but I have no skates."

This objection was at once overruled. Trundle had a couple of pairs, and the fat boy announced that there were half a dozen more downstairs; whereat Mr. Winkle expressed exquisite delight, and looked exquisitely uncomfortable.

Old Wardle led the way to a pretty large sheet of ice; and, the fat boy and Mr. Weller having shoveled and swept away the snow which had fallen on it during the night, Mr. Bob Sawyer adjusted his skates with a dexterity which to Mr. Winkle was perfectly marvelous, and described circles with his left leg, and cut figures of eight, and inscribed upon the ice, without once stopping for breath, a great many other pleasant and astonishing devices, to the excessive satisfaction of Mr. Pickwick, Mr. Tupman, and the ladies, which reached a pitch of positive enthusiasm when old Wardle and Benjamin Allen, assisted by Bob Sawyer, performed some mystic evolutions which they called a reel.

All this time Mr. Winkle, with his face and hands blue with the cold, had been forcing a gimlet into the soles of his feet, and putting his skates on with the points behind, and getting the straps into a very complicated and entangled state, with the assistance

of Mr. Snodgrass, who knew rather less about skates than a Hindoo. At length, however, with the assistance of Mr. Weller, the unfortunate skates were firmly screwed and buckled on, and Mr. Winkle was
5 raised to his feet.

"Now, then, sir," said Sam, in an encouraging tone, "off with you, and show 'em how to do it."

"Stop, Sam, stop!" said Mr. Winkle, trembling violently, and clutching hold of Sam's arms with the
10 grasp of a drowning man. "How slippery it is, Sam!"

"Not an uncommon thing upon ice, sir," replied Mr. Weller. "Hold up, sir."

This last observation of Mr. Weller's bore reference
15 to a demonstration Mr. Winkle made at the instant, of a frantic desire to throw his feet in the air and dash the back of his head on the ice.

"These—these—are very awkward skates, aren't they, Sam?" inquired Mr. Winkle, staggering.

20 "I'm afraid there's an awkward gentleman in them, sir," replied Sam.

"Now, Mr. Winkle," cried Mr. Pickwick, quite unconscious that there was anything the matter, "come; the ladies are all anxiety."

25 "Yes, yes," replied Mr. Winkle, with a ghastly smile. "I'm coming."

"Just going to begin," said Sam, endeavoring to disengage himself. "Now, sir, start off."

"Stop an instant, Sam," gasped Mr. Winkle, clinging most affectionately to Mr. Weller. "I find I've got a couple of coats at home that I don't want, Sam. You may have them, Sam."

"Thank'e, sir," said Mr. Weller. 5

"Never mind touching your hat, Sam," said Mr. Winkle, hastily. "You needn't take your hand away to do that. I meant to have given you five shillings this morning for a Christmas-box, Sam. I'll give it you this afternoon, Sam." 10

"You're very good, sir," replied Mr. Weller.

"Just hold me at first, Sam; will you?" said Mr. Winkle. "There, that's right. I shall soon get in the way of it, Sam. Not too fast, Sam; not too fast!" 15

Mr. Winkle, stooping forward, with his body half doubled up, was being assisted over the ice by Mr. Weller, in a very singular and un-swanlike manner, when Mr. Pickwick innocently shouted from the opposite bank, "Sam!" 20

"Sir?" said Mr. Weller.

"Here! I want you."

"Let go, sir," said Sam; "don't you hear the governor calling? Let go, sir."

With a violent effort, Mr. Weller disengaged himself from the grasp of the agonized Pickwickian, and, in so doing, administered a considerable impetus to the unhappy Mr. Winkle. With an accuracy

Mr. Pickwick shouted "Sam!"

which no degree of dexterity or practice would have insured, that unfortunate gentleman bore swiftly down into the center of the reel, at the very moment when Mr. Bob Sawyer was performing a flourish of unparalleled beauty. 5

Mr. Winkle struck wildly against him, and with a loud crash they both fell heavily down. Mr. Pickwick ran to the spot. Bob Sawyer had risen to his feet, but Mr. Winkle was far too wise to do anything of the kind in skates. He was seated on the ice, 10 making spasmodic efforts to smile; but anguish was depicted on every lineament of his countenance.

"Are you hurt?" inquired Mr. Benjamin Allen, with great anxiety.

"Not much," said Mr. Winkle, rubbing his back. 15

"I wish you'd let me bleed you," said Mr. Benjamin with great eagerness.

"No, thank you," replied Mr. Winkle, hurriedly.

"I really think you had better," said Allen.

"Thank you," replied Mr. Winkle; "I'd rather 20 not."

"What do you think, Mr. Pickwick?" inquired Bob Sawyer.

Mr. Pickwick was excited and indignant. He beckoned to Mr. Weller, and said in a stern voice, 25 "Take his skates off!"

"No; but really I had scarcely begun," remonstrated Mr. Winkle.

"Take his skates off," repeated Mr. Pickwick, firmly.

The command was not to be resisted. Mr. Winkle allowed Sam to obey it in silence.

8 "Lift him up," said Mr. Pickwick. Sam assisted him to rise.

Mr. Pickwick retired a few paces apart from the bystanders, and, beckoning his friend to approach, fixed a searching look upon him, and uttered in a low
10 but distinct and emphatic tone, these remarkable words, "You're a humbug, sir."

"A what, sir?" said Mr. Winkle, starting.

"A humbug, sir. I will speak plainer if you wish it: an impostor, sir."

15 With these words Mr. Pickwick turned slowly on his heel and rejoined his friends.

Ējǎc'ŭ lāt'ěd: exclaimed. **Īm'pē tūs**: the force with which a body is driven or impelled. **Spǎs mōd'ic**: as in a spasm; shaking violently. **Dē pīct'ěd**: marked; painted. **Līn'ē āment**: feature.

The Chambered Nautilus

BY O. W. HOLMES

Oliver Wendell Holmes (1809-1894): An American physician and author. He wrote two novels, "Elsie Venner" and "The Guardian Angel," some medical treatises, and several volumes of poems. His most popular works are, however,

three series of papers contributed to the *Atlantic Monthly*—“The Autocrat of the Breakfast-Table,” “The Professor at the Breakfast-Table,” and “The Poet at the Breakfast-Table.” These papers abound in wit and humor and shrewd insight into human character. Among the poems interspersed throughout the “Autocrat” papers is Holmes’s most admired poem, “The Chambered Nautilus.” “I wrote that poem,” Holmes said, “at white heat. When it was finished I took it to my wife who was sewing in an adjoining room and said, ‘I think I have the best poem that I have ever written,’ and I have never changed my mind about it.”

This is the ship of pearl, which, poets feign,
Sails the unshadowed main,—
The venturous bark that flings
On the sweet summer wind its purpled wings
In gulfs enchanted, where the siren sings,
And coral reefs lie bare,
Where the cold sea-maids rise to sun their streaming
hair.

Its webs of living gauze no more unfurl ;
 Wrecked is the ship of pearl !
 And every chambered cell
 Where its dim dreaming life was wont to dwell,
 As the frail tenant shaped his growing shell,
 Before thee lies revealed, —
 Its iris ceiling rent, its sunless crypt unsealed !

15

Year after year beheld the silent toil
That spread his lustrous coil ;

Still, as the spiral grew,
 He left the past year's dwelling for the new,
 Stole with soft step his shining archway through,
 Built up his idle door,
 5 Stretched in his last-found home, and knew the old
 no more.

Thanks for the heavenly message brought by thee,
 Child of the wandering sea,
 Cast from her lap, forlorn !
 From thy dead lips a clearer note is born
 10 Than ever Triton blew from wreathèd horn !
 While on mine ear it rings,
 Through the deep caves of thought I hear a voice
 that sings : —

Build thee more stately mansions, O my soul,
 As the swift seasons roll !
 15 Leave thy low-vaulted past !
 Let each new temple, nobler than the last,
 Shut thee from heaven with a dome more vast,
 Till thou at length art free,
 Leaving thine outgrown shell by life's unresting sea !

The chambered or pearly nautilus : a small sea animal inhabiting a shell having many chambers or cavities, each of which is occupied in succession. As the animal increases in size, it advances, forming a larger chamber and partitioning off the one last occupied. **Crypt** : secret place; vault. **Tri'ton** : according to Greek mythology, a sea god who raised or calmed the billows by playing on a conch shell.

About the Stars

BY CAMILLE FLAMMARION

Camille Flammarion (1842 —): A popular French writer and lecturer on astronomy and other subjects.

This selection is from "The Wonders of the Heavens."

The stars appear to be scattered at random in the heavens. On a fine starry night, when our sight rises to these heights, a great difference in their brightness is noticed, and at the same time a seeming disorder in their general arrangement. This irregular arrangement and the number of stars prevent us from giving each of them a particular name, but to recognize them and facilitate study, the heavenly sphere is divided into sections.

The astronomical knowledge or science of the ancients was very limited. They were at first contented to name the planets and a few of the most beautiful stars, and we have preserved some of the old names. They grouped together certain stars, each group being imagined to form the outlines of some animal or of some mythical hero, whose name was given to the group. Unless the imagination is vivid enough to create images of the figures represented, just as it sees pictures in the ever-changing

shapes of the clouds, one need not try to find in the constellations anything like the forms or outlines of the objects whose names they bear. The stars in each constellation are distinguished by Greek letters.

5 The necessity of being guided on the seas obliged man to choose in the heavens fixed points by which he could direct his course ; and that need was probably the historical origin of the names of the constellations. More than three thousand years ago
10 the constellations which we call Orion, the Pleiades, and the Hyades, were mentioned by Job. Homer, also, speaks of these constellations.

The ancients drew maps of the heavens, and from the time of Hipparchus, a Greek astronomer who
15 flourished about one hundred years before the Christian era, they were able to classify the stars, distinguishing them according to their brightness. It was necessary to have some method of finding a particular star easily, in the midst of the five or six thou-
20 sand stars which may be seen with the naked eye on a clear night.

As the stars vary in brightness, in order to aid us in recognizing them they have been classed in order of magnitude. The word "magnitude" is really a mis-
25 nomer, as it has no relations to the dimensions of the stars ; for we have been able to measure but few of these celestial bodies.

Formerly it was believed that the brightest stars

were the largest, and this belief led people to rank the more brilliant stars as the larger ones. Thus, stars of the first magnitude are those which shine with the greatest brilliancy. Those of the second magnitude are less bright, and so on. 5

Now the brightness of a star depends not only on the size of the star but also on its light and its distance from the earth. It may be said that the brightest stars are generally the nearest, though several of the most brilliant stars are exceptions, and 10 that those whose pale glimmer is scarcely caught by our telescopes are enormously distant from us.

We know now that the sky is not a concave sphere in which, as some of the ancients believed, bright nails are fastened — the nail-heads being the 15 stars — and that there is no vault, but only infinite space around the earth in every direction. We know also that the stars are suns and are scattered various distances apart in the vastness of space.

When, therefore, we notice two or more stars close 20 together, their apparent nearness does not in any way prove that they are really not far apart. They may be very distant from one another — at greater distance indeed than we are from the nearest of them. 25

Looking at a group of several stars, like the Pleiades, we might suppose that all the stars in it are on the same plane and equally distant from the earth.

By no means. Dispersed in all directions in space, the arrangement which they display to our eyes is only an appearance caused by the position of the earth with regard to them. This is purely a matter
5 of perspective. We see them from the earth, and this view-point is at a vast distance from even the nearest fixed star.

When we find ourselves at night in the midst of a large square in which numerous electric lights are
10 placed, it is difficult to distinguish the most remote lights from those which are somewhat nearer. Moreover, the arrangement of the lights depends entirely on our point of view, and varies according as we ourselves retreat or advance, stand on a side of
15 the square, or survey the lights from a point midway between the sides.

This simple comparison may help us to understand why the stars, which are lights in dark space, do not reveal the distances which really separate
20 them, and why their arrangement on the apparent vault of the sky depends only on the spot where we place ourselves to see them.

If we could transport ourselves to Neptune, the outermost planet of the solar system, we should not
25 perceive a different arrangement of the celestial bodies, for Neptune is not far enough away; it is less than three billion miles from our planet. To see the outlines of the constellations changed, it

would be necessary to station ourselves on the nearest star, and that is so distant that even the rays of light from it require three years and a half to reach our globe, although light moves at the inconceivably swift rate of one hundred and eighty-six thousand 5 miles a second.

The other near stars succeed each other at greater distances. All the stars, each as vast as our sun, separated from one another by such prodigious distances, succeeding each other in an endless manner 10 in the immensity of space, are in motion in the heavens. Nothing is stationary in the universe; there is not a single atom of matter in absolute repose. The great forces with which matter is animated, regulate its action. The movements of the 15 suns in space are imperceptible to our eyes because they are performed at too great a distance; but they are in more rapid motion than is our own globe. There are some stars which are whirling through space with a velocity of fifty miles a second. To 20 the eye which could master time as well as space, the sky would be a moving swarm of stars — a spectacle splendid and awe-inspiring.

Mýth'I cal: fabulous. **Cōn stēllā'tions (shūns):** groups of fixed stars. **Ō rī'ōn:** a large, bright star, named for the fabulous hunter, Orion. **Plē'ia dēq̄ (yá):** a group of seven small stars, named for the seven daughters of the fabulous hero,

Atlas. **Hŷ'á dēs**: a group of five stars, supposed by the ancients to foretell rainy weather when they rose with the sun. **Hō'mēr**: a Greek poet supposed to have lived about 1000 B.C. **Hīp pār'chus**: a Greek astronomer who lived about 150 B.C. **Māg'nī tūde**: size. **Āp pār'ent**: seeming. **Sō'lar**: of or pertaining to the sun. **Īmp ĕr ġēp'tī ble**: not to be seen; invisible.

To the Evening Star

BY WILLIAM BLAKE

William Blake (1757–1827): An English painter, engraver, and poet. His poems were written and illustrated in color entirely by his own hand. The volumes entitled “Songs of Innocence” and “Songs of Experience” include the most popular of his beautiful imaginative poems.

Thou fair-haired Angel of the Evening,
 Now whilst the sun rests on the mountains, light
 Thy bright torch of love — thy radiant crown
 Put on, and smile upon our evening bed !
 5 Smile on our loves ; and while thou drawest the
 Blue curtains of the sky, scatter thy silver dew
 On every flower that shuts its sweet eyes
 In timely sleep. Let thy west wind sleep on
 The lake ; speak silence with thy glimmering eyes
 10 And wash the dusk with silver, — soon, full soon,
 Dost thou withdraw ; then the wolf rages wide,
 And the lion glares through the dun forest.
 The fleeces of our flocks are covered with
 Thy sacred dew ; protect them with thine influence !

Home-Thoughts from Abroad

BY ROBERT BROWNING

Robert Browning (1812–1889): An English poet. His poems are frequently difficult and obscure, but are marked by originality and dramatic power, and by virtue of courage, manliness, and hopefulness, appeal to young readers as well as to older ones. He wrote “Men and Women,” “Dramatis Personæ,” “Pippa Passes,” “The Ring and the Book,” and many other poems.

Robert Browning

Oh, to be in England
Now that April's there,
And whoever wakes in England
Sees, some morning unaware,
That the lowest boughs and the brushwood sheaf
Round the elm tree bole are in tiny leaf,
While the chaffinch sings on the orchard bough
In England — now !

And after April, when May follows,
And the whitethroat builds and all the swallows !
Hark, where my blossomed pear tree in the hedge

Leans to the field and scatters on the clover
 Blossoms and dewdrops, at the bent spray's edge —
 That's the wise thrush ; he sings each song twice over,
 Lest you should think he never could recapture
 5 The first fine careless rapture !
 And though the fields look rough with hoary dew,
 All will be gay when noontide wakes anew
 The buttercups, the little children's dower —
 Far brighter than this gaudy melon-flower !

Story of a Stone¹

By D. S. JORDAN

David Starr Jordan (1851—): An American scientist. Among his works are a "Manual of Vertebrates" and a "Synopsis of the Fishes of North America," besides a great number of scientific papers. This selection is from "Science Sketches," a volume for young people.

I

10 Once on a time, a great many years ago, in those
 old days when the great Northwest consisted of a
 few ragged and treeless hills full of copper and
 quartz ; in the days when it would have been fun
 to study geography, for there were no capitals nor
 15 any products, and all the towns were seaports ; in
 fact, an immensely long time ago, there lived in the

¹ From "Science Sketches," published by A. C. McClurg & Co., Chicago.

northeastern part of Wisconsin, not far from the city of Oconto, a little jellyfish.

It was a curious little fellow, about the shape of half an apple and the size of a pin's head; and it floated around in the water and ate little things, 5 and opened and shut its umbrella pretty much as the jellyfishes do now on a sunny day off Nahant Beach, when the tide is coming in. It had a great many little feelers that hung down all around, like so many little snakes, and so it was named Medusa, 10 after a queer woman who lived a long while ago, according to an old story. She wore snakes instead of hair, and used to turn people into stone images if they dared to make faces at her.

So this little Medusa floated around and opened 15 and shut her umbrella for some time. Then one morning, down among the seaweeds, she laid a whole lot of tiny eggs, transparent as crab-apple jelly, and smaller than the dewdrop on the end of a pine leaf. That was the last thing she did; so she died, and our 20 story henceforth concerns only one of those little eggs.

One day the sun shone down into the water and touched these eggs with life, and a little fellow whom we will call Favosites, because that was his name, woke up inside of the egg and came out into the 25 world. He was only a little piece of floating jelly, shaped like a cartridge pointed at both ends, or like a grain of barley, although very much smaller.

He had a great number of little paddles on his sides. These kept flapping all the time, so that he was constantly in motion. And at night all these little paddles shone with a rich green light, to show
 5 him the way through the water. It would have done you good to see them some night when all the little fellows had their lamps burning at once, and every wave as it rose and fell was all aglow with Nature's fireworks, which do not burn the fingers
 10 and leave no smell of sulphur.

So the little Favosites kept scudding along in the water, dodging from one side to the other to avoid the ugly creatures that tried to eat him. There were crabs and clams of a fashion neither you nor
 15 I shall ever see alive. There were huge animals with great eyes, savage jaws like the beak of a snapping turtle and surrounded by long feelers. They sat in the end of a long round shell, shaped like a length of stovepipe, and glowered like an owl
 20 in a hollow log, and there were smaller ones that looked like lobsters in a dinner-horn.

But none of these caught the little fellow, else I should not have had this story to tell. At last, having paddled about long enough, Favosites thought
 25 of settling in life. So he looked around till he found a flat bit of shell that just suited him. Then he sat down upon it and grew fast.

He did not go to sleep, however, but proceeded to

make himself a home. He had no head, but between his shoulders he made an opening which would serve him for mouth and stomach. Then he put a whole row of feelers out, and commenced catching little worms and floating eggs and bits of jelly and bits of lime — everything he could get — and cramming them into his mouth.

He had a great many curious ways, but the funniest of them all was what he did with the bits of lime. He kept taking them in, and tried to wall himself up inside with them, as a person would stone a well, or as though a man should swallow pebbles and stow them away in his feet and all around under his skin, till he had filled himself all full.

Little Favosites became lonesome there on the bottom of that old ocean, among so many outlandish neighbors. So one night, when he was fast asleep and dreaming as only a coral animal can dream, there sprouted out from his side somewhere near where his sixth rib might have been if he had had any ribs, another little Favosites; and this one very soon began to eat worms and to wall himself up, as if for dear life.

Then from these two another and another little bud came out, and other little Favosites were formed. They all kept growing up higher and cramming themselves fuller and fuller of stone, till at last there were so many and they were so crowded together

that there was not room for them to grow round, and so they had to become six-sided, like the cells of a honeycomb.

Once in a while some one in the company would
5 feel jealous because the others got more of the lime, or would feel uneasy at sitting still so long and swallowing stones. Such a one would secede from the little union without even saying "good-bye," and would put on the airs of the grandmother Medusa,
10 and would sail around in the water opening and shutting its umbrella, and at last would lay more eggs which in time hatched out into more Favosites.

So the old Favosites died or ran away or were walled up by the younger ones, and new ones filled
15 their places, and the colony thrived for a long while, until it had accumulated a large stock of lime. But one day there came a freshet in the Menomonee River, and piles of dirt and sand and mud were brought down, and all the little Favosites' mouths
20 were filled with it. This they did not like, so they died; but we know that the rock-house they were building was not spoiled, for we have it here.

II

But it was tumbled about a good deal in the dirt, and the rolling pebbles knocked the corners off and
25 the mud worked into the cracks and its beautiful color was destroyed.

There it lay in the mud for ages, till the earth gave a great long heave that raised Wisconsin out of the ocean, and the mud around our little Favosites packed and dried into hard rock, and closed it in. So it became part of the dry land, and lay imbedded in the rock for centuries and centuries, while the old-fashioned ferns grew above it and whispered to it strange stories of what was going on above ground in the land where things were living.

Then the time of the first fishes came, and the other animals looked in wonder at them, as the Indians looked on Columbus. Some of them were like the little garpike of our river here, only much larger — big as a stovepipe, and with crust as hard as a turtle's. Then there were sharks of strange forms, and some of them had teeth like bowie knives, with tempers to match. The time of the old fishes came and went, and many more times came and went, but still Favosites lay in the ground at Oconto.

Then came the long, hot, wet summer, when the mists hung over the earth so thick that you would have had to cut your way through them with a knife; and great ferns and rushes big as an oak and tall as a steeple grew in the swamps of Indiana and Illinois. Their green plumes were so long and so densely interwoven that the man in the moon might have fancied that the earth was feathering out. Then huge reptiles with huge jaws and teeth like

cross-cut saws, and little reptiles with wings like bats, crawled and swam and flew.

But the ferns died, and the reptiles died, and the rush trees fell in the swamps, and the Illinois and the
5 Sangamon and the Wabash and the other rivers covered them up. They stewed away under layers of clay and sand, till at last they turned into coal and wept bitter tears of petroleum. But all this while Favosites lay in the rocks in Wisconsin.

10 Then the mists cleared away, and the sun shone, and the grass began to grow, and strange animals came from somewhere or nowhere to feed upon it. There were queer little striped horses, which had three or four hoofs on each foot and were no bigger
15 than Newfoundland dogs. There were great hairy elephants with teeth like sticks of wood. There were hogs with noses so long that they could sit on their hind legs and root, and there were many still stranger creatures which no man ever saw alive.
20 But still Favosites lay in the ground and waited

So the long, long summer passed by, and the autumn and the Indian summer. At last the winter came, and it snowed and snowed, and it was so cold that the snow did not go off till the Fourth of July.
25 Then it snowed and snowed till the snow did not go off at all. And then it became so cold that it snowed all the time, till the snow covered the animals and then the trees and then the mountains.

Then it would thaw a little and streams of water would run over the snow. Then it would freeze again and the snow would pack into solid ice. So it went on snowing and thawing and freezing till nothing but snow-banks could be seen in Wisconsin, ⁵ and most of Indiana was fit only for a skating-rink.

So it went on for a great many years. Then the spring came, the south winds blew, and the snow began to thaw. Then the ice came sliding down from the mountains and hills and from the north ¹⁰ toward the south. It went on tearing up rocks, little and big, from the size of a chip to the size of a house, crushing forests as you would crush an egg-shell and wiping out rivers as you would wipe out a chalk-mark. So it came pushing, grinding, thunder-¹⁵ ing along, not very fast, but with tremendous force, like a plow drawn by a million oxen, for a thousand feet of ice is very heavy.

And the ice-plow scraped over Oconto, and little Favosites was torn from the place where he had lain ²⁰ so long; but by good fortune he happened to fall into a crevice of the ice where he was not much crowded, else he would have been ground to powder and I should not have had this story to tell.

And the ice melted as it slid along and it made ²⁵ great torrents of water, which as they swept onward covered the land with clay and pebbles. At last the ice came to a great swamp, overgrown with tamarack

and balsam. It melted here, and all the rocks and stones and dirt it had carried — little Favosites and all — were dumped into one great heap.

It was a very long time after, and man had been created, and America had been discovered, and a great many things had happened, when one day a farmer living in Wisconsin was plowing up his clover field to sow his winter wheat. He picked up in the furrow a curious little bit of “petrified honey-comb,” a good deal worn and dirty, still showing plainly the cells and the beebread. He gave it to one of his boys to take to his teacher to hear what he would say about it. And this is what he said.

I. **Ō cōn'tō**: a city in Wisconsin. **Mē dū'sā**. **Fāv ō sī'tēs**: a kind of fossil coral. **Out lānd'ish**: strange. **Sē cōde'**: withdraw; separate from. **Āc cū'mū lāt ēd**: collected; stored up. **Mē nōm'o nēe River**: a river in Wisconsin and Michigan.

II. **Pē trō'lē ūm**: rock or natural oil.

To a Skylark

By P. B. SHELLEY

Percy Bysshe Shelley (1792–1822): An English poet. His poems are often wild protests against the existing order of things, but are marked by melody and great beauty of imagery. Among his longer poems are “Queen Mab,” “Alastor,” “The Revolt of Islam,” “The Cenci,” and “Adonais.” He is best known by his exquisite lyrics, “Ode to the West Wind,” “The Cloud,” and the following ode.

Hail to thee, blithe spirit!
 Bird thou never wert,
 That from heaven, or near it,
 Pourest thy full heart
 In profuse strains of unpremeditated art. 5

Higher still and higher
 From the earth thou springest,
 Like a cloud of fire;
 The blue deep thou wingest,
 And singing still dost soar, and soaring ever singest. 10

In the golden lightning
 Of the sunken sun,
 O'er which clouds are brightening,
 Thou dost float and run,
 Like an unbodied joy whose race is just begun. 15

The pale purple even
 Melts around thy flight;
 Like a star of heaven,
 In the broad daylight,
 Thou art unseen, but yet I hear thy shrill delight. 20

Keen as are the arrows
 Of that silver sphere,
 Whose intense lamp narrows
 In the white dawn clear,
 Until we hardly see, we feel that it is there. 25

All the earth and air
 With thy voice is loud,
 As, when night is bare,
 From one lonely cloud
 5 The moon rains out her beams, and heaven is over-
 flowed.

What thou art we know not ;
 What is most like thee ?
 From rainbow clouds there flow not
 Drops so bright to see,
 10 As from thy presence showers a rain of melody.

Like a poet hidden
 In the light of thought,
 Singing hymns unbidden,
 Till the world is wrought
 15 To sympathy with hopes and fears it heeded not ;

Like a high-born maiden
 In a palace tower,
 Soothing her love-laden
 Soul in secret hour
 20 With music sweet as love, which overflows her bower ;

Like a glowworm golden
 In a dell of dew,
 Scattering unbeholden
 Its aerial hue
 25 Among the flowers and grass, which screen it from
 the view ;

Like a rose embowered
 In its own green leaves,
 By warm winds deflowered,
 Till the scent it gives
 Makes faint with too much sweet these heavy-wingèd
 thieves.

Sound of vernal showers
 On the twinkling grass,
 Rain-awakened flowers,
 All that ever was
 Joyous and clear and fresh thy music doth surpass. 10

Teach us, sprite or bird,
 What sweet thoughts are thine !
 I have never heard
 Praise of love or wine
 That panted forth a flood of rapture so divine. 15

Chorus hymeneal
 Or triumphal chant,
 Matched with thine, would be all
 But an empty vaunt, —
 A thing wherein we feel there is some hidden want. 20

What objects are the fountains
 Of thy happy strain ?
 What fields or waves or mountains ?
 What shapes of sky or plain ?
 What love of thine own kind ? what ignorance of pain ? 25

With thy clear keen joyance
 Languor cannot be ;
 Shadow of annoyance
 Never came near thee ;
 5 Thou lovest, but ne'er knew love's sad satiety.

Waking or asleep,
 Thou of death must deem
 Things more true and deep
 Than we mortals dream,
 10 Or how could thy notes flow in such a crystal stream ?

We look before and after,
 And pine for what is not ;
 Our sincerest laughter
 With some pain is fraught ;
 15 Our sweetest songs are those that tell of saddest
 thought.

Yet if we could scorn
 Hate and pride and fear ;
 If we were things born
 Not to shed a tear,
 20 I know not how thy joy we ever should come near.

Better than all measures
 Of delightful sound,
 Better than all treasures
 That in books are found,
 25 Thy skill to poet were, thou scorner of the ground.

Teach me half the gladness
 That thy brain must know,
 Such harmonious madness
 From my lips would flow,
 The world should listen then, as I am listening now ! s

Ůn prē mēd'ī tāt ǎd : unplanned ; unthought of beforehand.
 Ē'ven : a poetic form of the word evening. Ā ē'ri al : airy.
 Vēr'nal : spring. Hỹ mē nē'al : of a marriage song. Vāunt :
 boast. Joy'ange : a poetical word for joyfulness. Lān'guor
 (gwēr) : weariness. Sā ti'ē tỹ : excess of gratification ; surfeit.
 Fraught : freighted ; filled.

Sir Kenneth and the Flag

BY SIR WALTER SCOTT

Sir Walter Scott (1771-1832) : A Scottish novelist, poet, and historian. The most popular of his novels are "Old Mortality," "Ivanhoe," "Kenilworth," "The Talisman," "Quentin Durward," and "The Heart of Midlothian." His best poems are "The Lay of the Last Minstrel," "Marmion," and "The Lady of the Lake." A sketch of Scott's life will be found in the Fifth Book of the "Graded Literature Readers."

The following selection is from "The Talisman," the scene of which is laid in Palestine during one of the Crusades undertaken by Christian nations for the recovery of the Holy Land from the Turks. Sir Kenneth was a Scottish prince in disguise, who had joined the army of Richard, the English king. Sir Kenneth had been left to guard the English flag, but had been lured from his post, and during his absence the flag had

been torn down. He went at once to King Richard's tent to report his failure in the performance of duty.

I

It was about the hour of sunrise when a slow, armed tread was heard approaching the king's pavilion; and ere De Vaux, who slumbered beside his master's bed as lightly as ever sleep sat upon the
5 eyes of a watchdog, had time to do more than arise and say, "Who comes?" the Knight of the Leopard entered the tent, with deep and devoted gloom seated upon his manly features.

"Whence this bold intrusion, Sir Knight?" said
10 De Vaux, sternly, yet in a tone which respected his master's slumbers.

"Hold! De Vaux," said Richard, awaking on the instant; "Sir Kenneth cometh like a good soldier to render an account of his guard; to such the
15 general's tent is ever accessible." Then rising from his slumbering posture and leaning on his elbow, he fixed his large bright eye upon the warrior: "Speak, Sir Scot; thou comest to tell me of a vigilant, safe, and honorable watch, dost thou not?
20 The rustling of the folds of the banner of England were enough to guard it, even without the body of such a knight as men hold thee."

"As men will hold me no more," said Sir Kenneth; "my watch hath neither been vigilant, safe,

nor honorable. The banner of England has been carried off."

"And thou alive to tell it?" said Richard. "Away, it cannot be. There is not even a scratch on thy face. Why dost thou stand thus mute? Speak the truth; it is ill jesting with a king, yet I will forgive thee if thou hast lied."

"Lied, Sir King!" returned the unfortunate knight, with fierce emphasis, and one glance of fire from his eye, bright and transient as the flash from the cold and stony flint. "But this also must be endured. I have spoken the truth."

"By Saint George!" said the king, bursting into fury, which, however, he instantly checked — "De Vaux, go view the spot. This fever has disturbed his brain. This cannot be. The man's courage is proof. It *cannot* be! Go speedily — or send, if thou wilt not go."

The king was interrupted by Sir Henry Neville, who came, breathless, to say that the banner was gone, and the knight who guarded it overpowered, and most probably murdered, as there was a pool of blood where the banner spear lay shivered.

"But whom do I see here?" said Neville, his eyes suddenly resting upon Sir Kenneth. 25

"A traitor," said the king, starting to his feet and seizing the battle-ax which was ever near his bed, "a traitor! whom thou shalt see die a traitor's

death." And he drew back the weapon as in act to strike.

Colorless, but firm as a marble statue, the Scot stood before him, with his bare head uncovered by any protection, his eyes cast down to the earth, his lips scarcely moving, yet muttering probably in prayer. Opposite to him, and within the due reach for a blow, stood King Richard, his large person wrapt in the folds of his *camecia* or ample gown of linen, except where the violence of his action had flung the covering from his right arm and shoulder. He stood for an instant, prompt to strike—then sinking the head of the weapon toward the ground, he exclaimed, "But there was blood, Neville; there was blood upon the place. Hark thee, Sir Scot—brave thou wert once, for I have seen thee fight. Say thou hast slain two of the thieves in defense of the standard—say but one—say thou hast struck but a good blow in our behalf, and get thee out of the camp with thy life and thy disgrace!"

"You have called me a liar, my lord king," replied Kenneth, firmly; "and therein, at least, you have done me wrong. Know that there was no blood shed in defense of the standard save that of a poor hound, which, more faithful than his master, defended the charge which he deserted."

"Now, by Saint George!" said Richard, again heaving up his arm. But De Vaux threw himself

between the king and the object of his vengeance, and spoke with the blunt truth of his character: "My liege, this must not be — here, nor by your own hand. It is enough of folly for one night and day, to have intrusted your banner to a Scot; — said I not ⁵ they were ever fair and false?"

"Thou didst, De Vaux; thou wast right, and I confess it," said Richard. "I should have known him better. And yet, De Vaux, it is strange," he added, "to see the bearing of the man. Coward or ¹⁰ traitor he must be, yet he abode the blow of Richard Plantagenet, as our arm had been raised to lay knighthood on his shoulder. Had he shown the slightest sign of fear, had but a joint trembled or an eyelid quivered, I had shattered his head like a ¹⁵ crystal goblet. But I cannot strike where there is neither fear nor resistance. — Away with him, De Vaux," he whispered, "through the back entrance of our tent; coop him up close, and answer for his safe keeping with your life. And hark ye, he is presently ²⁰ to die; let him have a priest — we would not kill soul and body. And stay — hark thee — we will not have him dishonored; he shall die knightlike, in his belt and spurs; for, if his treachery be black, his boldness matches it." ²⁵

De Vaux, right glad, if the truth may be guessed, that the scene ended without Richard's descending to the unkingly act of himself slaying an unresisting

prisoner, made haste to remove Sir Kenneth to a separate tent, where he was disarmed and put in fetters for security.

* * * * *

The Saracen physician, who had saved Richard's life, entered the king's pavilion soon after the Scottish knight had been dismissed.

"Ha! my learned Hakim," said the king; "come, I hope, to tax our generosity. In what can I pleasure you?"

10 "Great king," said El Hakim, making his profound Oriental obeisance, "let thy servant speak one word and yet live. I would remind thee that thou owest — not to me, their humble instrument, but to the Intelligences whose benefits I dispense to mortals — a
15 life —"

"And I warrant me, thou wouldst have another in requital, ha?" interrupted the king.

"Such is my humble prayer," said the Hakim, "to the great Melech Ric; even the life of this good
20 knight, who is doomed to die."

"Take the freedom of a thousand captives instead," said Richard; "restore so many of thy countrymen to their tents and families, and I will give the warrant instantly. This man's life can avail thee
25 nothing, and it is forfeited."

"All our lives are forfeited," said the Hakim, putting his hand to his cap. "But the great Creditor is

merciful and exacts not the pledge rigorously nor untimely."

"Thou canst show me," said Richard, "no special interest thou hast to become intercessor betwixt me and the execution of justice, to which I am sworn as 5 a crowned king."

"Thou art sworn to the dealing forth mercy as well as justice," said El Hakim; "but what thou seekest, great king, is the execution of thine own will. Bethink thee, lord king, that though thou canst 10 slay thousands, thou canst not restore one man to health. Kings have the power of Satan to torment, sages that of Allah to heal; beware how thou hinderest the good to humanity, which thou canst not thyself render. Thou canst cut off the head, but not 15 cure the aching tooth."

"This is over insolent," said the king, hardening himself, as the Hakim assumed a more lofty and almost a commanding tone. "We took thee for our leech, not for our counselor or conscience-keeper." 20

"And is it thus the most renowned prince of Frangistan repays benefit done to his royal person?" said El Hakim, exchanging the humble and stooping posture in which he had hitherto solicited the king for an attitude lofty and commanding. "Know 25 then," he said, "that through every court of Europe and Asia, to Moslem and Nazarene, to knight and lady, wherever harp is heard and sword worn,

wherever honor is loved and infamy detested, to every quarter of the world will I denounce thee, Melech Ric, as thankless and ungenerous ; and even the lands, if there be any such, that never heard of thy
 5 renown, shall yet be acquainted with thy shame ! ”

“ Are these terms to me, vile infidel ! ” said Richard, striding up to him in fury. “ Art weary of thy life ? ”

“ Strike ! ” said El Hakim ; “ thine own deed shall then paint thee more worthless than could my words,
 10 though each had an hornet’s sting. ”

Richard turned fiercely from him, folded his arms, traversed the tent as before, and then exclaimed, “ Thankless and ungenerous ? as well be termed coward and infidel ! Hakim, thou hast chosen thy
 15 boon ; and though I had rather thou hadst asked my crown jewels, yet I may not kinglike refuse thee. Take this Scot, therefore, to thy keeping ; the provost will deliver him to thee on this warrant. ” He hastily traced one or two lines and gave them to the
 20 physician. “ Use him as thy bond slave, to be disposed as thou wilt, only let him beware how he comes before the eyes of Richard. ”

II

The physician was none other than Saladin, the Syrian monarch, in disguise. Sir Kenneth, who had won his favor as a worthy foeman, was conducted to the Saracen camp and treated with great courtesy. But he was unhappy over his disgrace

and longed to rejoin the Crusaders. Saladin, therefore, instructed him how he might detect the culprit by means of his dog, which had been wounded while defending the banner; then, disguised as a Nubian slave, Sir Kenneth was sent back to the English camp. He undertook to discover the culprit for Richard, and was stationed by the king's side as the Crusading host passed before him in review.

Surrounded by his valiant peers of England and Normandy, Cœur de Lion stood on the summit of Saint George's Mount, with the banner of England by his side, borne by William with the Long Sword, Earl of Salisbury.

5

The powers of the various Crusading princes, arrayed under their royal and princely leaders, swept in long order around the base of the little mound; and as those of each different country passed by, their commanders advanced a step or two up the hill and made a signal of courtesy to Richard and to the standard of England.

The long files marched on, and, diminished as they were by so many causes, appeared still an iron host, to whom the conquest of Palestine might seem an easy task. The soldiers, inspired by the consciousness of united strength, sat erect in their steel saddles, while it seemed that the trumpets sounded more cheerfully shrill, and the steeds, refreshed by rest and provender, chafed on the bit and trod the ground more proudly. On they passed, troop after troop,

20

banners waving, spears glancing, plumes dancing — a host composed of different nations, complexions, languages, arms, and appearances, but all fired for the time with the holy yet romantic purpose of rescuing Jerusalem and redeeming the sacred earth, which more than mortal had trodden, from the yoke of the unbelieving pagan. And the species of courtesy rendered to the king of England by so many warriors was the willing homage which the brave paid to the bravest, in an expedition where the greatest courage was necessary to success.

The good king was seated on horseback about halfway up the mount, a helmet on his head, surmounted by a crown, which left his manly features exposed to public view, as, with cool and considerate eye, he looked on each rank as it passed him, and returned the greetings of the leaders. His tunic was of sky-colored velvet, covered with plates of silver, and his hose of crimson silk slashed with cloth of gold. By his side stood the seeming Ethiopian slave, holding the noble dog in a leash such as was used in woodcraft. It was a circumstance which attracted no notice, for many of the princes of the Crusade had introduced black slaves into their household, in imitation of the barbarous splendor of the Saracens. Over the king's head streamed the large folds of the banner, and, as he looked to it from time to time, he seemed to regard a ceremony, indifferent

to himself personally, as important when considered as offered to the kingdom which he ruled. In the background and on the very summit of the mount, a wooden turret, erected for the occasion, held the queen and the principal ladies of the court. To this the king looked from time to time, and often his eyes were turned on the Nubian and the dog, but only when such leaders approached, as, from circumstances of previous ill-will, he suspected of being accessory to the theft of the standard, or whom he judged capable of a crime so mean.

Thus, he did not look in that direction when Philip Augustus of France approached at the head of his splendid troops; nay, he anticipated the motions of the French king, by descending the mount as the latter came up the ascent, so that they met in the middle space, and blended their greetings so gracefully that it appeared they met in fraternal equality.

The troops of the Marquis of Montserrat next passed in order before the king of England. Before this band came Conrade, in the same garb with the troops, but of such rich stuff that he seemed to blaze with gold and silver, and the milk-white plume fastened in his cap by a clasp of diamonds, seemed tall enough to sweep the clouds. The noble steed which he reined bounded and displayed his spirit in a manner which might have troubled a less admirable horseman than the marquis, who gracefully ruled

him with one hand. Yet his authority over the troops was more in show than in substance; for there paced beside him, on an ambling palfrey of soberest mood, a little old man, dressed entirely in black, without beard or mustaches, and having an appearance altogether mean and insignificant when compared with the blaze of splendor around him. But this mean-looking old man was one of those deputies whom the Venetian government sent into camps to overlook the conduct of their generals, and to maintain that jealous system of espial and control which had long been the policy of the republic.

Conrade, who had attained a certain degree of favor with Richard, no sooner was come near than the king descended a step or two to meet him, exclaiming, at the same time: "Ha, Lord Marquis, thou at the head of thy troops and thy black shadow attending thee as usual, whether the sun shines or not! May not one ask thee whether the rule of the troops remains with the shadow or the substance?"

Conrade was commencing his reply with a smile, when Roswal, the noble hound, uttering a furious and savage yell, sprang forward. The Nubian at the same time slipped the leash, and the hound rushing on leaped upon Conrade's noble charger, and, seizing the marquis by the throat, pulled him down from the saddle. The plumed rider lay rolling on the sand, and the frightened horse fled in wild career through the camp.

"Thy hound hath pulled down the right quarry, I warrant him," said the king to the Nubian. "Pluck the dog off lest he throttle him."

The Ethiopian, accordingly, though not without difficulty, disengaged the dog from Conrade, and ⁵ fastened him up still highly excited and struggling in the leash. Meanwhile many crowded to the spot, especially followers of Conrade, who, as they saw their leader lie gazing wildly on the sky, raised him up amid a cry of, "Cut the slave and his hound ¹⁰ to pieces!"

But the voice of Richard was heard clear above all other exclamations: "He dies the death who injures the hound! He hath but done his duty, after the sagacity with which God and nature have endowed ¹⁵ the brave animal. Stand forward for a false traitor, thou Conrade, Marquis of Montserrat! I impeach thee of treason."

Several of the leaders had now come up, and Conrade, vexation and confusion struggling with passion ²⁰ in his manner and voice, exclaimed: "What means this?—With what am I charged?—Why this base usage and these reproachful terms?"

"Are the princes of the Crusade turned hares or deers in the eyes of King Richard, that he should ²⁵ slip hounds on them?" said the deep voice of the Grand Master of the Templars.

"It must be some singular accident, some fatal

mistake," said Philip of France, who rode up at the same moment.

"A trick of the Saracens," cried Henry of Champagne. "It were well to hang up the dog and put
5 the slave to the torture."

"Let no man lay hand upon them," said Richard, "as he loves his own life! Conrade, stand forth, if thou darest, and deny the accusation which this mute animal hath in his noble instinct brought against thee,
10 of injury done to him and foul scorn to England."

"I never touched the banner," said Conrade, hastily.

"Thy words betray thee, Conrade!" said Richard; "for how didst thou know, save from conscious guilt,
15 that the question is concerning the banner?"

"Hast thou then not kept the camp in turmoil on that and no other score?" answered Conrade; "and dost thou impute to a prince and an ally a crime, which, after all, was probably committed by some
20 petty thief for the sake of the gold thread? Or wouldst thou now impeach a confederate on the credit of a dog?"

By this time the alarm was becoming general, so that Philip of France interposed.

25 "Princes and nobles," he said, "you speak in presence of those whose swords will soon be at the throats of each other, if they hear their leaders at such terms together. In the name of Heaven, let us

draw off, each his own troops, into their separate quarters, and ourselves meet an hour hence in the Pavilion of Council, to take some order in this new state of confusion."

"Content," said King Richard, "though I should 5 have liked to have interrogated that caitiff while his gay doublet was yet besmirched with sand. But the pleasure of France shall be ours in this matter."

The council assembled at the appointed hour: Conrade had in the meanwhile laid aside his dis-10 honored dress, and with it the shame and confusion which, in spite of his talents and promptitude, had at first overwhelmed him, owing to the strangeness of the accident and suddenness of the accusation. He was now robed like a prince, and entered the council-15 chamber attended by several other potentates, who made a show of supporting him and defending his cause, chiefly perhaps from political motives or because they themselves nourished a personal enmity against Richard.

20

This appearance of union in favor of Conrade was far from influencing the king of England. He entered the council with his usual indifference of manner, and in the same dress in which he had just alighted from horseback. He cast a careless and 25 somewhat scornful glance on the leaders who had arranged themselves around Conrade, as if owning his cause, and in the most direct terms charged

Conrade of Montserrat with having stolen the banner of England, and wounded the faithful animal who stood in its defense.

Conrade arose boldly to answer, and in despite, 5 as he expressed himself, of man and brute, king or dog, asserted his innocence of the crime charged.

“Brother of England,” said Philip, “this is an unusual impeachment. We do not hear you assert your own knowledge of this matter, farther than 10 your belief resting upon the demeanor of this hound toward the Marquis of Montserrat. Surely the word of a knight and a prince should bear him out against the barking of a cur?”

“Royal brother,” returned Richard, “recollect that 15 the Almighty, who gave the dog to be companion of our pleasures and our toils, hath given him a nature noble and incapable of deceit. He forgets neither friend nor foe, remembers with accuracy both benefit and injury. He hath a share of man’s intelligence, 20 but no share of man’s falsehood. You may bribe a soldier to slay a man with his sword, or a witness to take life by false accusation; but you cannot make a hound tear his benefactor,—he is the friend of man, save when man justly incurs his enmity. Dress 25 yonder marquis in what peacock-robcs you will, disguise his appearance, alter his complexion with drugs and washes, hide him amidst an hundred men—I will yet pawn my scepter that the hound detects him

and expresses his resentment, as you have this day beheld. This is no new incident, although a strange one. Murderers and robbers have been ere now convicted and suffered death under such evidence, and men have said that the finger of God was in it. ⁵ Credit me, royal brother, that hidden crimes have often been brought to light by the testimony even of inanimate substances, not to mention animals far inferior in instinctive sagacity to the dog who is the friend and companion of our race.” 10

III

It was finally resolved that the matter should be decided, according to the custom of the time, by the trial of battle, Conrade on the one side and the champion of King Richard on the other. The king, who by this time had recognized in the Nubian slave the person of Sir Kenneth, relented toward him and commissioned him to find a champion in the Saracen camp, thus giving the disgraced knight an opportunity to vindicate himself.

The station called the Diamond of the Desert was assigned by Saladin for the place of conflict, as being nearly at an equal distance betwixt the Christian and Saracen camps. It was agreed that Conrade of Montserrat, the defendant, should appear there on the day ¹⁵ fixed for the combat, with an hundred armed followers and no more ; that Richard of England should attend with the same number, to protect his champion ; and

that the sultan should bring with him a guard of five hundred chosen followers, a band considered as not more than equal to the two hundred Christian lances.

The Diamond of the Desert, so lately a solitary
5 fountain distinguished only amid the waste by solitary groups of palm trees, was now the center of an encampment, the embroidered flags and gilded ornaments of which glittered far and wide and reflected a thousand rich tints against the setting sun. The
10 coverings of the large pavilions were of the gayest colors, scarlet, bright yellow, pale blue, and other gaudy and gleaming hues, and the tops of their pillars, or tent-poles, were decorated with golden pomegranates and small silken flags.

15 It had been agreed on account of the heat of the climate that the combat should take place at one hour after sunrise. The wide lists inclosed a space of hard sand, which was one hundred and twenty yards long by forty in width. They extended in
20 length from north to south, so as to give both parties the equal advantage of the rising sun. Saladin's royal seat was erected on the western side of the inclosure, just in the center where the combatants were expected to meet. Opposite this was a gallery
25 for the queen of England and her ladies.

The knights rode into the lists armed at all points and mounted like men who were to do battle for a kingdom's honor. They wore their visors up, and,

riding around the lists three times, showed themselves to the spectators.

Both were goodly persons and both had noble countenances. But there was an air of manly confidence on the brow of the Scot, a radiancy of hope, 5 which amounted to cheerfulness; while, although pride and effort had recalled much of Conrade's natural courage, there lowered still on his brow a cloud of gloom. Even his steed seemed to tread less lightly and blithely to the trumpet sound than the noble 10 Arab which was bestrode by Sir Kenneth.

An altar was erected just beneath the gallery occupied by the queen. To this altar the challenger and defender were brought forward one after the other. Dismounting before it, each knight asserted the justice 15 of his cause, and prayed that his success might be according to his truth or falsehood. They also made oath that they came to do battle in knightly way and with the usual weapons, disclaiming the use of spells, charms, or magical devices. 20

The Scottish knight pronounced his vow with a firm and manly voice, and a bold and cheerful countenance. Then, loaded with armor as he was, he sprang to the saddle without the use of the stirrup.

Conrade also presented himself before the altar 25 with boldness enough; but his voice as he took the oath sounded hollow, as if drowned in his helmet. The lips with which he appealed to Heaven to give

victory to the just quarrel, grew white as he uttered the words.

The silence of suspense was now general; men breathed thicker, and their very souls seemed seated
5 in their eyes, while not a sound was to be heard save the snorting and pawing of the good steeds, who, sensible of what was about to happen, were impatient to dash into career. They stood thus for perhaps three minutes, when, at a signal given by the sultan,
10 an hundred instruments rent the air with their brazen clamors, and each champion striking his horse with the spurs and slacking the rein, the horses started into full gallop, and the knights met in mid space with a shock like a thunderbolt. The victory was
15 not in doubt — no, not one moment. Conrade, indeed, showed himself a practiced warrior; for he struck his antagonist knightly in the midst of his shield, bearing his lance so straight and true that it shivered into splinters from the steel spear-head up
20 to the very gauntlet. The horse of Sir Kenneth recoiled two or three yards and fell on his haunches, but the rider easily raised him with hand and rein. But for Conrade there was no recovery. Sir Kenneth's lance had pierced through the shield, through a plated
25 corselet of Milan steel, through a secret, or coat of linked mail, worn beneath the corselet, had wounded him deep in the bosom, and borne him from his saddle, leaving the truncheon of the lance fixed in

his wound. The sponsors, heralds, and Saladin himself descending from his throne, crowded around the wounded man; while Sir Kenneth, who had drawn his sword ere yet he discovered that his antagonist was totally helpless, now commanded him to avow his guilt. The helmet was hastily unclosed, and the wounded man, gazing wildly on the skies, replied; "What would you more? — God hath decided justly — I am guilty!"

I. **De Vaux** (vō). **Richard Plān tǎg'e nőt** (1157–1199): an English king called *Cœur de Lion* (kūr de lē'ōng), the Lion Heart. **Āc çēs'i ble**: easy of access; approachable. **Trān'sient** (shēnt): passing quickly away; not lasting. **Cà mēs'ci ā. Liēge**: king. **Ā bōde'**: awaited. **Hā'kim**: a wise man; a physician, especially among the Mohammedans. **Rē quit'al**: return for something done; reward. **Mē'lēch Ric**: a Saracen name for King Richard. **Āl'lāh**: the Mohammedan name for God. **Lēech**: an old word for physician. **Nāz ā rēne'**: a follower of Christ, the Nazarene; a Christian, usually in contempt. **Bōon**: gift. **Prōv'ōst**: keeper of the prison, — an old use of the word.

II. **Prōv'ēn dēr**: food, especially for domestic animals. **Tū-nic**: a loose-fitting garment. **Tūr'rēt**: a small tower. **Āc çēs'sō rỹ**: connected with as a helper. **Phillip II.** (1165–1223): king of France, called Augustus, the Imperial. **Mōnt'sēr rāt. Pāl'-freỹ**: a small saddle horse. **Ēs pi'al**: spying. **Īm pēach'**: charge; accuse. **Cāi'tiff**: base fellow; wicked man. **Bē-smīrched'**: soiled; discolored. **Pō'ten tātes**: princes; kings. **Īn cūrā'**: meets with; exposes one's self to.

III. **Dē fēnd'ant**: a person required to make answer in a law case. **Viā'orā**: movable front pieces of helmets. **Cōrse'lēt**: armor for the whole body. **Trūn'cheon** (shūn): handle.

Song on a May Morning

BY JOHN MILTON

John Milton (1608–1674): One of the greatest of English authors. He is the noblest type of the Puritan. "The Defense of the English People," "Tractate on Education," "Areopagitica," and his other prose pamphlets are models of stately English. "Paradise Lost," "Paradise Regained," "Comus," "L'Allegro," and "Il Penseroso" are his principal poems.

Now the bright morning star, day's harbinger,
Comes dancing from the east, and leads with her
The flowery May, who from her green lap throws
The yellow cowslip and the pale primrose.

- 5 Hail, bounteous May, that dost inspire
Mirth and youth and warm desire!
Woods and groves are of thy dressing,
Hill and dale doth boast thy blessing.
Thus we salute thee with our early song,
10 And welcome thee, and wish thee long.

Love thyself last; cherish those hearts that hate thee:
Corruption wins not more than honesty.
Still in thy right hand carry gentle peace,
To silence envious tongues; be just, and fear not.

— SHAKSPERE

Good Books

FROM "SESAME AND LILIES," BY JOHN RUSKIN

All books are divisible into two classes: the books of the hour, and the books of all time. Mark this distinction,—it is not one of quality only. It is not merely the bad book that does not last, and the good one that does. It is a distinction of species. There ⁵ are good books for the hour, and good ones for all time; bad books for the hour, and bad ones for all time.

The good book of the hour — I do not speak of the bad ones — is simply the useful or pleasant talk of ¹⁰ some person whom you cannot otherwise converse with, printed for you. Very useful often, telling you what you need to know; very pleasant often, as a sensible friend's present talk would be. These bright accounts of travels; good-humored and witty discus- ¹⁵ sions of questions; lively or pathetic story-telling in the form of novel; firm fact-telling, by the real agents concerned in the events of passing history; — all these books of the hour multiplying among us as education becomes more general, are a peculiar possession of ²⁰ the present age: we ought to be entirely thankful for them, and entirely ashamed of ourselves if we make no good use of them.

But we make the worst possible use if we allow them to usurp the place of true books: for, strictly ²⁵

speaking, they are not books at all, but merely letters or newspapers in good print. Our friend's letter may be delightful or necessary to-day: whether worth keeping or not, is to be considered. The newspaper
 5 may be entirely proper at breakfast time, but assuredly it is not reading for all day. So, though bound up in a volume, the long letter which gives you so pleasant an account of the inns and roads and weather last year at such a place, or which tells you that amusing
 10 story, or gives you the real circumstances of such and such events, however valuable for occasional reference, may not be, in the real sense of the word, a "book" at all, nor, in the real sense, to be "read."

A book is essentially not a talked thing, but a
 15 written thing; and written, not with a view of mere communication, but of permanence. The book of talk is printed only because its author cannot speak to thousands of people at once; if he could, he would—the volume is mere multiplication of his voice. You
 20 cannot talk to your friend in India; if you could, you would; you write instead; that is mere conveyance of voice. But a book is written, not to multiply the voice merely, not to carry it merely, but to perpetuate it.

25 The author has something to say which he perceives to be true and useful, or helpfully beautiful. So far as he knows, no one has yet said it; so far as he knows, no one else can say it. He is bound to say

it, clearly and melodiously if he may ; clearly, at all events. In the sum of his life he finds this to be the thing or group of things manifest to him ;—this, the piece of true knowledge or sight which his share of sunshine and earth has permitted him to seize. He would fain set it down forever, engrave it on rock if he could, saying : “ This is the best of me ; for the rest, I ate and drank and slept, loved and hated, like another ; my life was as the vapor, and is not ; but this I saw and knew : this, if anything of mine, is worth your memory.” That is his “ writing ;” it is, in his small human way, and with whatever degree of true inspiration is in him, his inscription, or scripture. That is a “ book.”

Now, books of this kind have been written in all ages by their greatest men,—by great readers, great statesmen, and great thinkers. These are all at your choice ; and life is short.

You have heard as much before ; yet, have you measured and mapped out this short life and its possibilities ? Do you know if you read this you cannot read that—that what you lose to-day you cannot gain to-morrow ? Will you go and gossip with your housemaid or your stable-boy, when you may talk with queens and kings ; or flatter yourselves that it is with any worthy consciousness of your own claims to respect, that you jostle with the hungry and common crowd for *entrée* here, and audience there, when

all the while this eternal court is open to you, with its society, wide as the world, multitudinous as its days, the chosen and the mighty, of every place and time? Into that you may enter always; in that
 5 you may take fellowship and rank according to your wish; from that, once entered into it, you can never be an outcast but by your own fault; by your aristocracy of companionship there, your own inherent aristocracy will be assuredly tested, and the motives
 10 with which you strive to take high place in the society of the living, measured, as to all the truth and sincerity that are in them, by the place you desire to take in this company of the dead.

“The place you desire,” and the place you fit yourself for, I must also say; because, observe, this court of the past differs from all living aristocracy in this:—it is open to labor and to merit, but to nothing else. No wealth will bribe, no name overawe, no artifice deceive the guardian of those Elysian gates. In the
 20 deep sense, no vile or vulgar person ever enters there. There is but brief question:—“Do you deserve to enter? Pass. Do you ask to be the companion of nobles? Make yourself noble, and you shall be. Do you long for the conversation of the wise? Learn to
 25 understand it, and you shall hear it. But on other terms?—no. If you will not rise to us, we cannot stoop to you. The living lord may assume courtesy, the living philosopher explain his thought to you

with considerate pain ; but here we neither feign nor interpret ; you must rise to the level of our thoughts if you would be gladdened by them, and share our feelings if you would recognize our presence."

This, then, is what you have to do, and I admit 5 that it is much. You must, in a word, love these people, if you are to be among them. No ambition is of any use. They scorn your ambition. You must love them, and show your love by a true desire to be taught by them, and to enter into their thoughts. 10 To enter into theirs, observe ; not to find your own expressed by them. If the person who wrote the book is not wiser than you, you need not read it ; if he be, he will think differently from you in many respects. 15

Very ready we are to say of a book, "How good this is, — that's exactly what I think!" But the right feeling is, "How strange that is! I never thought of that before, and yet I see it is true ; or if I do not now, I hope I shall some day." But 20 whether thus submissively or not, at least be sure that you go to the author to get at his meaning, not to find yours. Judge it afterward if you think yourself qualified to do so ; but ascertain it first. And be sure also, if the author is worth anything, 25 that you will not get at his meaning all at once ; — nay, that at his whole meaning you will not for a long time arrive in any wise. The wise men make

themselves sure that you deserve their deeper thought before they allow you to reach it. It is the same with the physical type of wisdom, gold. There seems to you and me no reason why the electric forces of
 5 the earth should not carry whatever there is of gold within it at once to the mountain tops, so that kings and people might know that all the gold they could get was there; and without any trouble of digging or anxiety or chance or waste of time, cut it away
 10 and coin as much as they needed. But nature does not manage it so. She puts it in little fissures in the earth, nobody knows where; you may dig long and find none; you must dig painfully to find any.

And it is just the same with men's best wisdom.
 15 When you come to a good book you must ask yourself: "Am I inclined to work as an Australian miner would? Are my pickaxes and shovels in good order, and my breath good, and my temper?"

And keeping the figure a little longer, even at the
 20 cost of tiresomeness, for it is a thoroughly useful one, the metal you are in search of being the author's mind or meaning, his words are as the rock which you have to crush and smelt in order to get at it. And your pickaxes are your own care, wit, and learn-
 25 ing; your smelting furnace is your own thoughtful soul.

Do not hope to get at any good author's meaning without those tools and that fire; often you will

need sharpest, finest chiseling and patientest fusing, before you can gather one grain of the metal.

Pěr pět'û āte: cause to endure; preserve for all time. **En-trée'** (ăn trā): A French word meaning entrance; the right to come in. **Īn hēr'ent**: natural; inborn. **Ē lyŋ'ian** (Īzh an): pertaining to Elysium, the land of the blest. **Feign**: pretend. **Ās gēr tāin'**: find out; make certain. **Fig'ūre**: a mode of expressing ideas by words which suggest pictures.

Silvia

BY WILLIAM SHAKSPERE

William Shakspeare (1564–1616): The greatest of English poets. Among his plays are "Hamlet," "Othello," "Julius Cæsar," and "The Merchant of Venice." A biographical sketch of Shakspeare will be found in the Fifth Book of the "Graded Literature Readers."

This song occurs in the play of "The Two Gentlemen of Verona."

Who is Silvia? what is she,
That all our swains commend her?
Holy, fair, and wise is she;
The Heaven such grace did lend her,
That she might admired be.

5

Is she kind as she is fair,
For beauty lives with kindness?
Love doth to her eyes repair,
To help him of his blindness;
And, being helped, inhabits there.

10

Then to Silvia let us sing,
 That Silvia is excelling;
 She excels each mortal thing
 Upon the dull earth dwelling :
 5 To her let us garlands bring.

Wonders of the Deep Sea

BY REV. THEODORE WOOD

I

Not very many years ago, it was supposed that life was altogether absent in the deeper parts of the sea. Now we know that this is not the case. Expeditions of scientific men have been sent out by different countries to dredge in very deep water, and their discoveries have clearly proved that fishes, mollusks, crustaceans, and even the soft-bodied sea anemones are capable of living more than three miles below the surface of the ocean.

15 To those profound depths no ray of sunlight can ever penetrate; and, though many of the deep-sea creatures possess eyes, we might think that they would never have an opportunity of using them. For to see in absolute darkness is impossible. We often
 20 say, it is true, that cats can see in the dark; but the fact is, that even on the darkest night there is always some little light, while a cat's eyes are made in such

a way that they can take in many more rays of light than our eyes. The animal, consequently, is able to see clearly when we ourselves can scarcely see at all. But at the bottom of the sea the darkness is almost complete, so that to the creatures of the deep, eyes would seem useless.

But that is not all. The bodies of these animals must be able to resist an almost inconceivable pressure. We ourselves, living at the bottom of the ocean of air, have to endure an atmospheric pressure of fifteen pounds to the square inch ; that is to say, the weight of the air above us is so great, that it presses upon every part of our bodies with exactly that degree of force.

If, however, we dive under water, we have to bear the pressure of the water in addition to this ; and as water is very much heavier than air, this pressure soon becomes so great that even a trained diver cannot descend to a depth of more than fifty fathoms.

20

Now, fishes and other animals have been found at a depth of over three miles. This means that they have to endure, upon every square inch of their bodies, a pressure of rather more than two tons and a half, or five-and-twenty times the force required to drive a railway train at a high rate of speed. It would seem impossible that any living creature could resist a pressure so tremendous.

Nevertheless, the inhabitants of the deep sea are somewhat numerous. More than twenty kinds of fishes alone have been found at a depth of more than two thousand fathoms; and, as only a very small
5 portion of the ocean-bed has as yet been explored, we may feel quite certain that a great many more still remain to be discovered.

Strange to say, although these fishes live at depths so profound, they are not entirely destitute of light.
10 The sun's rays cannot reach them, it is true; but, on the other hand, they are very frequently themselves luminous. In some cases their whole bodies glow with phosphorescent light, which seems to issue from the slime with which the skin is covered; in others
15 the light proceeds from a double row of curious eye-like organs, which run along the sides from the head almost to the tail. Thus these animals are independent of sunlight. They are their own lightgivers. They dwell in the midst of absolute darkness, and
20 yet are always able to see.

One of these luminous fishes uses its light for a very remarkable purpose.

It is a creature of prey, feeding entirely upon other fishes; and its appetite is so voracious that it always
25 appears to be hungry. Yet it is so slow in its movements that it is quite unable to pursue and overtake its victims. Nature, however, has provided it with an apparatus which is admirably adapted for luring

those victims to their fate. The first or front fin of the back is wanting; but its place is taken by a long, slender spine, the base of which is fastened to the bones of the back by a kind of ring-and-staple attachment, so that it can be freely moved in any⁵ direction. At the end of this spine is a flattened tip, which is highly luminous.

Now, fishes are extremely inquisitive creatures. Any strange object invariably rouses their curiosity, and they are especially attracted by anything that¹⁰ glitters or shines. Anglers, for example, often catch pike and other fishes by means of a spoon bait, which is simply a piece of polished tin armed with hooks, and fastened to the line in such a manner that it revolves rapidly when drawn through the water.¹⁵ Now, the luminous spine of this deep-sea fish is simply a natural spoon bait, and all that its owner has to do when it feels hungry is to dangle it up and down in front of its mouth. All the small fishes in the neighborhood are sure to come and examine it,²⁰ only to be snapped up by the jaws of their foe as soon as they venture within its reach.

How successful this remarkable fish is in its angling, may be judged from the number of victims sometimes captured by its near relation, the fishing frog, which²⁵ is found not uncommonly in shallower water. In the stomach of one of these fishes which was killed and opened immediately after capture, were found no

fewer than seventy-five herrings, while another had swallowed twenty-five flounders.

The fishing frog.

There is an eel of the deep sea, however, which can dispose of even larger meals than these, for it
5 has actually been known to swallow fishes of greater size than itself. This may seem impossible: the fact is that its jaws, like those of a python, can be separated to a surprising extent, while the flesh of its throat and body is exceedingly elastic. In one
10 of these fishes, when brought to the surface, was found the twisted-up body of another fish three times as long as itself; from another were taken victims amounting to nearly five times its own weight; while

a third had swallowed a captive so large that it had actually dislocated its own fins in doing so !

II

But how do these deep-sea fishes contrive to resist the enormous pressure which throughout their lives they have to sustain ?

5

That is not an easy question to answer. All we can say is that the whole framework of their bodies is so flimsy, that it could not perform its functions without a great weight of water to hold it, as it were, together, and that the gases contained in their swim-10 ming-bladders, and dissolved in their blood, neutralize the pressure to some extent, and enable them to live at depths to which otherwise they could never descend.

Owing to this fact, it is very difficult indeed to 15 obtain specimens of these fishes in perfect condition. As soon as they are raised from the bottom, the pressure begins to decrease, and the gases in their bodies to expand ; and long before they reach the surface, their internal organs are generally forced out of their 20 mouths, and their eyes from the sockets, while their bodies are so flattened and distorted that their true shape can only be guessed at.

Sometimes, too, a most curious accident befalls one of these creatures. Eagerly pursuing a victim, 25 perhaps, it incautiously rises to too great a distance

from the sea-bottom. Its swimming-bladder of course expands as the pressure upon it is reduced, and renders the fish so much lighter in proportion to its size that, when it attempts to sink to the bottom, it
 5 finds itself unable to do so. Still rising, the pressure is yet further reduced, till at last the body of the hapless creature literally bursts, and floats upward, mangled and shapeless, to the surface of the sea. These fishes, in fact, have constantly to be on their
 10 guard against the danger, not of falling downward, but of tumbling upward !

But other remarkable creatures besides fishes are found in the depths of the sea. There is a crab, for instance, which carries its young about in an odd
 15 little pouch on the lower surface of the body, just as the kangaroo does. Thus, while they are still small and unable to defend themselves, the little creatures are protected from their many enemies. Another crab has legs nearly four times as long as its body, while
 20 the body and limbs of a third are so densely clothed with long, sharp spines, that it can only be handled with the very greatest care. Most of these deep-sea crabs are entirely blind, the curious eyestalks, on which the organs of vision are usually set, being absent.
 25 There is a very strange hermit crab, too, which is found at a depth of three thousand fathoms, or rather more than three miles and a quarter. Like all hermit crabs, it has its long, flexible tail unprotected

by the shelly armor that covers the rest of the body, and is therefore obliged in some way to guard it from the attacks of its enemies. Empty whelk-shells, however, which are generally employed for this purpose by other hermit crabs, are not to be found in the depths of the ocean; so it either forms cases for its tail of sand, fastened together in some curious way which has not been satisfactorily explained, or else makes use of pieces of bamboo, which, being saturated with water, have slowly sunk to the bottom, or of the holes in lumps of water-logged wood. On the back of this crab, strange to say, a small sea anemone is generally found to be living.

Then there are some very remarkable creatures known as sea spiders, which combine the characteristics of insects, spiders, and crabs. Their legs are very long indeed, and their bodies are very small, while the mouth is placed at the top of a long beak which runs out from the front of the head. But the strangest feature of these animals is that a branch of the stomach runs down each of the legs, almost as far as the claw at the tip!

Finally, there are stalked crinoids, or sea lilies, which may be briefly described as starfishes growing at the end of long stalks. These stalks are made up of an astonishing number of tiny joints—as many as a hundred and fifty thousand having been found in the stem of a single sea lily—while the base is fastened

down to the surface of a rock by a number of spreading rootlets.

In days of old these stalked crinoids were extremely plentiful; marble, for instance, often consists of little else than the joints of their stems, and the rocks in many parts of the world are full of their fossil remains. But until the bed of the deep sea was explored, it was supposed that they had become

A stalked crinoid, or sea lily.

1, Natural size. 2, Cup and arms. 3, Single arm. (Nos. 2 and 3 magnified.)

almost entirely extinct. Now, however, we know that the floor of the ocean is in many places densely clothed with them, just as it must have been almost everywhere thousands of years ago.

Such are some of the wonders of the deep sea. Many more there are which space will not allow me

to describe, or even to mention. And we can have little doubt that when the great abysses of the ocean have been more thoroughly explored, our knowledge of its inmates will be very largely increased, and that even stranger creatures will be found to exist than any which have yet been discovered.

I. **Mōl'lūsks**: animals covered with shells, such as cuttlefish and snails. **Crūs tā'ceans (shans)**: shellfish, such as lobsters and crabs, so called from the crustlike shell with which they are covered. **Phos phor ōs'cent (fōs fōr)**: shining with a light like that of phosphorus, a natural light-giving substance. **Vō rā'cious (shūs)**: greedy; gluttonous. **Lūr'ing**: attracting. **Pŷ'thōn**: a large-mouthed snake, somewhat like a boa-constrictor.

II. **Neū'tralize**: destroy the effect of.

Sir Galahad

BY ALFRED, LORD TENNYSON

My good blade carves the casques of men,
 My tough lance thrusteth sure,
 My strength is as the strength of ten,
 Because my heart is pure.
 The shattering trumpet shrilleth high,
 The hard brands shiver on the steel,
 The splintered spear shafts crack and fly,
 The horse and rider reel:

They reel, they roll in clanging lists,
 And when the tide of combat stands,
 Perfume and flowers fall in showers,
 That lightly rain from ladies' hands.

5 How sweet are looks that ladies bend
 On whom their favors fall !
 For them I battle till the end,
 To save from shame and thrall :
 But all my heart is drawn above,
 10 My knees are bowed in crypt and shrine :
 I never felt the kiss of love,
 Nor maiden's hand in mine.
 More bounteous aspects on me beam,
 Me mightier transports move and thrill ;
 15 So keep I fair through faith and prayer
 A virgin heart in work and will.

When down the stormy crescent goes,
 A light before me swims,
 Between dark stems the forest glows,
 20 I hear a noise of hymns :
 Then by some secret shrine I ride ;
 I hear a voice, but none are there ;
 The stalls are void, the doors are wide,
 The tapers burning fair.
 25 Fair gleams the snowy altar cloth,
 The silver vessels sparkle clean,

Sir Galahad

From the painting by G. F. Watts

Engraved by Walter Aikman

The shrill bell rings, the censer swings,
And solemn chants resound between.

- Sometimes on lonely mountain meres
I find a magic bark ;
5 I leap on board : no helmsman steers :
I float till all is dark.
A gentle sound, an awful light !
Three angels bear the Holy Grail :
With folded feet, in stoles of white,
10 On sleeping wings they sail.
Ah, blessed vision ! blood of God !
My spirit beats her mortal bars,
As down dark tides the glory slides,
And starlike mingles with the stars.
- 15 When on my goodly charger borne
Through dreaming towns I go,
The cock crows ere the Christmas morn,
The streets are dumb with snow.
The tempest crackles on the leads,
20 And, ringing, springs from brand and mail ;
But o'er the dark a glory spreads,
And gilds the driving hail.
I leave the plain, I climb the height ;
No branchy thicket shelter yields ;
25 But blessed forms in whistling storms
Fly o'er waste fens and windy fields.

A maiden knight — to me is given
 Such hope, I know not fear;
 I yearn to breathe the airs of heaven
 That often meet me here.
 I muse on joy that will not cease, 5
 Pure spaces clothed in living beams,
 Pure lilies of eternal peace,
 Whose odors haunt my dreams;
 And, stricken by an angel's hand,
 This mortal armor that I wear, 10
 This weight and size, this heart and eyes,
 Are touched, are turned to finest air.

The clouds are broken in the sky,
 And through the mountain walls
 A rolling organ-harmony 15
 Swells up, and shakes and falls.
 Then move the trees, the copses nod,
 Wings flutter, voices hover clear:
 "O just and faithful knight of God!
 Ride on! the prize is near." 20
 So pass I hostel, hall, and grange;
 By bridge and ford, by park and pale,
 All armed I ride, whate'er betide,
 Until I find the Holy Grail.

Sir Gai' a hād: a knight of King Arthur's Round Table,
 the only one who succeeded in the quest for the Holy Grail.

Casques (cāsks): armor for the head and neck. **Brānds**: a poetic word for swords, so called from their brightness. **Stalls**: seats in the choir of a church for the clergy. **Vold**: empty. **Çën/sēr**: a vessel for perfumes, used in churches for burning incense. **Mēres**: lakes. **Holy Grail**: grail is an old word meaning cup or dish. According to a legend of the Middle Ages, the Holy Grail was the cup or dish used by Christ at the last supper, and could be seen only by a perfectly pure and holy person. **Stōles**: long, loose garments; sometimes, scarfs worn by clergymen. **Cōps/ēs**: woods of small growth; thickets of brushwood. **Hōs/tēl**: an old word for inn.

On American Taxation

BY WILLIAM PITT, EARL OF CHATHAM

William Pitt, Earl of Chatham (1708–1778): An English statesman and orator, “the Great Commoner.” He made several brilliant speeches in defense of the American colonies. This selection is from an eloquent speech delivered in the House of Commons, January 16, 1766, in which he condemned the Stamp Act, and argued that England had no right to tax the colonies.

Gentlemen, sir, have been charged with giving birth to sedition in America. They have spoken their sentiments with freedom against this unhappy act, and that freedom has become their crime. Sorry
 5 I am to hear the liberty of speech in this house imputed as a crime. But the imputation shall not

discourage me. It is a liberty I mean to exercise. No gentleman ought to be afraid to exercise it. It is a liberty by which the gentleman who calumniates it might have profited. He ought to have desisted from his project.

5

The gentleman tells us America is obstinate; America is almost in open rebellion. I rejoice that America has resisted. Three millions of people so dead to all the feelings of liberty as voluntarily to submit to be slaves would have been fit instruments¹⁰ to make slaves of the rest. I come not here armed at all points, with law cases and acts of Parliament, with the statute-book doubled down in dog's-ears, to defend the cause of liberty. But the defense of liberty, upon a general principle, upon a constitutional¹⁵ principle, is a ground on which I stand firm; on which I dare meet any man.

The gentleman tells us of many who are taxed and are not represented—the India Company, merchants, stockholders, manufacturers. Surely many²⁰ of these are represented in other capacities, as owners of land, or as freemen of boroughs. It is a misfortune that more are not equally represented. But they are all inhabitants, and as such are they not virtually represented? Many have it in their option²⁵ to be actually represented. They have connections with those that elect, and they have influence over them. The gentleman mentioned the stockholders:

I hope he does not reckon the debts of the nation as a part of the national estate.

The gentleman asks, "When were the colonies emancipated?"

5 But I desire to know when they were made slaves? But I dwell not upon words. When I had the honor of serving his majesty, I availed myself of the means of information which I derived from my office; I speak, therefore, from knowledge. My materials were
10 good, I was at pains to collect, to digest, to consider them; and I will be bold to affirm that the profits to Great Britain from the trade of the colonies, through all its branches, is two millions a year. This is the fund that carried you triumphantly through the last war.

15 A great deal has been said without doors of the power, of the strength, of America. It is a topic that ought to be cautiously meddled with. In a good cause, on a sound bottom, the force of this country can crush America to atoms. I know the
20 valor of your troops. I know the skill of your officers. There is not a company of foot that has served in America out of which you may not pick a man of sufficient knowledge and experience to make a governor of a colony there. But on this ground, on the
25 Stamp Act, when so many here will think it a crying injustice, I am one who will lift up my hands against it.

In such a cause your success would be hazardous.

America, if she fell, would fall like the strong man. She would embrace the pillars of the state, and pull down the constitution along with her. Is this your boasted peace? Not to sheath the sword in its scabbard, but to sheath it in the bowels of your country-men?

Will you quarrel with yourselves now the whole House of Bourbon is united against you; while France disturbs your fisheries in Newfoundland, embarrasses your slave trade to Africa, and withhold from your subjects in Canada their property stipulated by treaty; while the ransom for the Manillas is denied by Spain, and its gallant conqueror basely traduced into a mean plunderer, — a gentleman whose noble and generous spirit would do honor to the proudest grandee of the country?

The Americans have not acted in all things with prudence and temper; they have been wronged. They have been driven to madness by injustice. Will you punish them for the madness you have occasioned? Rather let prudence and temper come first from this side. I will undertake for America that she will follow the example. There are two lines in a ballad of Prior's, of a man's behavior to his wife, so applicable to you and your colonies that I cannot help repeating them: —

"Be to her faults a little blind,
Be to her virtues very kind."

Upon the whole, I will beg leave to tell the House what is my opinion. It is, that the Stamp Act be repealed absolutely, totally, and immediately. That the reason for the repeal be assigned, because it was founded on an erroneous principle.

Sê dî'tion (dīsh ūn): rebellion; discontent against government. **Cā lūm'nl ātes**: accuses falsely of a crime; slanders. **Bôr'oughs**: English towns which send members to parliament. **Vīr'tū al lŷ**: practically. **Ōp'tion** (shŭn): power of choosing; choice. **Ēmān'qī pāt ēd**: set free. **The last war**: the French and Indian war (1754-1763). **Stamp Act**: an act of the British parliament (1765) imposing a duty on all the paper and parchment used in the American colonies. **Soăb'bard**: the case in which the blade of a sword is kept. **House of Bôur'bon**: a family of French kings. **Stîp'tū lāt ēd**: agreed on. **Trā-dūged'**: slandered. **Its gallant conqueror**, etc.: Sir William Draper (1721-1787), a British officer who commanded as colonel at the capture of Manilla from the Spaniards in 1763. **Grān-dēe'**: man of high rank; nobleman. **Matthew Prior** (1664-1721): an English poet and diplomatist.

In Praise of Wisdom

PROVERBS iii. 13-26

Happy is the man that findeth wisdom, and the man that getteth understanding:

For the merchandise of it is better than the merchandise of silver, and the gain thereof than fine gold.

She is more precious than rubies: and all the things thou canst desire are not to be compared unto her.

Length of days is in her right hand; and in her left hand riches and honor. 5

Her ways are ways of pleasantness, and all her paths are peace.

She is a tree of life to them that lay hold upon her: and happy is every one that retaineth her.

The Lord by wisdom hath founded the earth; by 10 understanding hath He established the heavens.

By His knowledge the depths are broken up, and the clouds drop down the dew.

My son, let not them depart from thine eyes: keep sound wisdom and discretion: 15

So shall they be life unto thy soul, and grace to thy neck.

Then shalt thou walk in thy way safely, and thy foot shall not stumble.

When thou liest down, thou shalt not be afraid: 20 yea, thou shalt lie down, and thy sleep shall be sweet.

Be not afraid of sudden fear, neither of the desolation of the wicked, when it cometh.

For the Lord shall be thy confidence, and shall 25 keep thy foot from being taken.

Storming a Mexican Temple

By W. H. PRESCOTT

William Hickling Prescott

William Hickling Prescott (1795–1859): An American historian. His works, "The History of Ferdinand and Isabella," "The Conquest of Mexico," "The Conquest of Peru," and "The History of Philip II.," are all about Spain and her conquests.

This account of a combat between the Mexicans and the Spaniards is from "The Conquest of Mexico."

Cortes, having cleared a way for the assault, sprang up the lower stairway, followed by the gallant cavaliers of his little band, leaving a file of his own men and a strong corps of Indian allies to hold the enemy in check at the foot of the monument. On the first landing, as well as on the several galleries above, and on the summit, the Aztec warriors were drawn up to dispute his passage.

From their elevated position they showered down volleys of lighter missiles, together with heavy stones, beams, and burning rafters, which, thundering along

the stairway, overturned the ascending Spaniards and carried desolation through their ranks. The more fortunate, eluding or springing over these obstacles, succeeded in gaining the first terrace; where, throwing themselves on their enemies, they compelled them after a short resistance to fall back. The assailants pressed on, supported by a brisk fire of the soldiers from below, which so much galled the Mexicans in their exposed situations that they were glad to take shelter on the broad summit of the teocalli. 10

Cortes and his comrades were close upon their rear, and the two parties soon found themselves face to face on this aerial battlefield, engaged in mortal combat in presence of the whole city, as well as of the troops in the courtyard, who paused as if by 15 mutual consent from their own hostilities, gazing in silent expectation on the issue of those above. The area, though somewhat smaller than the base of the teocalli, was large enough to afford a fair field of fight for a thousand combatants. 20

It was paved with broad, flat stones. No impediment occurred over its surface except the huge sacrificial block and the temples of stone which rose to the height of forty feet at the farther extremity of the area. One of these had been consecrated to the 25 Cross; the other was still occupied by the Mexican war god. The Christian and the Aztec contended for their religions under the very shadow of their

respective shrines ; while the Indian priests, running to and fro, with their hair wildly streaming over their sable mantles, seemed hovering in mid-air, like so many demons of darkness, urging on the work of
5 slaughter.

The parties closed with the desperate fury of men who had no hope but in victory. Quarter was neither asked nor given ; and to fly was impossible. The edge of the area was unprotected by parapet. The
10 least slip would be fatal ; and the combatants, as they struggled in mortal agony, were sometimes seen to roll over the sheer sides of the precipice together.

Cortes himself is said to have had a narrow escape from this dreadful fate. Two warriors, of strong,
15 muscular frames, seized on him, and were dragging him violently toward the brink of the teocalli. Aware of their intention, he struggled with all his force, and, before they could accomplish their purpose, succeeded in tearing himself from their grasp
20 and hurling one of them over the walls with his own arm. The story is not improbable in itself, for Cortes was a man of uncommon agility and strength.

The battle lasted with unintermitting fury for three hours. The number of the enemy was double
25 that of the Christians ; and it seemed as if it were a contest which must be determined by numbers and brute force rather than by superior science. But it was not so. The invulnerable armor of the Spaniard,

his sword of matchless temper, and his skill in the use of it, gave him advantages which far outweighed the odds of physical strength and numbers.

After doing all that the courage of despair could enable men to do, resistance grew fainter and fainter ⁵ on the side of the Aztecs. One after another they had fallen. Two or three priests only survived to be led away in triumph by the victors. Every other combatant was stretched a corpse on the bloody arena, or had been hurled from the giddy heights. ¹⁰ Yet the loss of the Spaniards was not inconsiderable; it amounted to forty-five of their best men; and nearly all the remainder were more or less injured in the desperate conflict.

The victorious cavaliers now rushed toward the ¹⁵ sanctuaries. The lower story was of stone, the two upper were of wood. Penetrating into their recesses, they had the mortification to find the image of the Virgin and the Cross removed. But in the other edifice they still beheld the grim figure of the Mexi- ²⁰ can war god, with his censer of smoking hearts, and the walls of his temple reeking with gore, — not improbably of their own countrymen.

With shouts of triumph the Christians tore the uncouth monster from his niche, and tumbled him, ²⁵ in the presence of the horror-struck Aztecs, down the steps of the teocalli. They then set fire to the accursed building. The flames speedily ran up the

slender towers, sending forth an ominous light over city, lake, and valley, to the remotest hut among the mountains. It was the funeral pyre of paganism, and proclaimed the fall of that sanguinary religion which had so long, like a dark cloud, hung over the fair region of Anahuac.

Āz'tēc: belonging to the Aztec race, an early North American race which the Spaniards found inhabiting the plateau of Mexico. **Hernando Cōr'tēs** (1485-1547?): a Spanish adventurer, the conqueror of Mexico. **Mis'siles**: weapons intended to be thrown. **Ēlūd'ing**: shunning; avoiding. **Gāl'ed**: injured; annoyed. **Tē ō cāl'li**: a Mexican temple in the form of a pyramid. **Mōr'tal**: deadly. **Hōs tli'l tles**: acts of warfare. **Quar'tēr**: mercy. **Pār'ā pēt**: a low wall, especially one protecting the edge of a roof, bridge, or the like. **Shēer**: steep; straight up and down. **Ūn in tēr mīt'ting**: uninterrupted; not stopping. **Īn vūl'nēr a ble**: that cannot be injured. **Tēm'pēr**: hardness. Metal is tempered or hardened by repeated heating and cooling. **Ā rē'na**: place of public contest. **Pyre**: heap; pile. **Sān'guī nā rỹ**: bloody; cruel. **Ā nā huac'(wāk)**: the plateau of Mexico.

The Poet

BY RALPH WALDO EMERSON

The gods talk in the breath of the woods,
 They talk in the shaken pine,
 And fill the long reach of the old seashore
 With dialogue divine;

And the poet who overhears
 Some random word they say
 Is the fated man of men
 Whom the ages must obey.

The Landing of Columbus in the New World and his Return to Spain

FROM "THE LIFE OF COLUMBUS," BY WASHINGTON IRVING

I

It was on Friday morning, the 12th of October, 1492, that Columbus first beheld the New World. As the day dawned he saw before him a level island, several leagues in extent, and covered with trees like a continual orchard. Though apparently uncultivated, it was populous, for the inhabitants were seen issuing from all parts of the woods and running to the shore. As they stood gazing at the ships, they appeared by their attitudes and gestures to be lost in astonishment.

Columbus made signal for the ships to cast anchor, and the boats to be manned and armed. He entered his own boat, richly attired in scarlet, and holding the royal standard; whilst Martin Alonzo Pinzon and Vincent Jañez, his brother, put off in company in their boats, each with a banner of the enterprise emblazoned with a green cross, having on either side

the letters F. and Y., the initials of the Castilian monarchs Fernando and Ysabel, surmounted by crowns.

As he approached the shore, Columbus, who was
5 disposed for all kinds of agreeable impressions, was
delighted with the purity and suavity of the atmosphere, the crystal transparency of the sea, and the extraordinary beauty of the vegetation. He beheld,
also, fruits of an unknown kind upon the trees which
10 overhung the shores. On landing he threw himself
upon his knees, kissed the earth, and returned thanks
to God with tears of joy. His example was followed
by the rest, whose hearts indeed overflowed with the
same feelings of gratitude.

15 Columbus then rising drew his sword, displayed
the royal standard, and assembling round him the
rest who had landed, he took solemn possession in
the name of the Castilian sovereigns, giving the
island the name of San Salvador. Having complied
20 with the necessary forms and ceremonies, he called
upon all present to take the oath of obedience to
him, as admiral and viceroy, representing the persons
of the sovereigns.

The feelings of the crew now burst forth in the
25 most extravagant transports. They had recently considered themselves devoted men, hurrying forward to destruction; they now looked upon themselves as favorites of fortune, and gave themselves up to the

most unbounded joy. They thronged around the admiral with overflowing zeal, some embracing him, others kissing his hands. Those who had been most mutinous and turbulent during the voyage were now most devoted and enthusiastic. Some begged favors 5 of him, as if he had already wealth and honors in his gift. Many who had outraged him by their insolence now crouched at his feet, begging pardon for all the trouble they had caused him, and promising the blindest obedience for the future. 10

The natives of the island, when at the dawn of day they had beheld the ships hovering on their coasts, had supposed them monsters which had issued from the deep during the night. They had crowded to the beach, and watched their movements with 15 awful anxiety. Their veering about, apparently without effort, and the shifting and furling of their sails, resembling huge wings, filled them with astonishment. When they beheld their boats approach the shore and a number of strange beings, clad in 20 glittering steel or raiment of various colors, landing upon the beach, they fled in affright to the woods.

Finding, however, that there was no attempt to pursue nor molest them, they gradually recovered from their terror and approached the Spaniards with 25 great awe, frequently prostrating themselves on the earth and making signs of adoration. During the ceremonies of taking possession, they remained

gazing in timid admiration at the complexion, the
beards, the shining armor, and splendid dress of the
Spaniards. The admiral particularly attracted their
attention, from his commanding height, his air of
5 authority, his dress of scarlet, and the deference
which was paid him by his companions, — all which
pointed him out to be the commander. When they
had still further recovered from their fears, they
approached the Spaniards, touched their beards, and
10 examined their hands and faces, admiring their white-
ness. They now supposed that the ships had sailed
out of the crystal firmament which bounded their
horizon, or had descended from above on their ample
wings, and that these marvelous beings were inhab-
15 itants of the skies.

The natives of the island were no less objects
of curiosity to the Spaniards, differing as they did
from any race of men they had ever seen. As
Columbus supposed himself to have landed on an
20 island at the extremity of India, he called the
natives by the general name of Indians, which was
universally adopted before the true nature of his
discovery was known, and has since been extended
to all the aboriginals of the New World.

25 The islanders were friendly and gentle. Their
only arms were lances, hardened at the end by fire,
or pointed with a flint or the teeth or bone of a fish.
There was no iron to be seen, nor did they appear

acquainted with its properties; for, when a drawn sword was presented to them, they took it by the edge.

Columbus distributed among them colored caps, glass beads, hawk's bells, and other trifles, such as the Portuguese were accustomed to trade with among the nations of the gold coast of Africa. They received them eagerly, hung the beads round their necks, and were wonderfully pleased with their finery and with the sound of the bells. 10

The Spaniards remained all day on shore, refreshing themselves after their anxious voyage amid the beautiful groves of the island, and returned on board late in the evening, delighted with all they had seen.

On the following morning, at break of day, the shore was thronged with the natives; some swam off to the ships, others came in light barks which they called canoes, formed of a single tree, hollowed, and capable of holding from one man to the number of forty or fifty. These they managed skillfully with paddles, and, if overturned, swam about in the water with perfect unconcern, as if in their natural element, righting their canoes with great facility.

They were eager to procure more toys and trinkets, — not, apparently, from any idea of their value, but because everything from the hands of the strangers possessed a supernatural virtue in their eyes as having been brought from heaven; they

even picked up fragments of glass and earthenware as valuable prizes.

The avarice of the discoverers was quickly excited by the sight of small ornaments of gold, worn by
 5 some of the natives in their noses. These the latter gladly exchanged for glass beads and hawk's bells; and both parties exulted in the bargain, no doubt admiring each other's simplicity.

Columbus inquired of the natives where this gold
 10 was procured. They answered him by signs, pointing to the south, where, he understood them, dwelt a king of such wealth that he was served in vessels of wrought gold. He understood, also, that there was land to the south, the southwest, and the northwest,
 15 and that the people from the last-mentioned quarter frequently proceeded to the southwest in quest of gold and precious stones, making in their way descents upon the islands and carrying off the inhabitants.

20 The island where Columbus had thus, for the first time, set his foot upon the New World was called by the natives Guana-hané. It still retains the name of San Salvador, which he gave to it, though called by the English Cat Island. The light which he had
 25 seen on the evening previous to his making land may have been on Watling's Island, which lies a few leagues to the east.

On the morning of the 14th of October, the

admiral set off at daybreak with the boats of the ships to reconnoiter the island, directing his course to the northeast. The coast was surrounded by a reef of rocks, within which there was a depth of water and sufficient harbor to receive all the ships ⁵ in Christendom. The entrance was very narrow; within, there were several sand banks, but the water was as still as a pool.

The island appeared throughout to be well wooded, with streams of water, and a large lake in the center. ¹⁰ As the boats proceeded, they passed two or three villages, the inhabitants of which, men as well as women, ran to the shores, throwing themselves on the ground, lifting up their hands and eyes, either giving thanks to heaven, or worshiping the Spaniards ¹⁵ as supernatural beings. They ran along parallel to the boats, calling after the Spaniards, and inviting them by signs to land, offering them various fruits and vessels of water.

Finding, however, that the boats continued on ²⁰ their course, many threw themselves into the sea and swam after them, and others followed in canoes. The admiral received them all with kindness, giving them glass beads and other trifles, which were received with transport as celestial presents, for the invariable ²⁵ idea of the savages was that the white men had come from the skies.

In this way they pursued their course, until they

came to a small peninsula, which with two or three days' labor might be separated from the mainland and surrounded with water, and was therefore specified by Columbus as an excellent situation for a
 5 fortress. On this were six Indian cabins, surrounded by groves and gardens as beautiful as those of Castile. The sailors being wearied with rowing, the admiral returned to the ships, taking seven of the natives with him, that they might acquire the Spanish
 10 language and serve as interpreters.

Having taken a supply of wood and water, they left the island of San Salvador the same evening, the admiral being impatient to arrive at the wealthy country to the south, which he flattered himself
 15 would prove the famous island of Cipango.

* * * * *

II

At midday on the 15th of March, Columbus entered the harbor of Palos, whence he had sailed on the 3d of August in the preceding year, having taken not quite seven months and a half to accomplish this
 20 most momentous of all maritime enterprises.

The triumphant return of Columbus was a prodigious event in the history of the little port of Palos, where everybody was more or less interested in the fate of his expedition.

25 Great was the agitation of the inhabitants of Palos

when they beheld one of the ships standing up the river; but when they learned that she returned in triumph from the discovery of a world, the whole community broke forth into transports of joy. When Columbus landed, the multitude thronged to see and 5 welcome him, and a grand procession was formed to the principal church, to return thanks to God for so signal a discovery made by the people of that place — forgetting, in their exultation, the thousand difficulties they had thrown in the way of the enter-10 prise.

At the court he was treated with like honor, being addressed as “Don Christopher Columbus, our admiral of the ocean sea, and viceroy and governor of the islands discovered in the Indies.” 15

About the middle of April Columbus arrived at Barcelona, where every preparation had been made to give him a solemn and magnificent reception. His entrance into this noble city has been compared to one of those triumphs which the Romans were 20 accustomed to decree to conquerors. First, were paraded the Indians, painted according to their savage fashion, and decorated with their national ornaments of gold. After these, were borne various kinds of live parrots, together with stuffed birds and 25 animals of unknown species, and rare plants supposed to be of precious qualities. Great care was taken to make a conspicuous display of Indian coronets,

bracelets, and other decorations of gold, which might give an idea of the wealth of the newly discovered regions.

After this, followed Columbus on horseback, surrounded by a brilliant cavalcade of Spanish chivalry. The streets were almost impassable from the countless multitude; the windows and balconies were crowded with the fair; the very roofs were covered with spectators. It seemed as if the public eye could not be sated with gazing on these trophies of an unknown world, or on the remarkable man by whom it had been discovered.

I. **Suav'itỹ** (swǎv): pleasantness; softness. **Martin Alonzo Pin zon'** (pên thôn) (1441-1493): a Spanish navigator who commanded the Pinta. **Vincent Yañez Pin zon'** (pên thôn) (1460 ?-1524 ?): a Spanish navigator who commanded the Niña. **Vice'roy**: one ruling with kingly power in the name of a king. **Dê vôt'êd**: here, doomed; usually, zealous; loving. **Āb ô rîg'inala**: first inhabitants; natives. **Fâ qil'i tỹ**: ease; readiness. **Ād mir'ing**: wondering at, — an old use of the word. **Rêc ôn-noi'têr**: examine, especially for military purposes. **Spêç'i fied**: named; selected. **Çi pân'gô**: a fabulous island, the object of search of many early navigators.

II. **Mô mên'toûs**: important. **Mār'i tîme**: marine; connected with the sea. **Tri'umphs** (ũmfə): magnificent processions and ceremonies held by the Romans in honor of victorious generals. **Sât'êd**: satisfied. **Trô'phies** (fiz): evidences of conquest; memorials of victory.

WORD LIST

- ă bōde'.** Awaited.
ăb ô rīg'ī nals. First inhabitants; natives.
ăc çæss'ī ble. Easy of access; approachable.
ăc çēs'sō rỹ. Connected with as a helper.
ăc cū'mũ lāt őd. Collected; stored up.
ăd mĩr'ing. Wondering at, — an old use of the word.
ă ē'rī al. Airy.
ăid-de-camp' (-käng). An officer chosen by a general to carry orders and to assist and represent him in other ways.
ăl'a bās tēr. A very hard stone.
ă-lēe'. On the side away from the wind.
Ăl'láh. The Mohammedan name for God.
ăm būs cāde'. Lying in wait, especially for the purpose of attacking an enemy by surprise; a place where one lies in wait.
Ă nă huac' (wāk). The plateau of Mexico.
ăn'tē chām běr. A small room leading into a larger one; an outer room.
ăp pâr'ent. Seeming.
- ăr'bĩ tră rỹ.** Bound by no law; possessing and abusing unlimited power.
ăr'dũ oũs. Difficult.
ă rē'ná. Place of public contest.
ăr'tĩ fiçe. Workmanship.
ăs çēr tăin'. Find out; make certain.
ăs'să găis. Spears used by native tribes in south Africa.
Ăz'tēc. Belonging to the Aztec race, an early North American race which the Spaniards found inhabiting the plateau of Mexico.
băle'ful. Hurtful; deadly.
bē dight'. Ornamented.
Bērķ'shire. An English county, in the southern part of which is situated the little village of Three Mile Cross, the scene of Miss Mitford's sketches.
bē smirched'. Soiled; discolored.
Black Hole of Calcutta. A cell in a fort at Calcutta into which 146 English prisoners were put, 123 of whom died before morning from lack of air.
blă'zoned. Emblazoned; adorned with a coat of arms.
Boer (bōōr). A farmer people of

Dutch descent in South Africa, recently at war with the British.

bôlt'rôpeş. Ropes stitched to the edges of sails to strengthen the sails.

bōon. Gift.

bôr'oughş. English towns which send members to parliament.

Bor'bon, House of. A family of French kings.

bow'ër, best. Large anchor.

bôx hâu'ing. Going from one tack or direction to another.

brăc'êş. Ropes by which the yards are moved horizontally.

brândş. A poetic word for swords, so called from their brightness.

bûc'kleş. Curls of hair; usually, metal frames with catches, used for fastening things together.

bûş'kingş. Strong coverings for the feet, coming some distance up the legs.

Çae'sâr, Caius Julius. The greatest of Roman generals. He conquered Spain, 49 B.C.

căi'tîff. Base fellow; wicked man.

că lûm'nî âtes. Accuses falsely of crime; slanders.

Căm'ê lôt. A legendary town in Winchester, England, the seat of King Arthur's palace.

că mës'cî â. A loose robe.

casques (câks). Armor for the head and neck.

căv'âl căde. A procession of persons on horseback.

çên'sêr. A vessel for perfumes, used in churches for burning incense.

ehăr'ăc têrş. Letters.

Charge of the Light Brigade. In the battle of Balaklava, in

the Crimean War, an English brigade was, by some mistake, ordered to charge a Russian battery, and obeying, had three-fourths of its men killed.

chêr'ly. Cheerily.

chûrlş. Rough, ill-bred men; laborers.

Çi păn'gô. A fabulous island, the object of search of many early navigators.

clây'môre. A large two-handed sword.

côf'fêr. Chest, especially one used for keeping valuables.

cô hê'sion (zhûn). The law of nature by which the particles of a body are held together.

côm bûs'tion (chûn). State of burning.

côme'ly. Good looking; handsome.

côm pôrts'. Agrees with; suits.

côn stêl lâ'tions (shûnş). Groups of fixed stars.

côn sũm'mâte. Of the highest quality; perfect.

côps'êş. Woods of small growth; thickets of brushwood.

côrse'lêt. Armor for the whole body.

Côr'têş, Hernando (1485–1547?). A Spanish adventurer, the conqueror of Mexico.

Côv'êrt. Cover; woods or land covered with underbrush which conceals game.

cräfts'man shîp. Skill in one's work; knowledge of a trade.

crê dên'tials (shalş). Letters of credit; testimonials showing that a person has a right to exercise official power.

crê dū'li tỹ. Readiness of belief.

Crí mē'an War. A war waged by France and England against Russia, to repel Russian advances in Turkey.

crūs tā'ceans (shang). Shell fish, such as lobsters and crabs, so called from the crustlike shell with which they are covered.

crỹpt. A secret place; a vault, especially one under a church used as a chapel.

cỹm'bal. A musical instrument.

dē clēn'sion (shũn). Falling off.

dē fēnd'ant. A person required to make answer in a law case.

dē pīct'ēd. Marked; painted.

dē tēr'mī nāte. Fixed; positive.

dēv as tā'tion (shũn). Ruin; destruction.

De Vaux (vō).

dē vōt'ēd. Hoped, doomed; usually, zealous, loving.

dēx tēr'ĩ tỹ. Skill; cleverness.

dĩn'gleş. Narrow dales; small valleys.

dīs cerned' (zērnd). Seen; distinguished.

dīs cōurse'. Conversation; talk.

dīs crēet'. Prudent; careful.

dĩ'vērş. Diverse; differing in kind, — an old meaning of the word.

Dō'grā Sikkas. A tribe in India.

dõn. A Spanish title, formerly applied only to persons of high rank, now used in the sense of Mr. or Sir.

Draper, Sir William (1721–1787). A British officer who commanded as colonel at the

capture of Manila from the Spaniards in 1763.

ē jác'tũ lāt ēd. Exclaimed.

ēked. Added to; increased.

ē lūd'ing. Shunning; avoiding.

Ē lys'ian (lĩzh an). Pertaining to Elysium, the land of the blest.

ē mǎn'qĩ pāt ēd. Set free.

ēm bār'gō. An order of government forbidding the departure of ships of commerce from certain ports.

ēn cō'mĩ ũng. High praise; strong commendation.

Ēn'dĩ cott, John (1588–1665). Colonial governor of Massachusetts.

en trée' (ǎn trǎ). A French word meaning entrance; the right to come in.

ēs pĩ'al. Spying.

ē'thēr. A medium in all space, through which light and heat readily pass.

ē'ven. A poetic form of the word evening.

ēv õ lū'tion (shũn). Prescribed movement, as of a ship or a body of troops.

ēx qēs's'. Undue amount; too much.

ēx pē'dĩ ent. Means of overcoming a difficulty.

ēx pēnd'ĩ tũre. Laying out; spending.

ēx plĩq'it lỹ. Clearly; plainly.

ēx tēn'ũ āte. Cover with excuses; make less the crime of.

fǎ qĩ'l'ĩ tỹ. Ease; readiness.

fǎv õ sĩ'tēs. A kind of fossil coral.

fēign. Pretend.

fig'ŭre. A mode of expressing ideas by words which suggest pictures.

fire'löck. An old-fashioned gun.

fire water. The Indian name for whisky.

fir'má ment. Sky.

frá tēr'nal. Brotherly.

fraught. Freightened; filled.

fŭ šēe'. An old-fashioned gun.

Gál'á häd, Sir. A knight of King Arthur's Round Table, the only one who succeeded in the quest for the Holy Grail.

Gäl'äx ŷ. The Milky Way. See definition.

galled. Injured; annoyed.

gēm'mŷ. Ornamented with gems.

Gōōr'k'hāṣ. A tribe in India.

Gräil, Holy. Grail is an old word meaning cup or dish. According to a legend of the Middle Ages, the Holy Grail was the cup or dish used by Christ at the Last Supper, and could be seen only by a perfectly pure and holy person.

grän dēe'. Man of high rank; nobleman.

grēaveṣ. Armor for the leg below the knee.

Há'kīm. A wise man; a physician, especially among the Moham-medans.

há rāngued'. Addressed; made a speech to.

här'bīn gērṣ. Forerunners; messengers.

hāz'ard oūs. Dangerous; daring.

Hēr'cū lēṣ. A fabulous Greek hero, celebrated for his great strength.

Hig'gIn son, John (1616-1708).

An American clergyman and author.

hig'gleṣ. Disputes; bargains.

Hip pār'ehus. A Greek astronomer who lived about 150 B.C.

Hō'mēr. A Greek poet supposed to have lived about 1000 B.C.

hös'tēl. An old word for inn.

hös'tile. Warlike; unfriendly.

hös tīl'ī tīēṣ. Acts of warfare.

hūm'möck. Rounded knoll or hillock.

Hŷ'ä dēṣ. A group of five stars supposed by the ancients to foretell rainy weather when they rose with the sun.

hŷ mē nē'al. Of a marriage song.

īl līm'tā ā ble. Boundless.

īm äg ī nā'tions (shŭnṣ). Purposes; ideas; fancies.

īm pēach'. Charge; accuse.

īm pēr çep'tī ble. Not to be seen; invisible.

īm'pē tūs. The force with which a body is driven or impelled.

īm prēg'nā ble. Unconquerable; that cannot be taken.

īm çēs'sant. Unceasing; uninterrupted.

īm çēs'sant lŷ. Unceasingly; continually.

īm cūrṣ'. Meets with; exposes one's self to.

Indian Mutiny. In 1857 the native troops in India rose against the British soldiers, whom they outnumbered eight to one, and for a time threatened the overthrow of British power in India.

īm dīs pēn'sā ble. Not to be spared; necessary.

In hēr'ent. Natural; inborn.

In sīd'ī ōūs. Deceitful.

In sū lā'tion (shūn). The state of a body's being separated from others by nonconductors so as to prevent the passing of electricity.

In vīn'qī ble. Not to be overcome.

In vī'ō lāte. Not violated; uninjured.

In vūl'nēr ā ble. That cannot be injured.

jōc'ūnd. Merry; gay.

joy'ange. A poetical word for joyfulness.

Kān'juts. A tribe in India.

Kēp'lēr, Johann (1571-1631).
A German astronomer.

Khā'sī ā Hills.

Lān'çe lōt, Sir. The most famous of the knights of King Arthur's Round Table.

lān'guor (gwēr). Weariness.

lēech. An old word for physician.

lēt'tīng. Delaying; hindering, — an old meaning of the word.

liēge. King.

lig'ā tūreş. Bands.

lin'ē ā ment. Feature.

Lōd'don. A small river in southern England.

lūf. Turn a vessel's head toward the wind.

lūr'īng. Attracting.

māc'ēş. Heavy warclubs.

māg'nī tūde. Size.

mā lic'ious (lish ūs). Mischievous; spiteful.

māl. Public walk.

mā neų'vēr. Change of position; skillful movement.

Mā'ō rī. Inhabitants of New Zealand.

mārge. A poetic form of the word margin.

mār'ī tīme. Marine; connected with the sea.

mārķ. One of the bits of leather or colored bunting placed on the sounding line at distances of from two to five fathoms; the unmarked fathoms are called *deeps*.

mār'tial (shal). Warlike.

māss'y. Massive; forming or consisting of a large mass.

Mē dū'sā. According to Greek mythology, a woman whose hair was changed into serpents, after which all who looked upon her were turned to stone.

Mē'lēeh Ric. A Saracen name for King Richard.

Me nōm'o nēe. A river in Wisconsin and Illinois.

mēreş. Lakes.

Milky Way. The bright belt which is seen at night stretching across the sky. It is composed of stars so far and so blended as to be distinguishable only with the telescope.

mīs'slēş. Weapons intended to be thrown.

mōl'lūsks. Animals covered with shells, such as cuttlefish and snails.

mō mēn'tōūs. Important.

Mōnt'sēr rāt.

mōr'tal. Deadly.

mũ nĩq'ĩ pāl'ĩ tỹ. A town having local government.

mur rain take such trumpery. A petty evil wish. Murrain is a disease among cattle.

mỹth'ĩ cal. Fabulous.

Nau'ti lūs, chambered or pearly.

A small sea animal inhabiting a cell having many chambers or cavities, each of which is occupied in succession. As the animal increases in size, it advances, forming a larger chamber and partitioning off the one last occupied.

Nāz á rēne'. A follower of Christ, the Nazarene; a Christian, usually in contempt.

nēc rō mǎn'tíc. Enchanted; magic.

neū'tral ize. Destroy the effect of.

Newton, Sir Isaac (1642-1727). An English philosopher and mathematician.

noi'sóme. Disagreeable; offensive.

nox'ious (nők shūs). Hurtful; harmful; unwholesome.

Ō cōn'tō. A city in Wisconsin.

ōp'tion (shūn). Power of choosing; choice.

ōr'dĩ nançe. Law.

Ō rĩ'ōn. A large bright star named for the fabulous hunter, Orion.

out lānd'ish. Strange.

pǎd. An easy-paced horse.

pāl'freỹ. A small saddlehorse.

pāl'pá blỹ. Plainly; evidently.

pāl'trỹ. Worthless; trifling.

pá rāde'. Ground where troops are drilled.

pār'á pět. A low wall, especially

one protecting the edge of a roof, bridge or the like.

pěr di'tion (dĩsh ũn). Ruin; destruction.

pěr ěn'nĩ al. Never failing; unceasing.

pě'ri ódš. Sentences.

pěr pět'ũ áte. Cause to endure; preserve for all time.

pě trō'lě ũm. Rock or natural oil. pheas'ant (fěz). An English game bird.

Philip II (1165-1223). A king of France called Au gūs'tūs, the Imperial.

phos phor ěs'çent (fös főr). Shining with a light like that of phosphorus, a natural light-giving substance.

Pin zon', Martin Alonzo (1441-(pěn thōn) 1493). A Spanish navigator who commanded the *Pinta* on Columbus's first voyage.

Pin zon, Vincent Yañez (1460?-(pěn thōn) 1524?). A Spanish navigator who commanded the *Niña*.

plāsh'ỹ. Watery.

plau'şĩ blē. Seemingly reasonable.

Plē'ia dēş (yá). A group of seven small stars named for the seven daughters of the fabulous hero, Atlas.

plūmbēd. Found out the depth; sounded.

pō'tēn tātes. Princes; kings.

prē má tũre'lỹ. Too early; before the proper time.

Prior, Matthew (1664-1721). An English poet and diplomatist.

- prô dīg'ioūs. Huge; monstrous.
- prô mül'gāt īng. Publishing; making known.
- prôv'ēn dēr. Food; especially for domestic animals.
- prôv'ôst. Keeper of the prison, — an old use of the word.
- pū'is sant. Powerful.
- pÿre. Heap; funeral pile.
- pÿ'thôn. A large-mouthed snake, somewhat like a boa constrictor.
- quar'tēr. Mercy.
- quar'tēr mās'tēr. An officer of low rank who attends to the helm, signals, etc., under the direction of the master of the vessel.
- quēst'īng. Seeking; going in pursuit of.
- quīz'zīng. Making sport of; mocking.
- rāl'lied. Teased.
- rāmp'ant. Leaping.
- rēc ōn noi'tēr. Examine, especially for military purposes.
- red-cross knight. St. George, the patron saint of England.
- rē doub't'ā ble. Dreadful; fearful.
- rē'gal. Kingly.
- rē quīt'al. Return for something done; reward.
- rēt'ī nūe. Train of attendants.
- rē'trô grāde. Moving backward.
- Richard Plān tǎg'ē nēt (1157-1199). An English king, called Cœur de Lion (kūr de lē ong), the Lion Heart.
- Rōd'ēr Ick. The last of the Gothic kings of Spain, who was driven from his throne by the Moors.
- rout. Defeat; confused flight.
- sá gǎc'ī tǿ. Quickness of judgment; wisdom.
- sǎg'ā mōrēg. Indian chiefs.
- sǎn'gui nǎ rÿ (gwī). Bloody; cruel.
- sāt'ēd. Satisfied.
- sá tī'ē tǿ. Excess of gratification; surfeit.
- scǎb'bard. The case in which the blade of a sword is kept.
- scīm'ī tērş. Curved swords used by the Arabs and other Oriental people.
- sē qēde'. Withdraw; separate from.
- sē di'tion (dīsh ūn). Rebellion; discontent against government.
- sēer. Prophet.
- shǎ grēen'. A kind of grained, untanned leather used for covering small cases and boxes.
- shāleş. Kind of rock.
- shāl'lóp. Boat.
- shēer. Steep; straight up and down.
- shīn'gle. Coarse gravel.
- shōal. Shallow water; advances into shallow water.
- sīg'nal. Remarkable; notable.
- sīg'nēt. Seal; sign.
- Sīk'kīm. A state in Bengal, India.
- sī'rēn. One of three sea nymphs said to sing with such sweetness that they drew sailors to destruction.
- sōl'āçe. Comfort.
- sō'lar. Of or pertaining to the sun.
- spēc'ī fied. Named; elected.
- spǎş mōd'ic. As in a spasm; shaking violently.
- Stamp Act. An act of the British parliament (1765) imposing a duty on all paper and parch-

- ment used in the American colonies.
- sta/k'ing. Moving forward stealthily, under cover of a screen, for the purpose of attack.
- stall/s. Seats in the choir of a church for the clergy.
- stip'u lāt'əd. Agreed on.
- stōlēg. Long, loose garments; sometimes, scarfs worn by clergymen.
- strā'tūm (pl. strata). Layer.
- suav'i tŷ (swāv). Pleasantness; softness.
- sūb tēr rā'nē an. Underground.
- sūn'drŷ. Several. *All and sundry*: all together and each separately.
- sū pīne'lŷ. Carelessly; idly.
- täck. The direction of a vessel with regard to the position of its sails; change the direction of a vessel by shifting the position of the helm and sails.
- tār'gēts. Small shields used as defensive weapons in war.
- tāt tōōed'. Marked, according to a savage custom, by pricking in coloring matter under the skin.
- tēm'pēr. Hardness. Metal is tempered or hardened by repeated heating and cooling.
- tēm'pō ral. Worldly.
- tē ō cāl'li. A Mexican temple, in the form of a pyramid.
- tīt il lā'tion (shŭn). Tickling.
- trā dūced'. Slandered.
- trāns fōr mā'tions (shŭnŷ). Changes.
- trān'sient (shĕnt). Passing quickly away; not lasting.
- trāns mīt'. Send.
- trāns mūt'əd. Changed from one form or nature into another.
- Tri'tōn. According to Greek mythology, a sea god who raised or calmed the billows by playing on a conch shell.
- tri'umphs (ūmfs). Magnificent processions and ceremonies held by the Romans in honor of victorious generals.
- trō'phies (fīz). Evidences of conquest; memorials of victory.
- trūmp'ēr ŷ. Things of no value; rubbish.
- trūn'cheon (chŭn). Handle.
- tū'nīc. A loose-fitting garment.
- tūr'bīd. Muddy.
- tūr'rēt. A small tower.
- ū biq'ui toūs (bīk wī). Being everywhere at the same time.
- Ū lŷs'sēs or Ō dŷs'seys. The wisest of the Greek heroes who fought against Troy.
- ūn dū lāt'ing. Rolling; rising and falling in wave-like forms.
- ūn in tēr mīt'ting. Uninterrupted; not stopping.
- ūn prē mēd'i tāt'əd. Unplanned; unthought of beforehand.
- vāunt. Boast.
- vē lōq'i tŷ. Speed; quickness of motion.
- vēr'nal. Spring.
- vīge'roy. One ruling with kingly power in the name of a king.
- vīr'tū al lŷ. Practically.
- vīŷ'or. Movable front piece of a helmet.
- void. Empty.

vô rá'cious (shūs). Greedy; glut- tonous.	wīṣe'ā cres (kōrṣ). Persons who pretend to be very wise; dunces.
wēl'kīn. Sky.	wōld. Plain; low hill.
WIn'thrōp, John (1588-1649). Colonial governor of Massachu- setts.	wōnt. Accustomed; used. yḡarned. Wished greatly.
